

Dear Sirs/Madam,

Regarding the anti-smoking issue, I want to express my opinion, is there any channel for citizens to use?

Or is it ok for me to just write down my opinion here?

I know the government and legislative council are talking about the smoke ban in public areas, I am one of the victim sitting in the office. I wonder if there are a lot of objections from entertainment places but not from office, why the government has to carry out the policy until next year but not this year, I just want to suggest, is it possible to carry out the smoking ban in office areas first, because many of us has tolerated the second hand smoke for a long time, and I really look forward to hearing good news from the Government and legislative council. The delay of policy will only harm more and more people, I mean the passive smoker.

Please let me know how I can send the message. I would be very grateful if you could send my opinion to the related department.

Thank you for your attention.

Yours faithfully,

cat
