

**Proposed Research Outline:
Education Voucher System**

1. Background

1.1 The Panel on Education at its meeting on 19 March 2001 requested the Research and Library Services Division (RLSD) to conduct a research on education voucher system and its implementation in overseas countries. Owing to resources constraint, RLSD started this project in mid-November 2001.

2. Proposed Countries to be Studied

2.1 The Panel requested that the research should cover the experience of Milwaukee and Cleveland in the United States (US) and other countries in implementing an education voucher system, and some unsuccessful examples. Apart from Milwaukee and Cleveland, RLSD proposes to study the education voucher programmes in Chile, Columbia and the United Kingdom (UK). Chile has a long-standing voucher plan which has not brought about all the desired results as predicted by the proponents of the voucher system. While Columbia launched a voucher programme for secondary schools in the 1990s, the UK terminated a Nursery Education Voucher Scheme around the same time.
