Progress of implementation of Bus-Bus Interchange (BBI) Schemes

PURPOSE

This paper informs Members of the progress on implementation of bus-bus interchange (BBI) schemes and provides details of the schemes.

EFFORTS IN DEVELOPING BBI SCHEMES

2. To provide passengers with a wider choice of services at concessionary fares and to enhance efficient use of bus resources, the Government encourages franchised bus companies to introduce more BBI schemes taking into account their own operating conditions. Transport Department has been working closely with the bus companies to encourage and facilitate their introduction of new BBI schemes. Where necessary, we will initiate modification work at bus bays and improve the queuing spaces for passengers at the major BBI locations.

PROGRESS OF IMPLEMENTATION

3. With these continued efforts, the number of BBI schemes increased from 9 in 2000 to 98 as at end February 2003, and the number of bus routes providing BBI arrangement increased from 68 to 343 during the same period. They include schemes implemented by the same operator as well as those involving routes of different operators. Details of the existing BBI schemes are at **Annex A** for information.

Annex A

4. The bus companies also have plans to introduce another 41 BBI schemes involving some routes which are already providing BBI arrangement and also about 30 additional routes. Details of these schemes are in **Annex B** for information. These new schemes are planned for implementation within the next 12 months subject to consultation with the relevant District Councils.

Annex B

5. We will continue to encourage the bus companies to develop more BBI schemes taking into account relevant factors including public views and the operating environment of individual bus companies.
