

For information

LegCo Panel on Environmental Affairs

Consultancies on Environmental Impact Assessment (EIA)

At the meeting of the Environmental Affairs Panel held on 17 October, Members requested Government to provide information on –

- (a) the consultants Government commissioned in the past 10 years to conduct environmental impact assessment (EIA) for government projects, and
- (b) the mechanism and membership of the committees responsible for the selection and assessment of these consultants.

The purpose of this note is to set out the requirements for EIAs and explain how consultants are selected in this field.

Environmental Impact Assessment

2. All major capital works projects, whether of an engineering or building nature, have to complete EIAs prior to commencement. The objectives are to assess the environmental impacts of projects, identifying means of avoiding environmental problems and to design appropriate mitigation measures, if avoidance is not possible.

3. Prior to 1998, the requirements for carrying out EIAs were laid down in a government policy circular. In the absence of enforceable standards, these administrative arrangements were not found to be sufficient in all cases to achieve the objective of protecting the environment in the course of development. Consequently, the EIA Ordinance was enacted in 1997.

4. With the implementation of the EIA Ordinance in 1998, all Designated Projects as defined in the Ordinance require an Environmental Permit for their construction and operation. For those projects having

significant environmental implications, project proponents are required to complete an EIA to the satisfaction of the Environmental Protection Department before an Environmental Permit can be issued.

Procurement options

5. EIAs for Government projects could be conducted by in-house staff or outside consultants. For EIAs estimated to cost less than \$1.3 million, Controlling Officers can arrange for the procurement by inviting quotations. For EIAs costing \$1.3 million or more, Controlling Officers must go through established procurement procedures and seek the approval of the Engineering and Associated Consultant Selection Board (EACSB).

EIA consultancies

6. The Administration identified a total of 177 “stand-alone” environment-related consultancies approved by the EACSB since 1991. The list is attached at **Annex I**. Of these 177 assignments, only 24 were specifically EIA studies. These are highlighted in the Annex.* However, the way in which data has been recorded in the past makes it impossible to identify EIA work carried out within the context of wider studies, short of re-examining all the project files.

7. Having said that, since the EIA Ordinance came into effect in April 1998, we have been compiling a list of consultants commissioned by Government departments / bureau to prepare EIA reports. This is at **Annex II**.

8. In order to ensure that the Government secures value for money in the award of EIA consultancy work, an extensive range of safeguards has been put in place. These are described in the following paragraphs.

* It is, however, likely that EIAs were embedded in some of the other 153 environment-related studies and in other Government capital works programme items, but such embedded EIAs are not identified in the project descriptions.

Transparency in consultant selection and due recognition to quality assessment

9. The Government's procedures for consultant selection are very transparent. If and when a department decides to procure an engineering related consultancy service estimated to cost \$1.3 million or more, it is bound to observe a set of consultant selection procedures which has been formulated in full consultation with the trade, and are accessible by the public through the homepages of the Civil Engineering Department <<http://www.info.gov.hk/ced>>. A summary guide to the government procurement system is also accessible from the Finance Bureau homepage.

10. The EACSB procedures are designed to enable Government to secure the best value for money through consultancy assignments. Typically, a department wanting to procure an engineering study, whether environment-related or not, must first set up an Assessment Panel, chaired by a directorate grade officer of the procuring department and comprises three to five members of senior professionals from various departments, and invite four pages of expressions of interest (EoIs) from all relevant consulting firms. The EoIs are then assessed by the Assessment Panel, having regard to factors like –

- (a) previous relevant experience;
- (b) appreciation of the requirements and an approach to the study;
- (c) knowledge, experience and capability of key staff;
- (d) past performance; and
- (e) quality of sub-consultants, where appropriate.

11. The Assessment Panel normally recommends a short list of about four firms. Subject to EACSB's approval, the shortlisted consultants are invited to submit detailed technical and fee proposals in two separate envelopes.

12. A pre-submission briefing is usually held before the deadline for

submissions to ensure that the shortlisted consultants are fully aware of the study requirements. The opportunity is also taken to clarify any queries and to receive comments relating to the study brief and the assessment criteria. The revised brief taking into account any comments and clarification arising from the briefing is then issued to the shortlisted consultants, together with any amendments to related documents.

13. Before the envelopes enclosing the fee proposals are opened, the Assessment Panel will critically assess the technical proposals against a set of assessment criteria, as approved by EACSB prior to invitation of proposals. The following criteria are normally used but with different weightings for different studies :

- (a) consultancy firm's experience – assess for relevant experience and knowledge;
- (b) consultancy firm's response to the brief – assessment of the consultant's understanding of the objectives and requirements, innovative idea, and its appreciation of the key issues, constraints and relevant special requirements;
- (c) approach to cost-effectiveness – assessment of the consultant's approach to achieve cost-effectiveness on past studies of a similar nature and on the current study;
- (d) proposed methodology and study programme – assessment of the study programme and the proposed approach to ensuring a satisfactory implementation programme; and
- (e) proposed staffing and resources – assessment of the proposed organization of the project team, including sub-consultants lined up for the project, relevant qualifications and experience of the key members of the team, commitment and availability of key members with due regard to any other concurrent assignment, adequacy of professional and technical manpower input, and their knowhow of local practices, etc.

14. Proposals which satisfy the technical aspects will have their fee bids opened and recorded by EACSB before the technical/fee weightings are applied to identify the overall winner. The technical/fee score weightings ratio is normally established with due regard to the study's nature and complexity, again determined prior to invitation of proposals. The more complex and technically demanding the project, the higher the ratio will be. The range of ratios adopted for studies of different nature and complexity is as follows :

- | | | |
|-----|--|---------------------------|
| (a) | Multi-disciplinary consultancy agreements that require special emphasis on technical input | - 80% technical : 20% fee |
| (b) | Less complex consultancy agreements | - 70% technical : 30% fee |
| (c) | Relatively straight forward consultancy agreement | - 60% technical : 40% fee |

15. Having vetted the technical and fee proposals, the Assessment Panel then presents a report to EACSB, usually with a recommendation to appoint the highest combined scorer. As and when the contract is ready for award, the procuring department will present each of the shortlisted firms a summary score sheet setting out how it has been rated in overall quality and price terms vis-a-vis the other shortlisted ones, including the recommended firm.

EACSB vetting

16. The EACSB is chaired by the Director of Civil Engineering and comprises a secretary and two other members from the Works Bureau and Finance Bureau. The Board meets once every two weeks to consider proposals from departments, typically –

- (a) to invite detailed technical and fee proposals from a recommended shortlist of firms;
- (b) to vary the scope of a consultancy assignment; or

- (c) to adjust the fee ceilings for an agreed assignment, etc.

17. The Board examines the detailed justifications from departments and advises as appropriate to ensure that the selection process is above board and fair to all. It is not within the usual remit of the EACSB to question the policy justification for a proposed consultancy. Instead, the Controlling Officers of the departments concerned remain ultimately accountable for justifying the need for a consultancy, seeking policy clearance for such a consultancy if necessary; securing funding for it, whether from the Finance Committee of the Legislative Council or otherwise through delegated authority; and ultimately administering the contract.

Performance monitoring

18. All departments have to compile six-monthly performance appraisals on the consultancies they administer and forward these to EACSB for consideration. In case problems arise, they must warn the firm as appropriate and suggest remedial measures. If a firm has received one adverse report, the department is required to step up monitoring and reporting (on three- rather than six-monthly basis). In case a firm receives three consecutive adverse reports, it will be suspended from bidding for studies vetted by EACSB.

Promoting competition

19. Over 50 firms have been awarded contracts on environment-related consultancies in the past 10 years. There is no evidence to suggest that the market is being monopolized. While consultants are selected in accordance with a set of fair criteria and our key objective is to make sure that the consultancy selected represents the best value for money for the Government, we will continue to remind departments of the need to maintain and enhance competition for environment-related consultancies.

Avoiding conflict of interest

20. The Government is keen to secure quality service through a

rigorous consultant selection procedure. We have provisions to guard against conflict of interest. For instance, all prospective consultants are required, at the EOI stage, to declare any involvement or interest if it is considered by the firm to be in real or apparent conflict with the duties to be performed for the consultancy in question. There are also standard provisions requiring consultants, prior to entering into any agreement, to declare any interest or association they may have with any contractor, specialist contractor or subcontractor, etc. Consulting firms are, of course, bound to observe their own professional codes of conduct.

Disclosure of report

21. For EIA reports submitted under the EIAO, they are placed on the EIAO Register and the EIAO web site and are fully accessible by the public. There is also provision under the EIAO for consulting the public before approval. The consultants as well as the departments concerned are thus fully accountable for the output on each consultancy assignment.

Conclusion

22. The system for the procurement and administration of environment-related consultancies is no different from that for consultancies of other disciplines. The consultant selection system has operated in a transparent, fair and competitive manner, and sufficient safeguards are already in place to ensure that the Government secures value for money in our consultancy assignments. The Administration will continue to regularly review the consultant selection system to make sure that the consultants selected give the Government the best value for money.

Total 1,115

Total Estimated Consultancy Fees = 1,115 million

Legend :

- J - a joint venture agreement
- E - an extension of an agreement
- S - denotes a sub-consultant
- obs - obsolete

Notes :

1. As the EACSB approved agreements are not classified according to disciplines, e.g. environmental, geotechnical engineering etc., a list of environmental consultancy studies cannot be readily extracted from the EACSB databank. The above list has been arrived at based on the judgement of the agreement titles that are believed to be directly related to environmental studies.
2. The Study period is based on the commencement date and latest estimated completion date/actual completion reported by departments.

Engineering and Associated Consultants Selection Board (EACSB)
Environmental Consultancy Agreements Approved by EACSB since 1991 (As at 4.10.2000)

176	CE 23/2000	Additional Study of Waste-to-Energy Facilities (WEF)	FALSE	EPD	2.68
177	CE 64/99	Consultancy for Environmental Monitoring and Audit for Contaminated Mud Pit IV at East of Sha Chau (2000-2005)	FALSE	CED	8.00
				Total	1,115

Total Estimated Consultancy Fees = 1,115 million

Legend :

- J - a joint venture agreement
- E - an extension of an agreement
- S - denotes a sub-consultant
- obs - obsolete

Notes :

1. As the EACSB approved agreements are not classified according to disciplines, e.g. environmental, geotechnical engineering etc., a list of environmental consultancy studies cannot be readily extracted from the EACSB databank. The above list has been arrived at based on the judgement of the agreement titles that are believed to be directly related to environmental studies.
2. The Study period is based on the commencement date and latest estimated completion date/actual completion reported by departments.

Engineering and Associated Consultants Selection Board (EACSB)
Environmental Consultancy Agreements Approved by EACSB since 1991 (As at 4.10.2000)

Serial No	Agreement No.	Agreement Title	Total Fee (\$m)
1	CE 48/88E	Island East Transfer Station (Extension - to include the preparation of contract documents)	0.20
2	CE 78/90	Privatisation of NENT Landfill	11.63
3	CE 79/90	Privatisation of SENT Landfill	21.11
4	CE 77/90	Privatisation of WENT Landfill	15.59
5	CE 55/90	Privatisation of Landfills - Core Consultancy	7.19
6	CE 63/90	North and South Kowloon Sewerage Master Plan Study	11.39
7	CE 75/90	Recycling of Construction Waste Received at Landfills	1.20
8	CE 62/90	Restoration of Urban Landfills Study	13.69
9	CE 74/90	Centralised Incineration Facility for Special Waste (Include Supplementary Agreement)	9.69
10	CE 51/90	Hazard Assessment of Existing Potentially hazardous Installations	0.60
11	CE 10/91J	Chai Wan and Shau Kei Wan Sewerage Master Plan Study	8.50
12	CE 14/91	Sha Tin Transfer Station Study (includes Extension - Design of Access Road to Sha Tin Refuse Transfer Station)	8.30
13	CE 3/91	Consultancy Study on Bacterial Foaming (including Extension No. 1)	2.44
14	CE 34/91	Tuen Mun Sewerage Master Plan Study	9.60
15	CE 25/91	Island West Transfer Station Study	11.93

171	CE 33/99	Road Traffic Impact Assessment, Marine Traffic Impact Assessment and Environmental Study for the Proposed Kwai Chung Public Filling Barging Point	1.38
172	CE 45/99	Extension of Existing Landfills and Identification of Potential New Disposal Sites	3.40

Serial No	Agreement No.	Agreement Title	Total Fee (\$m)
173	CE 1/99	Review of Hong Kong Island Sewerage Master Plans	2.97
174	CE 8/2000J	Review of Strategic Sewage Disposal Scheme	4.90
175	CE 21/2000	Environmental Monitoring and Audit for Penny's Bay Reclamation, Stage 1	2.15
176	CE 23/2000	Additional Study of Waste-to-Energy Facilities (WEF)	2.68
177	CE 64/99	Consultancy for Environmental Monitoring and Audit for Contaminated Mud Pit IV at East of Sha Chau (2000-2005)	8.00

Total 1,115

Total Estimated Consultancy Fees = 1,115 million

Legend :

J - a joint venture agreement

E - an extension of an agreement

S - denotes a sub-consultant

obs - obsolete

Notes :

1. As the EACSB approved agreements are not classified according to disciplines, e.g. environmental, geotechnical engineering etc., a list of environmental consultancy studies cannot be readily extracted from the EACSB databank. The above list has been ar

2. The Study period is based on the commencement date and latest estimated completion date/actual completion reported by departments.

Engineering and Associated Consultants Selection Board (EACSB)
Environmental Consultancy Agreements Approved by EACSB since 1991 (As at 4.10.2000)

Serial No	Agreement No.	Agreement Title	Department	Fee (\$m)
1	CE 48/88E	Island East Transfer Station (Extension - to include the preparation of contract documents)	EPD	0.20
2	CE 78/90	Privatisation of NENT Landfill	EPD	11.63
3	CE 79/90	Privatisation of SENT Landfill	EPD	21.11

176 *	CE 23/2000	Additional Study of Waste-to-Energy Facilities (WEF)	EPD	2.68
177 *	CE 64/99	Consultancy for Environmental Monitoring and Audit for Contaminated Mud Pit IV at East of Sha Chau (2000-2005)	CED	8.00

Total 1,115

Total Estimated Consultancy Fees = 1,115 million

Legend :

J - a joint venture agreement

E - an extension of an agreement

S - denotes a sub-consultant

obs - obsolete

* On going consultancies

Note : As reported by departments concerned and may be subject to variation for on going consultancies.

Standalone Environment-related Consultancy Studies⁺ approved by Engineering and Associated Consultants Selection Board (EACSB) since 1991

1991 年以來獲工程及有關顧問遴選委員會批准的與環境有關的獨立顧問研究

Notes :

+ As the EACSB approved agreements are not classified according to disciplines, e.g. environmental or geotechnical engineering, a list of environmental consultancy studies cannot be readily extracted from the EACSB databank.

The above list covers those consultancies approved by EACSB since 1991 which according to the agreement title are believed to be directly related to environmental studies.

由於經工程及有關顧問遴選委員會所批准的協議並非根據學術分類（例如環境學或土木工程學），故並未能很易地從工程及有關顧問遴選委員會的資料庫中摘錄出環境顧問研究清單。

上述清單包括了由1991年經工程及有關顧問遴選委員會所批准，而根據協議名稱判斷出相信是直接與環境研究有關的研究。

@ Chinese names of consultancy firms are provided where available.

如有資料的話，我們會列出顧問公司的中文名稱。

* On going consultancies as at 4 October 2000.

截至2000年10月4日仍在進行中的顧問研究。

Consultancy studies specifically carrying the words "Environment Impact Assessment" in the Agreement Title.

在協議名稱中載有「環境影響評估」的顧問研究。

Annex II

List of environmental impact assessment reports on Government projects which were submitted for the approval of the Director of Environmental Protection since the commencement of the Environmental Impact Assessment Ordinance in April 1998

Serial No.	Environmental Impact Assessment Report	Consultant Name	Approval Date	Applicant (Subject department)
1.	Tsuen Wan Bay Further Reclamation, Area 35, Tsuen Wan Engineering, Planning and Environmental Investigation	Maunsell Consultants Asia Ltd.	1998	Territory Development Department
2.	Kai Tak Airport North Apron Decommissioning	Maunsell Consultants Asia Ltd.	1998	Territory Development Department
3.	Yuen Long Bypass Floodway - Feasibility Study	Binnie Black & Veatch (HK) Ltd.	1998	Territory Development Department
