**Examination of draft Estimates of Expenditure 2001-02**  
**CONTROLLING OFFICER'S REPLY TO**  
**WRITTEN/SUPPLEMENTARY QUESTION**

Head : 194 Water Supplies Department

Subhead (No. & title) :

Programme : (2) Water Quality Control

Controlling Officer : Director of Water Supplies

Bureau Secretary : Secretary for Works

Question :

During this morning's Special FC meeting, the Director admitted the Administration has no figures to back up claims that the Guangdong Authorities have done a lot to improve the quality of Dongjiang water, such as the additional number of water treatment plants that have been commissioned in the past few years, the number of polluting factories which have been closed down and the number of polluters which have been found guilty in court and the penalties they received. Will the Administration undertake to secure such statistics from the Guangdong Authorities?

Asked by : Hon Emily LAU Wai-hing

Reply :

Although not readily available at the Special FC Meeting on 21 March 2001, the Administration does have some facts and figures from the Guangdong Authorities to elaborate on their water quality improvement measures in the Dongjiang catchment.

The Guangdong Authorities have reported that in the past few years, a number of sizeable sewage treatment plants have been completed in Tangxia (塘厦), Yantian (雁田) and Pinghu (平湖). Also, a number of similar plants are under construction, including those in Huizhou (惠州), Dongguan (东莞) and Shenzhen (深圳). The Guangdong Authorities have also stepped up enforcement control over the pollution at source. A total of 130 polluting factories had been removed or closed, and 60 cooked food stalls and restaurants had been closed.

The Administration will continue to liaise closely with the Guangdong Authorities in reviewing their progress on pollution control. Reporting on the latest situation is a standing agenda item in various meetings relating to the supply of Dongjiang water.

The Administration will also make arrangements for Hong Kong government officials and members of the Advisory Committee on the Quality of Water Supplies to revisit the Dongjiang catchment and on-going projects. The last visit was conducted in August 2000.
