Subject: anti-subversion laws

2002/12/26 04:01 PM

L.S!

With all due respect, I do want to raise my concern about the anti-subversion laws presently underway to enactment. I say this with respect for your long cultural tradition, of which I am a student - persistently trying to raise interest for your country in lectures on intercultural philosophy. It is my conviction that the proposed laws endanger the very values on which Chinese civilization is built. I hope you will honour the many voices of concern coming from Hong Kong people.

Sincerely,
