

LegCo Panel on Environmental Affairs

**List of issues raised by members
which require follow-up actions by the Administration**

- (1) To include in the comparison table provided by the Green Island Cement Company Ltd (tabled at the meeting) greater details about the thermal desorption method.
- (2) To advise whether the Administration will consider in the tendering exercise for the decommissioning of the Choy Lee Shipyard (CLS), other treatment technologies apart from thermal desorption that are able to meet the requirements under the Environmental Impact Assessment report.
- (3) To advise the nature and toxicity of end-products of the thermal desorption process and details of the decommissioning of the thermal desorption plant after completion of the decontamination work at CLS.
- (4) To provide cases of accidents in the United States arising from transporting residue produced by thermal desorption plants for final-stage treatment.
- (5) To advise the progress of the consultation with the Antiquities Advisory Board on archaeological rescue works at CLS.
