LC Paper No. AS 117/00-01

Ref : AM 12/01/19 (Pt 2)

**Subcommittee on
Members' Remuneration and Operating Expenses Reimbursement**

Statistics of Members' Operating Expenses in June 2000

Purpose

This paper shows the major components of Members' operating expenses in June 2000 and compares them with the weights used in the Consumer Price Index (C).

Operating Expenses in Summary

2. The average operating expenses per Member based on the expenses reimbursed for June 2000 are as follows:

	\$	%
Monthly ceiling for office operation expenses reimbursement	101,290	100
Staff remuneration and expenses	63,977	63.2
Office accommodation	10,762	10.6
Other operating expenses	17,347	17.1
Equipment and furniture	66	0.1
Total reimbursement	92,152	91.0
Monthly ceiling for entertainment and travelling expenses reimbursement	14,460	100
Entertainment and travelling	12,930	89.4
Staff remuneration	313	2.2
Total reimbursement	13,243	91.6

3. The extent to which Members had claimed reimbursement up to the maximum amount allowable is shown below:

No. of Members Amount claimed	Office Operating Expenses (OOE)	Entertainment and Travelling Expenses (ETE)	Total (OOE + ETE)
100%	29	50	30
96% - 99%	10	0	8
91% - 95%	3	1	2
86% - 90%	5	0	9
81% - 85%	3	1	1
71% - 80%	2	1	1
61% - 70%	2	1	3
51% - 60%	2	1	4
41% - 50%	2	0	0
31% - 40%	1	1	1
⋮	0	0	0
0% - 5%	0	3	0

Detailed Breakdown

4. The expenses in paragraph 2 above are broken down below for comparison with the weights used in the Consumer Price Index (CPI) (C):

Staff Expenses			
	\$	% of Monthly Expenses Ceiling	Weight (%) in CPI(C)
Salaries	61,044	52.74	–
Medical benefits	116	0.10	1.54
Insurance premiums	46	0.04	–
Others	755	0.65	–
Funds set aside	2,016	1.74	–
Total	63,977	55.27	1.54

5 Statistics on the number of employees hired by each Member and the range of salaries are shown in **Appendices I** and **II** respectively.

6. Out of 59 Members, 24 had set aside funds for payment of year-end double pay or contract-end gratuities.

Office Accommodation Expenses			
	\$	% of Monthly Expenses Ceiling	Weight (%) in CPI(C)
Rents, management fees, rates and government rents	9,826	8.49	33.77
Utility charges	936	0.81	1.19
Total	10,762	9.30	34.96

7. In June 2000, rents in the amount of \$560,000 for 76 district offices were claimed by 48 Members. After eliminating the portions shared by other parties, there was an equivalent of 70 offices. Thirty-two of these offices were located in public housing estates, with a total rent of \$155,000, while 38 were situated elsewhere, with a total rent of \$405,000.

Other Operating Expenses, Equipment and Furniture			
	\$	% of Monthly Expenses Ceiling	Weight (%) in CPI(C)
Stationery	552	0.48	0.23
Periodicals and newspapers	538	0.46	0.66
Printing	5,144	4.44	-
Consultancy fees	7,395	6.39	-
Communication	2,611	2.26	1.17
Publicity and activities	430	0.37	-
Repairs and maintenance	156	0.13	0.19
Members' medical and dental insurance	10	0.01	-
Minor Tools	50	0.04	-
Software and fixtures	18	0.02	-
Equipment	66	0.06	6.31
Others	443	0.38	2.65
Total	17,413	15.04	11.21

Entertainment and Travelling Expenses			
	\$	% of Monthly Expenses Ceiling	Weight (%) in CPI(C)
Entertainment and Travelling	12,930	11.17	23.21
Staff remuneration	313	0.27	–
Total	13,243	11.44	23.21

8. Three Members used part of their entertainment and travelling expenses reimbursement to pay their staff's salaries in June 2000.

Consumer Price Indexes

9. The concepts and methods for compiling CPIs are explained in **Appendix III**.

10. The CPI(C) is based on the expenditure pattern of the second highest 10% households, which had an average monthly expenditure of \$34,000–\$68,700 at 1999 prices. The components and their relative weighting in the CPI(C) are shown in **Appendix IV**.

Explanatory Notes

11. Members may have noted that only figures for the last month of the first HKSAR Legislative Council term were used in the statistics above. While the figures for staff salaries and office rents are not expected to vary significantly from month to month, the same could not be expected of other expenses because they could be cyclical in nature (e.g. publication of newsletters) or effected by the reimbursement ceiling and credit period of other expenses.

12. The figures quoted are based on expenses reimbursed. Expenses which fell outside the reimbursement ceiling are not reflected in the figures.

13. Apparently, some Members have used their own offices without claiming any rent.

14. Although the CPI(C) does not have a separate weight for wages and salaries, these items should have been reflected to a certain extent in the price of the commodities and services.

Advice Sought

15. Members are invited to note the pattern of Members' expenses and consider the reasonableness of adjusting the monthly expenses reimbursement ceiling in accordance with the movement of the CPI(C).

1. 概念及方法

1.1 消費物價指數量度住戶普遍所購買的消費商品及服務的價格水平隨着時間而變動的情況。消費物價指數的按年變動率是廣泛地用作消費者所面對的通貨膨脹的指標。

1.2 由於不同開支範圍的住戶的開支模式各有差別，消費物價上漲對它們有不同的影響。因此，香港編製三項針對不同開支組別的住戶的消費物價指數。甲類消費物價指數是根據約 50% 本港住戶開支模式計算，該等住戶在一九九四至九五年期間的每月平均開支在 4,000 元至 15,999 元之間（以一九九九年價格計算，大約相等於 4,500 元至 18,000 元）。乙類消費物價指數是根據接着的約 30% 本港住戶開支模式計算，該等住戶在一九九四至九五年期間的每月平均開支在 16,000 元至 29,999 元之間（以一九九九年價格計算，大約相等於 18,000 元至 34,000 元）。而丙類消費物價指數是根據再接着的約 10% 本港住戶開支模式計算，該等住戶在一九九四至九五年期間的每月平均開支在 30,000 元至 59,999 元之間（以一九九九年價格計算，大約相等於 34,000 元至 68,700 元）。本港亦根據以上所有住戶的整體消費模式，編製一項綜合消費物價指數。

1.3 丙類消費物價指數前稱為恒生消費物價指數，由恒生銀行自一九七四年起編製。由一九九九年七月的統計月份開始，該指數的數據搜集和編製工作由政府統計處負責，而指數亦改稱為丙類消費物價指數。除了名稱上的統一化，該指數的編製方法及指數數列的連貫性沒有影響。

1. Concepts and methods

1.1 The Consumer Price Index (CPI) measures the changes over time in the price level of consumer commodities and services generally purchased by households. The year-on-year rate of change of the CPI is widely used as an indicator of the inflation affecting consumers.

1.2 As households in different expenditure ranges have different expenditure patterns, the impacts of consumer price inflation on households in different expenditure ranges are different. Hence, three series of CPIs, each referring to households in a different expenditure range, are compiled in Hong Kong. The CPI(A) is based on the expenditure pattern of about 50% of households in Hong Kong, which had an average monthly expenditure of \$4,000-\$15,999 in 1994/95 (broadly equivalent to \$4,500-\$18,000 at 1999 prices). The CPI(B) is based on the expenditure pattern of the next 30% of households, which had an average monthly expenditure of \$16,000-\$29,999 in 1994/95 (broadly equivalent to \$18,000-\$34,000 at 1999 prices). The CPI(C) is based on the expenditure pattern of the further next 10% of households, which had an average monthly expenditure of \$30,000-\$59,999 in 1994/95 (broadly equivalent to \$34,000-\$68,700 at 1999 prices). Based on the expenditure pattern of all the above households taken together, a Composite CPI is also compiled.

1.3 The CPI(C) was formerly known as the Hang Seng CPI and was compiled by Hang Seng Bank since 1974. Starting from the reference month of July 1999, the data collection and compilation work of the index have been taken up by the Census and Statistics Department (C&SD) and the index has been renamed as CPI(C). Apart from being a standardization of titles, the renaming does not affect the compilation methodology nor the continuity of the index series.

1.4 每月的消費物價指數是根據（一）有關住戶的開支模式及（二）當月搜集的價格資料而計算。

1.5 以一九九四／九五年為基期的消費物價指數的開支模式是以一九九四／九五年住戶開支統計調查結果為根據。在編製每項消費物價指數數列時，必須制訂一組權數，以代表住戶所購買的一籃子商品和服務中個別項目的相對重要性（以開支而言）。

1.6 在物價變動資料方面，政府統計處持續地進行一項按月零售物價統計調查，藉此搜集包涵在住戶消費籃子內各項商品及服務的價格變動資料。政府統計處每月在本港各地區不同種類的零售商店（例如超級市場、街市檔位、百貨公司、時裝店）及服務行業商號（例如電影院、醫院、美容院）搜集約共四萬五千個價目。搜集價格資料的方式，主要是採用外勤訪問形式進行，亦有部分以電話查詢或郵遞問卷方式取得。政府統計處的外勤人員平均每月向大約四千間零售商店及服務行業商號進行約一萬多次的外勤訪問和一千三百多次的電話查詢。

1.7 此外，一些主要服務如公共交通、電力及郵遞服務的價格數據，是直接從有關機構搜集或從行政紀錄中獲得。至於私人住宅的租金方面，有關新訂租約、續訂租約及現時租戶的租金資料，是透過一項以私人住宅樓宇租戶為對象的按月抽樣統計調查搜集得來。另一方面，有關公共屋邨租金變動的數據則由香港房屋委員會及香港房屋協會定期提供。

1.4 Monthly CPIs are compiled on the basis of (a) expenditure patterns of relevant households and (b) prices collected currently in the month.

1.5 The expenditure patterns underlying the 1994/95-based CPIs are derived based on the results of the 1994/95 Household Expenditure Survey. A set of weights, which represents the relative importance, in terms of expenditure, of individual items in the basket of goods and services consumed by households is required to be established for compiling each CPI series.

1.6 As regards information on price changes, the C&SD continuously conducts a Monthly Retail Price Survey to capture the price changes of items included in the household consumption basket. The C&SD collects some 45 000 price quotations each month from different types of retail outlets (e.g. supermarkets, market stalls, department stores and fashion shops) and service providers (e.g. cinemas, hospitals and beauty salons) throughout the territory. Price data are collected mainly by field visits and some also through the modes of telephone or postal enquiries. On average, about 10 000 visits and 1 300 telephone calls are made to some 4 000 retail outlets and service providers each month.

1.7 As for principal services such as public transport, electricity and postal services, price data are collected either directly from the providers concerned or obtained from administrative records. Rental data on private housing for new, renewed and continued lettings are collected from a monthly sample survey on private housing renter households. On the other hand, data on rental movements of public housing are regularly provided by the Hong Kong Housing Authority and Hong Kong Housing Society.

1.8 將個別項目的開支權數及其自基期起的價格變動結合起來計算，便可得出整體的價格變動，亦即是消費物價指數的變動率。這個方法等同於將當時的開支與基期時購買同一消費籃子所需的開支作比較。

1.9 將消費物價指數原來數列的按年變動數字和經季節性調整數列的按月變動數字一起研究，有助分析消費物價的最新趨勢。由於經季節性調整的數列已透過統計方法剔除季節性變異，可更有意義地比較相連月份數字。

2. 摘要統計數字

2.1 消費物價指數及其變動率的最新數字列載於下一頁的表甲。

1.8 By applying the item-specific expenditure weights to the price changes for individual items since the base period, the overall price change in terms of percentage change in the CPI can be derived. The procedure is equivalent to comparing the total expenditure required to purchase the same consumption basket in the current period with that in the base period.

1.9 For analysing the latest trend in consumer prices, it is useful to study the year-on-year changes in the original CPI series and the month-to-month changes in the seasonally adjusted series together. In the seasonally adjusted series, seasonal variations have been eliminated by statistical methods, thus enabling figures for consecutive months to be compared more meaningfully.

2. Summary statistics

2.1 The latest available figures for the Consumer Price Indices (CPIs) and their rates of change are summarized in Table A on the next page.
