**Attn.: Ms. Sarah Yuen**

Dear Ms. Yuen,

**Construction Industry Council (No.2) Bill**

I am writing in my capacity as Chairman of the Provisional Construction Industry Co-ordination Board (PCICB) in response to your call for public submissions on the Construction Industry Council (No.2) Bill (the Bill) being scrutinized by the Legislative Council (LegCo).

Establishment of the Construction Industry Council (CIC) features prominently among the 109 recommendations made by the Construction Industry Review Committee (CIRC) and is backed by overwhelming support from the industry. To this end, PCICB has played its part by drawing up a draft legal framework for submission to the Government after conducting an extensive industry consultation exercise and has formally endorsed the draft Bill which is now before LegCo.

There are, however, a number of points I would like to bring to your attention:

1. The need for a flexible structure to be able to adapt to future changes in the industry was considered to be of paramount importance by the Board. This is an underlying philosophy to the draft legislation and we trust that the Bills Committee will review the Bill in this light.
2. Although there is a general consensus on the overriding need for CIC, I am also aware there are diverging views on its statutory powers. These were thoroughly debated in the formulation of the draft legal framework and the PCICB firmly believe that the present mix of powers as proposed in the Bill are essential for CIC to effectively discharge its proposed role as an umbrella organisation for the construction industry in Hong Kong. Whilst the notion of adding specific provisions to the Bill to control various industry practices such as subcontracting and wage payments might seem superficially attractive, I would strongly advise against this course of action which may create many legal complications, impose unnecessary restrictions and create uncertainty in enforcement. It is essential for the industry itself, under the guidance of the CIC, to address this problem squarely, but this cannot be done by restrictive formulations.

3. On the question of the composition of CIC, this was again thoroughly debated by PCICB itself before finally confirming the clearly preferred choice of the flexible model based on appointees serving in their personal capacities. We acknowledge the appealing simplicity of a prescriptive approach whereby professional bodies and trade associations are allowed to nominate their own candidates, and are aware that some bodies are advocating this course; however, we believe that this formulaic approach is not in the overall interest of the industry as it automatically requires many other industry related organisations to be excluded from participation, narrows down the scope of representation and indeed does not necessarily ensure the appropriate energy and enthusiasm required of future CIC members. By way of illustration I am attaching a list of 59 organisations which are related to the field of property development and construction.

That said, it is acknowledged that it may be worthwhile exploring the flexibility of providing for a systematic method of consultation before appointments are confirmed although this is probably best avoided within the necessary strictures of legislation.

4. Finally, an amalgamation between CIC and the Construction Industry Training Authority (CITA) is intended to subsume the levying mechanism and statutory functions of the latter under a new institutional arrangement. There is every intention to achieve a smooth transition with minimum disruption to the governance structure of CITA or employment conditions of its serving staff.

Over the past three years, PCICB has continually tried to tackle various long-standing problems in the industry and achieved notable progress on a few major fronts, as summarised in the information paper provided to the Bills Committee. An early passage of the Bill will provide us with a clear mandate to expand our work beyond the current ambit and contribute more substantially towards raising the competitiveness of the local construction industry.

I look forward to presenting my views in person to the Bills Committee at its meeting on 2<sup>nd</sup> December, 2004.

Yours sincerely,

Keith Kerr  
Chairman  
Provisional Construction Industry Co-ordination Board

Encl.
