Animals and Plants (Protection of Endangered Species) Ordinance
(Cap. 187)

ANIMALS AND PLANTS (PROTECTION OF ENDANGERED SPECIES) (EXEMPTION) (AMENDMENT) ORDER 2004

ANIMALS AND PLANTS (PROTECTION OF ENDANGERED SPECIES) ORDINANCE (AMENDMENT OF SCHEDULES) NOTICE 2004

INTRODUCTION

A
At the meeting of the Executive Council on 13 January 2004, the Council ADVISED and the Chief Executive ORDERED that the Animals and Plants (Protection of Endangered Species) (Exemption) (Amendment) Order 2004 (the Amendment Order), at Annex A, should be made under section 18 of the Animals and Plants (Protection of Endangered Species) Ordinance (the Ordinance) to exempt the possession or control of certain scheduled species from the licensing requirement under section 6 of the Ordinance.

B
2. At the same time, the Secretary for the Environment, Transport and Works has made the Animals and Plants (Protection of Endangered Species) Ordinance (Amendment of Schedules) Notice 2004 (the Notice), at Annex B, under section 19(1A) of the Ordinance to amend Schedules 1 and 3 and the Sixth Schedule to the Ordinance mainly to bring more species under the control of the Ordinance.

JUSTIFICATIONS

3. The Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES), which has been extended to Hong Kong since 1976, aims to regulate international trade in endangered species to protect wildlife from over exploitation/extinction. It requires that the

import and export of the species listed in its appendices including their readily recognizable parts and derivatives be subject to licensing controls. The Parties to CITES meet every two years to, among other things, review and amend, the controlled species listed in its appendices if necessary.

4. The Ordinance gives effect to CITES in Hong Kong. The endangered species including their parts and derivatives which are listed in the Appendices to CITES are specified in the Schedules to the Ordinance. The Ordinance provides that, except those with exemptions, a licence issued by the Director of Agriculture, Fisheries and Conservation is required for the import, export or possession of all scheduled species. Some control measures, especially in respect of import of scheduled species other than the highly endangered species and possession of all scheduled species, are in excess of CITES requirements. They were drawn up for the purpose of combating smuggling. Under Section 18 of the Ordinance, the Chief Executive may, by order published in the Gazette, exempt any scheduled species from the licensing requirements. The Animals and Plants (Protection of Endangered Species) (Exemption) Order (Cap.187 sub. leg. A) (“the Exemption Order”) has been made for this purpose. Over the years, a number of exemptions have been made in respect of the “excessive” local controls to cope with public demand and actual operational needs. Changes to the Schedules to the Ordinance and the Exemption Order are regularly made following the revisions of the list of controlled species of CITES. The last similar exercise was conducted in 2001.

5. In November 2002, the parties to CITES reviewed and amended the species listed in the Appendices to CITES. To implement these changes, we need to revise the Schedules to the Ordinance through a Notice made by the Secretary for the Environment, Transport and Works under section 19(1A) of the Ordinance.

6. We propose to amend the Exemption Order concurrently to exempt from the licensing requirement the possession or control under section 6 of the Ordinance of the species listed below, which are considered less endangered -

- (a) *Rhincodon typus* (Whale Shark);
- (b) *Cetorhinus maximus* (Basking Shark);
- (c) *Hippocampus* species (Seahorses) (excluding live animals);
and
- (d) *Swietenia macrophylla* (Bigleaf Mahogany).

The proposed exemptions will facilitate legitimate trade in those species without compromising Hong Kong's obligations under CITES.

THE NOTICE

C
7. The Notice amends Schedules 1 and 3 and the Sixth Schedule to the Ordinance to reflect the amendments made to the Appendices to CITES at the 12th Conference of the Parties meeting held in November 2002. The provisions to be amended are at Annex C.

THE AMENDMENT ORDER

D
8. The Amendment Order extends the list of species, the possession or control of which is exempted from the licensing requirements in the Ordinance by including therein the species set out in paragraph 6 above. The provisions to be amended are at Annex D.

LEGISLATIVE TIMETABLE

9. The legislative timetable will be -

Publication in the Gazette	21 January 2004
Tabling at the Legislative Council	4 February 2004

IMPLICATIONS OF THE PROPOSALS

E
10. The economic implications of the proposals are set out at Annex E. The proposals are in conformity with the Basic Law, including the provisions concerning human rights. They have no financial, civil service, productivity or environmental implications, and have no significant sustainability implications.

11. The Notice and the Amendment Order do not affect the current binding effect of the Ordinance or its subsidiary legislation.

PUBLIC CONSULTATION

12. We have consulted the Endangered Species Advisory Committee and the Endangered Species Protection Liaison Group. Representatives of the trades concerned, viz. traditional Chinese medicines (TCM) traders

and practitioners, bird traders, turtle traders, timber traders, plant traders and dried food and marine product (including shark fin) traders have also been consulted. They in general have no objection to the changes to be made to the list of controlled species on the understanding that they are required under CITES and that trade in the species will still be allowed with valid licences. They welcome the proposed exemptions as this will facilitate trade in the species concerned.

PUBLICITY

13. The Notice and the Amendment Order will be published in the Gazette on 21 January 2004. A press release will be issued on 19 January 2004 and a spokesman will be available to handle enquires.

ENQUIRY

14. Any enquiry of this brief should be directed to Ms Jessie WONG, Principal Assistant Secretary (Environment and Transport) on telephone 2136 3288 or fax 2136 3321.

Implications of the Proposal

Economic Implications

The changes to be made to the list of controlled species under the Ordinance are not expected to have any appreciable effect on the trade, as trade in most of the species concerned will still be allowed with valid licences. The proposed exemptions will render greater operational convenience to traders of the species concerned and facilitate the trade.
