Head: 147 Government Secretariat: Subhead(No. & 000 Operational expenses  
Financial Services and the title):  
Treasury Bureau (The Treasury  
Branch)

Programme:

Controlling Officer: Permanent Secretary for Financial Services and the Treasury (Treasury)

Director of Bureau: Secretary for Financial Services and the Treasury

Question :

Please provide the main reasons for the increase in allowances, Mandatory Provident Fund contribution and general department expenses under Operational Expenses.

Asked by: Hon. CHAN Kam-lam

Reply:

The provisions for allowances and Mandatory Provident Fund (MPF) contribution for 2005-06 are higher than the revised estimate for 2004-05 mainly due to the increase in the estimated expenditure on acting allowance and the increase in the number of staff required to make MPF contributions respectively.

The provision for general departmental expenses for 2005-06 is \$5.7 million higher than the revised estimate for 2004-05. The major factor contributing to the increase is the requirement for public consultation on matters relating to Goods and Services Tax, involving an estimated \$4.8 million.

0584

Head: 147 Government Secretariat: Subhead(No. & 000 Operational expenses  
Financial Services and the title):  
Treasury Bureau (The Treasury  
Branch)

Programme:

Controlling Officer: Permanent Secretary for Financial Services and the Treasury (Treasury)

Director of Bureau: Secretary for Financial Services and the Treasury

Question :

Under the details of expenditure, it is stated that the operational expenses for 2005-06 have an increase of \$28,807,000 (21.7%) over that for 2004-05. This is mainly due to: (i) the adjusted provision for appointment of financial consultants; (ii) requirement for public consultation on matters relating to Goods and Services Tax (GST); and (iii) salary increments for existing staff.

Please advise:

- (1) What is the breakdown of the provisions for items (i) to (iii)? What are the changes when compared with the provisions for 2004-05?
- (2) How will the provision for item (ii) be used?
- (3) Is the provision for item (ii) for one year only or will provision be still required for this item in the future?
- (4) Under the item of other charges, the estimated provision for the appointment of financial consultants surges by 189% from the revised estimate of \$14,240,000 for 2004-05 to \$41,245,000 for 2005-06. Please advise the details for this expenditure. Which companies have been appointed as financial consultants? Have these companies provided services for the Hong Kong Government before? What services have they provided?
- (5) As regards question (4), what criteria does the Treasury Branch adopt in selecting financial consultants?
- (6) As regards the salary increments for existing staff, the civil service is still subject to a pay cut in the year. Why does the Treasury Branch have salary increments? What is the number of staff involved? What are their ranks and extent of increments?

Asked by: Hon. FANG Kang, Vincent

Reply:

(1) The provision for appointment of financial consultants in 2005-06 is \$41,245,000 which is \$27,005,000 higher than the revised estimate for 2004-05. The provision for public consultation on matters relating to GST in 2005-06 is \$4,800,000 and there was no such requirement in 2004-05. The additional provision for increment for existing staff in 2005-06 is about \$810,000.

(2) A provision of \$4,800,000 has been earmarked for consulting the public on whether Hong Kong should and how best to implement a GST. A breakdown on the estimates is shown below:

	<u>\$'000</u>
(a) printing of consultation materials	3,500
(b) production of Announcements in the Public Interest	300
(c) other publicity work, such as briefings/fora on GST	<u>1,000</u>
	4,800

(3) The provision for item (ii) is for one year only. We anticipate that there is no need to seek such a provision in the year after.

(4) The details of the financial consultancies in 2005-06 are set out below. All the consultants referred to have previously provided financial advisory services to the Government –

<b>Name of consultants</b>	<b>Description of consultancy services</b>	<b>Estimated terms of appointment</b>	<b>Estimated provision for 2005-06 \$'000</b>
UBS AG	Feasibility study of the proposed privatisation of Airport Authority	Five months <sup>1</sup>	2,000
HSBC & Citigroup	Feasibility study of Merger of Mass Transit Railway Corporation Limited and Kowloon-Canton Railway Corporation	Four months <sup>1</sup>	450
KPMG Tax Limited	Consultancy study on GST	Three months <sup>1</sup>	4,095
To be appointed	Financial advisory services in relation to –  (a) implementation of the asset disposal and securitisation programme  (b) others	  Ranges between six and 18 months  To be decided	  24,700  10,000

		Total:	41,245
--	--	--------	--------

*Note 1: Residual term in 2005-06.*

- (5) Financial consultants are selected in accordance with the requirements set out in the Stores and Procurement Regulations. Due regard is given to both technical aspects (e.g. experience of the consultants and the proposed approach for the assignment) and the fee proposals submitted.
- (6) The salary provision for 2005-06 of this branch is \$3,980,000 lower than the revised estimate for 2004-05. This is mainly due to the full-year effect of the 2005 civil service pay cut, partly offset by annual salary increments for existing staff. Civil servants are remunerated on approved pay scales with annual salary increments until they reach the maximum pay point of their scales. This pay mechanism applies to all civil servants.

Head: 147 Government Secretariat: Financial Services and the Treasury Bureau (The Treasury Branch)

Subhead (No. & title):

Programme: (2) Revenue and Financial Control

Controlling Officer: Permanent Secretary for Financial Services and the Treasury (Treasury)

Director of Bureau: Secretary for Financial Services and the Treasury

Question:

Regarding the "Matters Requiring Special Attention in 2005-06" under Programme (2) Revenue and Financial Control, please advise:

- (1) For broadening the tax base and increasing revenue, does the Government plan to study other revenue options besides a study on the implementation of a Goods and Services Tax ?  
If yes, what will be the contents of the plan and will findings of the study be made public ?  
If no, what are the reasons ?

Asked by: Hon. FANG Kang, Vincent

Reply:

The Advisory Committee on New Broad-based Taxes advised the Government in 2002 that a Goods and Services Tax (GST) would help broaden our tax base and therefore be worth further study. The Government recognizes that GST is a viable option to broaden the tax base and has conducted a detailed study on the implementation of a GST in Hong Kong. We are not conducting studies on any other new tax items at present, in order to focus on the introduction of GST.

The Government will continue to manage our public finances prudently, keep expenditure within the limits of revenues and strive to achieve a fiscal balance. We will keep our fiscal position under review and consider measures, including tax measures, where necessary and as appropriate, in order to achieve this purpose.

Controlling Officer: Permanent Secretary for Financial Services and the Treasury (Treasury)

Director of Bureau: Secretary for Financial Services and the Treasury

Question :

Regarding the "Matters requiring special attention in 2005-06" under Programme (2): Revenue and Financial Control, please advise:

On maintaining a low, simple and predictable tax regime, has the Treasury Branch conducted any survey to seek the businesses' views on the existing tax regime? If yes, what are the survey findings? If no, will such survey be conducted this year? Will the survey be conducted together with other projects? How much resources will be involved?

Asked by: Hon. FANG Kang, Vincent

Reply:

Hong Kong achieves a very high ranking in the taxation aspect of economic freedom surveys on a regular basis. The Government does not need to incur any expenses insofar as these surveys are concerned.

The Government, and in particular the responsible bureaux and departments (including Financial Services and the Treasury Bureau and Inland Revenue Department), maintain close contacts with the chambers of commerce, professional bodies and tax representatives through various consultative fora/channels. General feedback from representatives of the business community and the industry is that Hong Kong's tax regime is simple, low and fair, and that the system remains very competitive on the whole as compared with many other tax jurisdictions. It is not possible to account separately for such liaison work.

Question :

Regarding the "Matters requiring special attention in 2005-06" under Programme (2):  
Revenue and Financial Control, please advise:

Concerning the Asset Sale and Securitisation Programme, has financial provision been allocated for it in this year? If yes, what is the amount of provision and what are the items about? Are there any changes compared with 2004-05? If no, does this mean that there is no plan to implement this Programme this year?

Asked by : Hon. FANG Kang, Vincent

Reply :

A provision of around \$27 million has been earmarked in 2005-06 for the appointment of financial consultants in relation to the asset sale and securitisation programme. The provision is \$19 million higher than the revised estimate for 2004-05. With the assistance of financial consultants, we will mainly continue to study the feasibility of the proposed privatisation of the Airport Authority and the merger of Mass Transit Railway Corporation Limited with the Kowloon-Canton Railway Corporation. We will also examine other proposals in relation to the implementation of the asset disposal and securitisation programme in due course.

Director of Bureau : Secretary for Financial Services and the Treasury

Question :

Is the emolument of civil servants one of the expenditure items in the "operating expenditure envelope" of the various departments? Will the Administration consider excluding the payroll costs from the envelope?

Asked by : Hon. KWONG Chi-kin

Reply :

Personal emoluments for civil servants are included in the Operating Expenditure (OPEX) envelopes provided to Directors of Bureaux.

Under the OPEX envelope approach, Directors of Bureaux may deploy resources amongst various expenditure heads, subheads and components according to his/her policy priorities. Personal emoluments for civil servants account for over 20% of Government's OPEX. Excluding these provisions from the OPEX envelopes would reduce the incentive for Directors of Bureaux to optimize all resources under their purview.

1714

Head : 147 Government Secretariat : Subhead (No. & title) :  
Financial Services and  
the Treasury Bureau  
(The Treasury Branch)

Programme : 3 Service Departments

Controlling Officer : Permanent Secretary for Financial Services and  
the Treasury (Treasury)

Director of Bureau : Secretary for Financial Services and the Treasury

Question :

1. What is the proportion of the Treasury Branch's procurement services in overall government procurement services requirement?
2. In 2004-05, how many government procurement contracts were put up for open tender due to their meeting the thresholds of government procurement agreements? What are the project(s), price and name(s) of successful tenderer(s) involved for each contract? What are the proportions of local and overseas companies among the successful tenderers?
3. In 2004-05, how many government procurement contracts were not put up for open tender due to their not meeting the thresholds of government procurement agreements? What are the project(s), price and name(s) of successful tenderer(s) involved for each contract? What are the proportions of local and overseas companies among the successful tenderers?

Asked by : Hon. KWONG Chi-kin

Reply :

1. The Treasury Branch (TsyB) exercises policy responsibility for government procurement and tendering and has the overall responsibility for ensuring that all government procurement activities are conducted according to the established regulations and procurement principles of fairness, openness, value for money and public accountability. While the TsyB is responsible for formulating, reviewing and implementing the policy on government procurement and tendering, the TsyB does not provide procurement services on behalf of individual user departments.

2. For goods or services contracts with a value exceeding \$1,300,000 or works contracts with a value exceeding \$3,000,000, procuring departments have to conduct procurement through tender procedures based on the tendering principles of open and fair competition, transparency and value for money. All qualified suppliers, including local and overseas companies, may submit a tender and the result of the tender exercise will be published in the Gazette. The Administration does not have information on whether the successful tenderers are local or overseas companies. In 2004-05, a total of 528 contracts have been awarded on the approval of the relevant tender boards. Details are in the Annex.
3. In accordance with the existing government procurement regulations, for any purchase of goods and services contracts with a value not exceeding \$1,300,000 and works contracts with a value not exceeding \$3,000,000, user departments can arrange direct purchase of goods and services without recourse to tender. In arranging for such direct purchases, departments have to adhere to the fundamental procurement principles of openness, fairness, value for money, and public accountability and will not take into account whether the suppliers are local or overseas companies. Hence the Administration does not have information on whether the successful contractors are local or overseas companies. The Administration does not have readily available information on purchases of construction services of a value below \$3,000,000. In 2004, the Government arranged a total number of 241 571 purchases of goods and services (other than construction services) each of a value below \$1,300,000. The total value of these purchases is \$3,047 million. Given the very large number of these low value purchases, the Administration does not think it is appropriate to list each and every purchase in this reply.

Signature \_\_\_\_\_

Name in block letters ALAN N LAI

Post Title Permanent Secretary for Financial  
Services and the Treasury (Treasury)

Date 4 April 2005

Programme:                 (2)     Revenue and Financial Control

Controlling Officer: Permanent Secretary for Financial Services and the Treasury (Treasury)

Director of Bureau: Secretary for Financial Services and the Treasury

Question :

Apart from studies on the introduction of a Goods and Services Tax, are there any other aspects of taxation being studied by the Government to broaden the tax base ?

Asked by: Hon. LEUNG Kwan-yuen, Andrew

Reply:

The Advisory Committee on New Broad-based Taxes advised the Government in 2002 that a Goods and Services Tax (GST) would help broaden our tax base and therefore be worth further study. The Government recognizes that GST is a viable option to broaden the tax base and has conducted a detailed study on the implementation of a GST in Hong Kong. We are not conducting studies on any other new tax items at present.

The Government will continue to manage our public finances prudently, keep expenditure within the limits of revenues and strive to achieve a fiscal balance. We will keep our fiscal position under review and consider measures, including tax measures, where necessary and as appropriate, in order to achieve this purpose.

Programme : (2) Revenue and Financial Control

Controlling Officer : Permanent Secretary for Financial Services and the Treasury  
(Treasury)

Director of Bureau : Secretary for Financial Services and the Treasury

Question :

The Government has been committed to keeping public expenditure at or below 20% of GDP. Please provide details of the amount of savings achieved with the implementation of control measures in 2004-05, and their distribution in various policy areas.

Asked by : Hon. LEUNG Kwan-yuen, Andrew

Reply :

Total public expenditure in 2004-05 is forecast to be \$265.3 billion (equivalent to 20.7% of GDP). Compared with the 2003-04 actual expenditure of \$271.1 billion (equivalent to 22.2% of GDP), the revised estimate for 2004-05 reflects a \$5.8 billion reduction. This comprises –

- (a) a reduction in expenditure of other public bodies (mainly the Housing Authority) of \$5.6 billion,
- (b) savings in recurrent government expenditure of \$1.4 billion, offset by
- (c) increase in government capital expenditure of \$1.2 billion.

The savings in recurrent government expenditure were attributable to the various control measures taken by the Government (including the payout in January 2004 and 2005) and the joint efforts of bureaux and departments. Their distribution amongst different policy area groups is as follows –

	<b>Increase/(Decrease) in 2004-05 Revised Estimates from 2003-04 Actual</b>
	<b>(\$ billion)</b>
Education	(0.9)
Social Welfare	0.2
Health	(1.5)

Question :

Regarding the major investment and loan proposals to be considered by the Government, what kind of projects will be included? What is the estimated provision for each project?

Asked by : Hon. LEUNG Kwan-yuen, Andrew

Reply :

Investment and loan proposals are funded by the Capital Investment Fund (CIF) and Loan Fund (LF) as appropriate in accordance with the Legislative Council's resolutions for establishment of the respective funds. As a general rule, only those investment proposals which aim to meet an important policy objective and are able to generate adequate income to cover costs and pay a reasonable return on Government's investment will be considered for CIF funding. LF finances developments in respect of statutory bodies or other organisations delivering public services, concessionary loan schemes for specified groups and relief from financial hardship in compliance with policy objectives or under special circumstances. Neither CIF nor LF are intended to compete with private sector financial institutions. They are considered as alternatives when commercial facilities are not available, appropriate or cost-effective. As such proposals for 2005-06 and onwards have yet to be considered, no expenditure can be forecast. However by way of illustration, ongoing projects and schemes under the CIF and LF will incur spending of \$5.8b and \$3.3b respectively in 2005-06.

All proposals must be themselves financially viable and individual commitments of CIF and LF are subject to the approval of the Finance Committee of the Legislative Council.

Question :

In 2005-06, the Government will continue to make regular revisions of fees and charges for government services. What types of fees and charges are expected to be included and what will be the expenses involved?

Asked by : Hon. LEUNG Kwan-yuen, Andrew

Reply :

It is the Government's general policy to set fees and charges at levels sufficient to recover the full costs of providing the services. In line with this policy, the Government has put forward proposals to the relevant LegCo Panels in the past few months to adjust some fees and charges that do not directly affect people's livelihood or general business activities. Examples of proposed revisions in 2005-06 include: fees for construction noise permit, collection and disposal charges for marine pollution waste discharged by merchant ships, charges for use of community halls/centres, licence fees for hotel/guesthouse, and fees for licences related to entertainment special effects, etc. These proposed revisions include both fee increases and fee reductions.

In the coming months, the Government will continue to formulate other fee revision proposals in accordance with the "user pays" principle.

Fees and charges review is part of the on-going administrative activities of the concerned bureaux and departments. Expenses so arising are absorbed by the existing allocations.

Question :

In respect of the Administration's study on the introduction of a Goods and Services Tax (GST), what is the cost of the various consultancy reports in and before 2004-05? Please list in detail the cost of various consultancy studies, the name of the consultants, the scope of study, the bid price of other companies at the tender and the time required for the entire study. What is the cost of consulting the public on the introduction of GST? Please list in detail the various expenses of the consultation exercise.

Asked by : Hon. LEUNG Kwan-yuen, Andrew

Reply :

In April 2004, at our request, the International Monetary Fund (IMF) sent a study mission team to Hong Kong to advise on the broad policy issues that have to be considered in implementing a GST in Hong Kong. This service was provided free of charge by IMF and hence no cost was incurred on our side.

Separately, we have appointed KPMG Tax Limited as our adviser for the GST work for the period from late September 2004 to June 2005. Its main duty is to assist the Government in its study on all policy and administration issues for formulating a GST framework for Hong Kong. The total value of the contract is \$10 million. The consultancy fees in 2004-05 and 2005-06 are around \$6 million and \$4 million respectively. Regarding the bid price of the other companies, no disclosure can be made as the information is provided by the tenderers to the Government in a confidential manner.

We will consult the public in 2005-06 on whether Hong Kong should and how best to implement a Goods and Services Tax. A provision of \$4.8 million has been earmarked for the purpose. A breakdown of the estimates is shown below :

(a)	printing of consultation materials	\$3.5M
(b)	production of Announcements in the Public Interest	\$0.3M
(c)	other publicity work, such as briefings/fora on GST	\$1.0M
		<hr/>
		\$4.8M

Question :

The Financial Secretary states in his Budget speech that an internal committee has been set up to carry out the Goods and Services Tax Study. What amount will be spent on this issue/study in the financial year 2005-06?

Asked by : Hon. SHEK Lai-him, Abraham

Reply :

We have appointed a financial consultant to assist the internal committee in its study on the Goods and Services Tax implementation. The consultancy fee in 2005-06 is around \$4 million. In addition, a provision of \$4.8 million has been earmarked in 2005-06 for consulting the public on matters relating to the Goods and Services Tax.

Director of Bureau : Secretary for Financial Services and the Treasury

Question :

Based on experience after the reunification, the Government always over-estimates the operating expenditure for the following year (see Table 1). Taking 1998-99 as an example, the Government's actual operating expenditure for that year only accounts for 90% of the estimates. In fact, the Government's operating expenditure is on a downtrend. Please elaborate:

- (1) What are the criteria adopted by the Government for determining the medium range forecast of operating expenditure for the following five years?
- (2) For the forecasts of the operating expenditure for 2005-06, what are the Government's forecasts of inflation for the following years? If the Government expects that there will be inflation in future, what will be the inflation rate? What will be the impact of inflation on operating expenditure?
- (3) The Government has planned to reduce operating expenditure by \$8 billion from now on to 2008-09. Please list the items, policy areas or departments to be involved in the reduction of operating expenditure as well as the amount of savings in operating expenditure each year for each item, so as to achieve the \$8 billion savings target.

Asked by : Hon. SIN Chung-kai

Reply :

- (1) The operating expenditure in the Medium Range Forecast (MRF) basically follows the guidelines laid down by the Financial Secretary in his 2004 Budget, with a view to achieving the fiscal target of reducing operating expenditure to \$200 billion by 2008-09. Having reviewed the actual operational needs, we have reduced the estimated operating expenditure for 2005-06 by \$2.6 billion, from the \$210.6 billion guideline set in the 2004 Budget to \$208 billion.

- (2) We expect that inflation will remain modest with the Composite Consumer Price Index (CCPI) forecast to increase by 1.5% in 2005. The provisions included in the 2005-06 draft estimates should be adequate to absorb the additional expenditure that may arise from inflation. As for the period from 2006 to 2009, the trend rate of increase in CCPI is assumed to be 3.0% p.a. We do not have any assessment of the exact impact of inflation on operating expenditure for these years because –
- (a) we have yet to decide on the allocation of operating expenditure resources amongst various departments, policy areas and expenditure components; and
  - (b) different expenditure components are subject to different price adjustment factors and mechanisms. For example, a significant part of the operating expenditure is related to personal emoluments, which are subject to the review of the civil service pay adjustments mechanism.
- (3) The operating expenditure guidelines are working assumptions to bring the operating expenditure down to \$200 billion in 2008-09 in a gradual pace. The \$208 billion estimated operating expenditure for 2005-06 reflects the austerity drive by government departments. We expect that the civil service establishment will be further reduced by about 2 700 posts in 2005-06 to 163 300 by March 2006. We will continue to contain government expenditure and spend where necessary.

We will review the guidelines each year in the course of Budget preparation, and will consider making adjustments, having regard to factors such as services quality, community needs, price fluctuations, economic development and the fiscal position of the Government.

Head: 147 Government Secretariat: Subhead (No. & title):  
Financial Services and the  
Treasury Bureau (The  
Treasury Branch)

Programme: 2 Revenue and Financial Control

Controlling  
Officer: Permanent Secretary for Financial Services and the Treasury (Treasury)

Director of  
Bureau: Secretary for Financial Services and the Treasury

Question:

1. What are the annual expenses incurred by the Treasury Branch in preparing the forecasts of operating revenues in the past three years? Please provide a breakdown in this respect.

(Note): According to the information provided by the Government, the estimated operating revenues for 2004-05 and 2005-06 are HK\$ 175.6 b and HK\$ 181.4 b respectively, representing an increase of 2.8%.

Asked by: Hon. SIN Chung-kai

Reply:

Preparation of the estimates on revenues is one of the many tasks undertaken by the staff involved in Programme (2): Revenue and Financial Control. We cannot provide a breakdown, but the expenses incurred in this respect should represent only a small part of the relevant provision.

000 Operational expenses

Programme:

Controlling Officer: Permanent Secretary for Financial Services and the Treasury (Treasury)

Director of Bureau: Secretary for Financial Services and the Treasury

Question :

Why is the "general departmental expenses" of the Branch in 2005-06 over 40% higher than the revised estimate for 2004-05? Please list all the underlying factors and the respective expenses involved. If the increase is related to the employment of contract staff, please give an account of the related staffing, reasons for employment of contract staff and the expenses involved.

Asked by: Hon. SIN Chung-kai

Reply:

The provision for general departmental expenses for 2005-06 is \$5.7 million higher than the revised estimate for 2004-05. The major factor contributing to the increase is the requirement for public consultation on matters relating to Goods and Services Tax and the amount involved is \$4.8 million.

Programme : (2) Revenue and Financial Control

Controlling Officer : Permanent Secretary for Financial Services and the Treasury (Treasury)

Director of Bureau : Secretary for Financial Services and the Treasury

Question :

How much resources have been set aside for the consultation exercise on the introduction of a Goods and Services Tax and the study on a broader tax base? What are the implementation details?

Asked by : Hon. TIEN Pei-chun, James

Reply :

The Treasury Branch of this Bureau has set up an internal committee to prepare for the Goods and Services Tax consultation and implementation. To assist with its work, a financial consultant has been appointed to provide expert advice to the Government on the policy and administration issues in relation to Goods and Services Tax implementation. The consultancy fee in 2005-06 is around \$4 million. In addition, a provision of \$4.8 million has been earmarked in 2005-06 for consulting the public on matters relating to the Goods and Services Tax. We do not expect to implement the Goods and Services Tax before 2008-09. There is no specific study planned for other revenue options at this stage.

Programme: (2) Revenue and Financial Control

Controlling Officer: Permanent Secretary for Financial Services and the Treasury (Treasury)

Director of Bureau: Secretary for Financial Services and the Treasury

Question :

The provision under this programme for 2005-06 is 27.8% higher than that for 2004-05. Please explain in detail the various reasons and the expenditure involved.

Asked by: Hon. TIEN Pei-chun, James

Reply:

The provision for 2005-06 under the programme Revenue and Financial Control is \$31.8 million (27.8%) higher than the revised estimate for 2004-05. The major factors contributing to the increase are:

	Difference between Revised estimate for 2004-05 and Estimate for 2005-06 \$M
Increased requirement for appointment of financial consultants	27.0
Public consultation exercise on Goods and Services Tax	4.8
Increased requirement for air passenger departure tax administration fees	1.7

Such increase is partly offset by the full-year effect of the 2005 civil service pay cut and of deletion of posts in 2004-05.

Director of Bureau: Secretary for Financial Services and the Treasury

Question :

It is mentioned in Programme (2) that the Administration will “promote value for money in the delivery of government services”, how many outsourcing service projects in total were promoted by government departments in 2004? What were the total number of staff engaged in outsourcing services? What was the expenditure incurred in outsourcing?

Asked by: Hon. WONG Kwok-hing

Reply:

Under the existing financial management framework, bureaux and departments are given the flexibility to manage their own resources, re-prioritise, re-organise and re-engineer their own work. As part of Government's continual economy drive, they may implement necessary measures, including outsourcing of services to ensure effective use of public money. Individual controlling officers are responsible for ensuring value for money in the use of resources under their heads.

Question Serial No.

Programme :

0105

Controlling Officer : Permanent Secretary for Financial Services and the Treasury  
(Treasury)

Director of Bureau : Secretary for Financial Services and the Treasury

Question :

No. 6

Under the Capital Works Reserve Fund, the interest and other expenses on bonds & notes issued are estimated to be \$852,811,000 in 2005-06, which almost doubles that for 2004-05.

- (a) Please provide a breakdown of the interest & other expenses on bonds & notes respectively  
(b) What account(s) for the significant increase?

Asked by : Hon. SHEK Lai-him, Abraham

Reply :

The provision for "Interest and Other Expenses on Bonds and Notes issued" for 2004-05 comprises around \$441.5 million for interest payments and \$0.5 million for other related expenses, while the provision for 2005-06 comprises around \$852.5 million for interest payments and \$0.5 million for other related expenses. The increase is attributable to the fact that there would be two half-yearly interest payments for the notes and bonds in 2005-06 while there was only one in 2004-05 (with the notes and bonds issued in July 2004).

Director of Bureau : Secretary for Financial Services and the Treasury

Question : Please indicate the projects that will be carried out in Kwun Tong and Wong Tai Sin districts respectively under Subhead 3100GX "Project feasibility studies, minor investigations and consultants' fees for items in Category D of the Public Works Programme" and 3101GX "Minor building works for items in Category D of the Public Works Programme".

Asked by : Hon. LI Wah-ming, Fred

Reply : (a) The following projects in Kwun Tong and Wong Tai Sin Districts are included in the 2005-06 Estimate under Subhead 3100GX "Project feasibility studies, minor investigations and consultants' fees for items in Category D of the Public Works Programme" -

Kwun Tong District

- (i) Minor investigations / consultancy fees for two primary schools near Choi Wan Road and Jordan Valley, Kwun Tong.
- (ii) Consultancy fees for a primary school at Hiu Kwong Street, Sau Mau Ping.
- (iii) Consultancy fees for reprovisioning of Society of Boys' Centre Shing Tak School, New Clear Water Bay Road.

- (iv) Consultancy fees for general improvement works to Ngau Tau Kok Market and Cooked Food Centre.
- (v) Consultancy fees for improvement to Lok Wah Playground, Kwun Tong.

Wong Tai Sin District

- (i) Consultancy fees for additional columbarium at Diamond Hill.
- (ii) Consultancy fees for reprovisioning of Diamond Hill Crematorium.
- (iii) Consultancy fees for general improvement works to Ngau Chi Wan Market and Cooked Food Centre.
- (iv) Consultancy fees for Hammer Hill Road District Park.

(b) Up to now, two projects in Kwun Tong and Wong Tai Sin Districts have been submitted by the project proponent departments for funding approval under Subhead 3101GX "Minor building works for items in Category D of the Public Works Programme" in 2005-06, viz -

- (i) Construction of cover for the spectator stand of the amphitheatre at Morse Park.
- (ii) Conversion of Lion Rock Holding Nursery into a tree depot.

Head : 28 Civil Aviation Department Subhead (No. & title) : 000 Operational expenses

Programme : (6) Air Passenger Departure Tax Administration

Controlling Officer : Director-General of Civil Aviation

Director of Bureau : Secretary for Financial Services and the Treasury

Question : In dealing with the application for refund received by post, the department's target is to process it within 35 working days. In order to ensure faster processing time, is there any plan to improve efficiency? If yes, what are the additional resources required, if any ?

Asked by : Hon. YOUNG Howard

Reply : At present, the majority of refund applications come from sea-to-air passengers arriving at the airport through the Sky Pier. In order to ensure faster processing of Air Passenger Departure Tax (APDT) refunds, a refund counter is due to be set up at the Sky Pier in April 2005 to make on-the-spot refunds of APDT to sea-to-air passengers. The arrangements for the refund counter will be coordinated by the Airport Authority. No additional resources for the department will be required.

Head : 31 Customs and Excise Department      Subhead (No. & title) :

Programme : (4) Revenue Protection and Collection

Controlling Officer : Commissioner of Customs and Excise

Director of Bureau : Secretary for Financial Services and the Treasury

Question :

Please provide details of the expenditure and staffing incurred by the charging of duties on alcoholic beverages in accordance with the ad valorem structure in 2003-04 and 2004-05.

Asked by : Hon. EU Yuet-mee, Audrey

Reply :

The Customs and Excise Department administers a licence and permit system to control the manufacture, import, export, storage and movement of dutiable commodities. Duty is collected on all dutiable commodities upon their release for local consumption.

Currently, of the four dutiable commodities, only alcoholic beverages are subject to ad valorem (AV) duties. Expenditure including staff resources in 2003-04 and 2004-05 for charging duty on alcoholic beverages under the AV structure is tabulated below -

<b>Financial Year</b>	<b>No. of Staff Involved</b>	<b>Expenditure (HK\$)</b>
2003-04	11	4.161 million
2004-05	11	4.202 million

It is not possible to break down the above manpower and financial resources further into categories of liquor subject to different AV duty rates as the staff concerned deal with all types of liquor and no separate information has been kept. The above figures do not include the other expenditure and staffing for processing applications for duty payment and ancillary tasks, which need to be done no matter whether the duty system is an AV one or otherwise. These figures only reflect the expenditure on the tasks relating specifically to the AV system, which include, for example, pre-clearance vetting and post-clearance verification of declared dutiable values.

Head : 31 Customs and Excise Department Subhead (No. & title) :

Programme : (1) Control and Enforcement

Controlling Officer : Commissioner of Customs and Excise

Director of Bureau : Secretary for Financial Services and the Treasury / Secretary for Security / Secretary for Commerce, Industry and Technology

Question : What are the reasons for the upsurge in the number of persons compounded for offences relating to illicit cigarettes in 2004? Among the compounding cases, what are the manpower and expenditure involved in their investigations and arrest, etc?

Asked by : Hon. LAU Kong-wah

Reply :

The Dutiable Commodities Ordinance empowers the Commissioner of Customs and Excise to compound a person (i.e. impose an administrative monetary penalty on offenders of offences contained in Schedule 3 to the Ordinance in lieu of prosecuting them in Court) if the person has failed to declare or made a false or incomplete declaration on the dutiable goods he/she possesses in excess of the duty-free quantities allowed. The number of persons compounded in 2004 at 2 569 has increased substantially over 2003 (by 91%). This is mainly a result of the department's stepped-up measures to enhance the enforcement against the abuse of duty-free concessions by passengers at the control points. Such enforcement measures include –

- (a) establishing a Special Duties Unit in September 2002 to monitor and conduct checks on passengers suspected to have brought in dutiable commodities in excess of the duty-free quantities allowed and without making declarations to Customs;
- (b) linking computer workstations with the Immigration Department at various control points to verify whether an incoming Hong Kong resident had spent 24 hours or more outside Hong Kong in order to be eligible for duty-free concessions; and
- (c) strengthening our intelligence exchange and mounting joint operations with the Mainland Customs to detect cases of abuses at both ends.

The Special Duties Unit mentioned under (a) above is a dedicated team to combat abuses of the duty-free concessions at the control points. The team comprises 13 officers with a salary provision of \$2.9 million per annum. The other Customs officers at the control points, amongst their other duties, continue to undertake control and enforcement actions to protect revenue.

Head : 51 Government Property Agency

Subhead (No. & title) : 000 Operational expenses

Programme :

Controlling Officer : Government Property Administrator

Director of Bureau : Secretary for Financial Services and the Treasury

Question : Please explain the reasons why the estimated expenditure for leasing and management of quarters under Personnel Related Expenses is \$266m for 2005-06, an increase of 29.5% and 13.8% for 2003-04 and 2004-05 respectively.

Asked by : Hon. CHAN Kam-lam

Reply : The increase in estimated expenditure for 2005-06 is mainly to cater for the cost of managing about 4 300 newly acquired Home Ownership Scheme flats for use as departmental quarters, and for more planned major renovation works for Financial Secretary Incorporated-owned properties in a number of private developments. The extent of such works may vary from year to year depending on the decision of the Owners' Incorporation/ Owners' Committee of the respective development.

6 April 2005

Head : 51 Government Property Agency

Subhead (No. & title) : 000 Operational expenses

Programme :

Controlling Officer : Government Property Administrator

Director of Bureau : Secretary for Financial Services and the Treasury

Question : What are the reasons for the estimated increase of various expenditure items under Departmental Expenses, except "Specialist supplies and equipment"?

Asked by : Hon. CHAN Kam-lam

Reply : The increase of \$16 million in the estimates for "Light and power" is to allow for possible tariff increase for electricity, electricity consumption for four additional working days in 2005-06 and possible increase in demand for electricity consumption in Agency-managed buildings.

The increase of \$3.8 million in the estimates for "Hire of services and professional fees" is mainly to cater for possible increase in management cost under the new property management contract to be awarded through public tender in 2005.

The increase of \$8 million in the estimates for "Workshop services" is mainly to provide for the maintenance of additional electrical and mechanical installations (such as fire services installations and pumping and drainage systems) in the newly acquired Home Ownership Scheme flats for use as departmental quarters and other plants and equipment upon the ending of warranties.

The increase of \$2.38 million in the estimates for "General departmental expenses" is mainly to cater for –

- (i) anticipated increase in advertising costs for commercial lettings due to the need to conduct more tendering exercises in 2005;
- (ii) the employment of two new contract staff : one is to handle tenancy management mainly relating to repairs and decoration works in respect of the temporary leasing-out of surplus quarters. The other is to undertake ad hoc projects relating to the review of internal procedures and control mechanisms;
- (iii) the need to match market rates for contract staff employed to undertake leasing and related duties in respect of temporary leasing-out of surplus quarters; and

- (iv) the procurement of a new plotter to replace the existing one which is beyond economical repair.

**CONTROLLING OFFICER'S REPLY TO  
INITIAL WRITTEN QUESTION**

Head : 51 Government Property Agency

Subhead (No. & title) : 000 Operational expenses

Programme :

Controlling Officer : Government Property Administrator

Director of Bureau : Secretary for Financial Services and the Treasury

Question : In May 2004, the Government stipulated that the wages offered to non-skilled workers by contractors of government outsourced services should not be lower than the market average, and the working hours should not be higher than the market average. Has the Government assessed the implications of the implementation of the above measures on Agency's operational expenses? If so, please provide the details.

Asked by : Hon. LEE Cheuk-yan

Reply : Property management services contracts of the Agency are lump sum outcome-based contracts. As the contractors are not required to specify the number of staff they deploy and the lump sum bids usually reflect the culmination of a number of factors, it is not possible to assess in isolation the financial implications of applying the above mentioned requirements to these contracts.

INITIAL WRITTEN QUESTION**

Head : 51 Government Property Agency

Subhead (No. & title) :

Programme : (2) Property Management

Controlling Officer : Government Property Administrator

Director of Bureau : Secretary for Financial Services and the Treasury

Question : With reference to Programme (2), please provide the respective staff establishment of the following categories of officers :

1. pensionable officers;
2. agreement officers;
3. non-civil service contract staff; and
4. staff engaged under outsourcing service contracts

Asked by : Hon. LEUNG Yiu-chung

Reply : The respective staff establishment of the following categories of officers under Programme (2) Property Management as at 31 March 2005 is estimated to be :

1. pensionable officers : 64
2. agreement officers : 1
3. non-civil service contract staff : 0
4. staff engaged under outsourcing service contracts : Under the property management services contracts which are outcome-based contracts, the contractors are not required to specify the number of staff they deploy. However, according to information from the contractors, they currently employ a total of about 2 200 staff, mostly security guards and cleaners, in providing property management services to the Agency.

Head : 51 Government Property Agency

Subhead (No. & title) :

Programme : (2) Property Management

Controlling Officer : Government Property Administrator

Director of Bureau : Secretary for Financial Services and the Treasury

Question : The average management cost of government wholly-owned quarters (\$/m<sup>2</sup>/month) is estimated to be \$7.8 in 2005-06.

- (i) Is the level of the management cost set according to market prices? If yes, please provide details. If not, why?
- (ii) Will the management cost be adjusted in line with the rise in price index?

Asked by : Hon. SHEK Lai-him, Abraham

Reply : (i) The average management cost of government wholly-owned quarters is estimated to be \$7.8/m<sup>2</sup>/month in 2005. The management cost covers electricity charges of common areas and cleaning, security and building management services provided under the property management services contracts. The latter is awarded through public tender and reflects market prices at the time.

- (ii) Yes, there is specific provision in the property management services contracts for upward or downward adjustment of the management cost annually in line with the movement of the composite consumer price index.

Subhead (No. & title) :

Programme : (3) Estate Utilisation

Controlling Officer : Government Property Administrator

Director of Bureau : Secretary for Financial Services and the Treasury

Question : According to the estimates of 2005-06, the targeted let out rate of surplus non-departmental quarters with tenure of two years or more is 80%. Is there any plan to increase the let out rate for the purpose of achieving a higher let out rate? If yes, what is the plan? If no, why?

Asked by : Hon. SHEK Lai-him, Abraham

Reply : In estimating the target let out rate, the Agency would take into account the void period between tenancies including time for repair and renovation of units, time for marketing, etc. For 2005, we expect that about 60 more surplus non-departmental quarters will be passed to the Agency for letting. Hence, notwithstanding the higher actual let out rate achieved in 2004, we have set the target let out rate at 80%.

That said, the Agency, as always, will work to let out as many units as possible. To this end, we will continue to review rental regularly to ensure competitiveness of the units in the leasing market. We will also maintain close liaison with Architectural Services Department to ensure that any required repair or renovation is done promptly. Success in actual letting of surplus quarters is however also dependent on demand and supply of similar flats in the leasing market.

Question Serial No.

0555

Head : 51 Government Property Agency

Subhead (No. & title) : 000 Operational expenses

Programme :

Controlling Officer : Government Property Administrator

Director of Bureau : Secretary for Financial Services and the Treasury

Question : Why is the "General Departmental Expenses" of the department for 2005-06 higher than the revised estimates for 2004-05 by more than 40%? Please list each and every factor and the expenses incurred. If the growth is related to the appointment of contract staff, please state the staffing involved, the reasons for the appointment of contract staff and the expenses incurred.

Asked by : Hon. SIN Chung-kai

Reply : The increase of \$2.38 million in the provision for "General departmental expenses" in the 2005-06 estimates is mainly to cater for –

- (i) anticipated increase in advertising costs for commercial lettings due to the need to conduct more tendering exercises in 2005 (\$1.2 million);
- (ii) the employment of two new contract staff (\$0.96 million) : one is to handle tenancy management mainly relating to repairs and decoration works in respect of the temporary leasing-out of surplus quarters. The other is to undertake ad hoc projects relating to the review of internal procedures and control mechanisms;
- (iii) the need to match market rates for contract staff employed to undertake leasing and related duties in respect of temporary leasing-out of surplus quarters (\$0.11 million); and

- (iv) the procurement of a new plotter to replace the existing one which is beyond economical repair (\$0.11 million).

Subhead (No. & title) :

Programme : (3) Estate Utilisation

Controlling Officer : Government Property Administrator

Director of Bureau : Secretary for Financial Services and the Treasury

Question : Regarding the matter that the Government will “identify government properties with commercialisation potential with a view to realising that potential, where appropriate” in 2005-06, what is the specific work plan? What is the expenditure involved?

Asked by : Hon. TIEN Pei-chun, James

Reply : The Agency will continue to explore commercial opportunities at government premises. These will include lettings of canteens, advertising spaces, shops, cafes/restaurants/kiosks, surplus non-departmental quarters and carparking spaces in government buildings after office hours. The total number of lettings in 2005 is estimated to be over 1 100 with potential revenue of about \$461 million.

In 2005, expenditure related to commercialisation activities is estimated to be \$28 million.

1185

Head: 59 - Government Logistics  
Department

Subhead(No. &  
title):

Programme: (2) Supplies Management

Controlling Officer: Director of Government Logistics

Director of Bureau: Secretary for Financial Services and the Treasury

Question:

1. During the previous two years, there is a significant decrease in the purchase of common-user items under the indicator "the value of purchase of general stores". Please provide details on how the Department can significantly reduce the purchase of these items.
2. There is also a continued decrease in the purchase of essential and emergency items under the indicator "the value of purchase of general stores". What is the reason? Is the reason similar to that of the reduction in the purchase of common-users items?

Asked by: Hon. CHAN Kam-lam

Reply:

1. The purchase value of common-user items has decreased significantly in the previous two years because we have modernised our procurement and stockholding practices as follows:
  - (a) Adoption of "Just-in-time" methodology for the supply of common-user items to user departments. Allocated term contracts for common-user items have been arranged so that user departments can place orders directly with the contractors on an "as and when required" basis with direct delivery of the goods to them by the contractors.
  - (b) Adoption of zero inventory management for common-user items. Only essential and emergency items are maintained in our centralised warehouse in Chai Wan for use by user departments.
2. The value of purchase for essential and emergency items was \$12.5 million in 2004 because of purchases made in connection with the preventive measures for the outbreak of Severe Acute Respiratory Syndrome, Avian Flu and Japanese Encephalitis. Based on the user departments' forecast requirements, the purchase value of these items is estimated to be \$5 million in 2005.

Question:

There will be deletions of 28, eight and seven posts under the programmes of Supplies Management, Land Transport and Printing Services respectively in the coming year. Please provide a breakdown of the post titles and the main duties of these posts, the reasons for the deletions and the savings expected to be realised in the coming year.

Asked by: Hon. CHAN Kam-lam

Reply:

The 28 posts to be deleted under the programme of Supplies Management comprise two Senior Supplies Supervisors, four Supplies Supervisors I, eight Supplies Supervisors II, five Supplies Assistants, one Supplies Attendant, one Artisan, one Ganger, three Workmen II and three Property Attendants. The main duties of these posts include supplies chain management, store operation, data processing, minor manual work and security support to storehouse.

The eight posts to be deleted under the programme of Land Transport comprise two Chauffeurs, one Special Driver, four Motor Drivers and one Driving Instructor. These posts are involved in providing driving service, driving instruction and test.

The seven posts to be deleted under the programme of Printing Services comprise six Printing Technicians II and one Workman II. The main duties of these posts include the operation of printing machines and minor manual work in the process of printing production.

Deletion of the 43 posts is to achieve efficiency savings. In terms of notional annual mid-point salary, it will bring about savings of \$7.1 million in 2005-06.

Head: 59 -Government Logistics  
Department

Subhead(No. & title): 691 General purpose  
vehicles (block vote)

Programme: (3) Land Transport

Controlling Officer: Director of Government Logistics

Director of Bureau: Secretary for Financial Services and the Treasury

Question:

1. There is a significant increase in the numbers of vehicles to be replaced in the estimate as compared with the previous two years. What are the reasons? Please provide a breakdown by departments, types and purposes of these vehicles. What will be the total expenditure for the replacement? Will they be charged to the provision of \$90,000,000 under Subhead General purpose vehicles (block vote)? If not, what will be the funding source for the balance?
2. Furthermore, how does Government determine the depreciation rates and schedule for replacement of government vehicles?

Asked by: Hon. CHAN Kam-lam

Reply:

1. The increase in the number of replacement vehicles is mainly due to the cyclical nature of the vehicle replacement programme. The vehicles included are entirely for replacement of the existing ones which have all reached the end of their serviceable life on the basis of the Economic Life Model (ELM) that takes into account accumulated maintenance cost, vehicle age, mileage and replacement cost. The information about the types, user departments and usages of the vehicles to be replaced is provided at the Annex. The provision for replacement vehicles will be charged to the General purpose vehicles block vote subhead.
2. Depreciation rates of government vehicles vary considerably with their usage, mileage coverage, nature of load, and areas of operation, etc. Thus, the replacement need of a vehicle is assessed on the basis of ELM, which takes into account accumulated maintenance cost, vehicle age, mileage run and the cost of a new vehicle in determining the optimal time of replacing a vehicle.

Programme: (4) Printing Services

Controlling Officer: Director of Government Logistics

Director of Bureau: Secretary for Financial Services and the Treasury

Question:

1. Please provide specific details on how the fitting-out works in the printing factory for reducing the floor areas from six storeys to four storeys achieve efficiency savings.
2. What is the estimated amount required for the fitting-out work?

Asked by: Hon. CHAN Kam-lam

Reply:

1. The project involves merging the security printing floor with the other printing/finishing shopfloors, rationalisation of use of floor space and disposal of machines and equipment which are at the end of their economic life and costly to maintain. These measures will allow us to reduce the operating space from 6 storeys (10,883 m<sup>2</sup>) to 4 storeys (7,527 m<sup>2</sup>). As a result, the following annual recurrent savings can be achieved :-

	Total (\$million)
(a) Management and maintenance costs	4.76
(b) Machine maintenance and other operating cost	0.28
	<hr/>
Total estimated cash savings :	5.04

2. The one-off capital cost for the fitting-out works is \$7.4 million.

Question:

Please provide information as listed below concerning the adoption of the policy of purchasing environmentally-friendly products this year by all government departments:

- (a) Is there any additional provision allocated by the Department for this purpose?
- (b) Are there any guidelines and indicators for the purchase of each environmentally-friendly product?

Asked by: Hon. EU Yuet-mee, Audrey

Reply:

- (a) From experience, the adoption of environmentally-friendly specifications for purchase of commonly available items does not necessarily lead to significantly higher prices. Hence, no additional provision is made for this purpose.
- (b) On the purchase of environmentally-friendly products, the Stores and Procurement Regulations of the Government stipulates that when drawing up tender specifications, departments should avoid single-use disposal items and where economically rational, purchase products with improved recyclability, higher recycled content, reduced packing, greater durability, etc.

In addition, the Government Logistics Department (GLD) is accredited to the ISO14001 Environmental Standard and is committed to the 4R principles (reduce, reuse, recycle and recover) at each phase of the material life-cycle whereby procurement activities can be more environmentally responsible. GLD also regularly issues circular memo encouraging bureaux/departments to follow the same practices.

Question:

It is stated under this programme that there will be “the replacement of diesel light buses progressively with those driven by liquefied petroleum gas (LPG)” by the Government. Please provide information as listed below:

- (a) Please make a comparison of the cost of purchasing LPG light buses and diesel light buses.
- (b) What are the numbers of LPG light buses and diesel light buses in the government fleet?
- (c) How to implement the progressive replacement of diesel light buses by LPG light buses?

Asked by: Hon. EU Yuet-mee, Audrey

Reply:

- (a) We last procured diesel light buses in 2000 and the tender price was \$283,600 per vehicle excluding the first registration tax (FRT). As for LPG light buses, the last tender exercise was conducted in 2003 and the tender price was \$264,000 per vehicle excluding FRT. According to the latest market survey, the estimated cost of an LPG light bus is \$344,390, excluding FRT. This is about 2% lower than that of a diesel light bus at about \$352,000.
- (b) At present, there are 339 light buses in the government fleet, of which 119 (35%) are LPG and 220 (65%) are diesel vehicles.

- (c) Arrangements will be made to replace all 220 diesel light buses by LPG ones when they are due for replacement on the basis of the Economic Life Model which takes into account accumulated maintenance cost, vehicle age, mileage and replacement cost. The anticipated replacement schedule is as follows:

2005-06	2006-07	2007-08	2008-09	2009-10	2010-11	Total
36	13	38	64	55	14	220

In the meantime, all diesel light buses in the government fleet are using ultra-low sulphur diesel, which helps improve the emission of the vehicles.

Question:

In an effort to downsize the government fleet, the Government has launched a taxi hiring scheme some years ago. Please provide information as listed below:

- (a) Please provide a breakdown of the number of taxi hiring and the expenditure by all bureaux /departments in the past three years.
- (b) Which department hires taxis most frequently and why?
- (c) Which department hires taxis least frequently and why?
- (d) Has the Administration assessed whether the Government spends less expenditure on the taxi-hiring scheme than providing departmental vehicles for individual department? If so, how much expenditure has been saved?
- (e) Has the Administration made an evaluation on whether the scheme has effectively contributed to the downsizing of government fleet?
- (f) Is the Administration satisfied with the effectiveness of the scheme?

Asked by: Hon. LAM Kin-fung, Jeffrey

Reply:

The Taxi Hiring Scheme was launched in February 2003. It aims at providing an alternative mode of commercial transport to supplement the existing transport provision for duty travel by government officers having regard to operational efficiency and cost-effectiveness.

- (a) A breakdown of the number of taxi hiring and the expenditure incurred by all bureaux/departments since the scheme was launched is at ***Annex A***.

(b)&(c) The hiring of hourly rated taxis is decided by individual bureau/department based on its actual operational needs and assessment of the cost-effectiveness of using such taxis in comparison with other modes of hired or public transport. Since the scheme was launched, the Transport Department has used hourly-rated taxis the most frequently. On the other hand, there were other departments which had no operational requirement for their use.

(d)&(e) Hourly-hired taxis are intended primarily for supplementing departmental transport in meeting ad hoc passenger transport requirements. The introduction of the Taxi Hiring Scheme has enabled the withdrawal of ten medium saloon cars in the Government Logistics Department's transport pool, which served similar purposes, and resulted in an annual savings of \$2.13M in staff salaries and departmental operating expenses.

(f) Yes, we consider that the Taxi Hiring Scheme has achieved the purpose of providing a cost-effective alternative mode of commercial transport for hire by bureaux/departments.

0464

Head: 59 - Government Logistics  
Department

Subhead(No. & title):

Programme: (4) Printing Services

Controlling Officer: Director of Government Logistics

Director of Bureau: Secretary for Financial Services and the Treasury

Question:

Concerning the printing services, please specify the recycled paper used by the Government Logistics Department as a percentage of the total cost of the printing services. Will there be increase use of recycled paper in 2005-06? If so, what is the indicator?

Asked by: Hon. LEUNG Kwan-yuen, Andrew

Reply:

In 2004-05, paper cost as a whole accounted for about 19.5% of the total cost of the printing services. 10.5% of the paper used was paper with recycled content.

As an ISO 14001 Environmental Management Systems accredited organisation, the Printing Division of the Government Logistics Department is conscious of the need to adopt environmental friendly measures, including the use of paper with recycled content and has always been encouraging client departments to do the same. However, whether paper with recycled content can actually be used for a particular print job depends largely on the nature and purpose of the print product in question which ultimately determine the type of paper to be used.

Director of Bureau: Secretary for Financial Services and the Treasury

Question:

Dr LIAO Sau-tung, Sarah, the Secretary for the Environment, Transport and Works, has stated in public that there would be an increased use of environmentally-friendly products in all government departments in future. The Government Logistics Department is responsible for the supply of stores to all government departments, does the Department expect an increase or a decrease in the purchase value of more environmentally-friendly products in 2005-06? What is the percentage of change?

Asked by: Hon. LEUNG Kwan-yuen, Andrew

Reply:

As the procurement agent for government bureaux/departments, the Government Logistics Department (GLD) endeavours to promote environmentally responsible purchases and continuously encourages bureaux/departments to use environmentally-friendly products by incorporating green specifications where appropriate in their requirements. GLD also draws to the attention of user bureaux/departments the Stores and Procurement Regulations of the Government which stipulate that when drawing up tender specifications, they should avoid single-use disposal items and should purchase products with improved recyclability, higher recycled content, reduced packing, greater durability, etc.

However, whether there is going to be an increase or decrease in the purchase value of 'green' products in 2005-06 will very much depend on the actual quantities and types of products required by the user bureaux/departments throughout the year and the market availability of environmentally-friendly products for such kinds of commodities.

Programme: (2) Supplies Management

Controlling Officer: Director of Government Logistics

Director of Bureau: Secretary for Financial Services and the Treasury

Question:

The financial provision for 2005-06 (Estimate) is \$85.7 million or -28.0% on 2004-05 Original. Can you provide a detailed breakdown of the reduction of financial provision in terms of the various services provided by the department?

Asked by: Hon. SHEK Lai-him, Abraham

Reply:

The breakdown of the reduction of financial provision is as follows :

Supplies Management Services	Reduction of financial provision \$m
Supply of common-user items	26.7
Assisting other government departments to manage their supplies effectively	6.7
	33.4 (i.e. 28.0% of the 2004-05 Original Estimate)

We have modernised our procurement and stockholding practices with: -

- (a) the arrangement of allocated term contracts for the supply of common-user items whereby user departments place orders directly with the contractors on an "as and when required" basis with direct delivery of the goods to them by the contractors; and
- (b) the adoption of zero inventory management for common-user items. Only essential and emergency items are maintained in our centralised warehouse in Chai Wan for use by user departments.

As a result of the new stocking policy, the Government Logistics Department (GLD) is able to downsize the warehouse management and computer operations for common-user items with savings in staff cost and departmental expenses.

The new stocking policy is also applicable to user departments. It leads to a reduction in the workload of the Supplies Management Division of GLD in respect of the stock control, administration and verification of the common-user items stored and managed by user departments.

Head: 59 - Government Logistics  
Department

Subhead(No. & title):

Programme: (1) Procurement

Controlling Officer: Director of Government Logistics

Director of Bureau: Secretary for Financial Services and the Treasury

Question:

There was a significant decrease in the actual value of contracts and number of contracts handled (a decrease of 35% and 20% respectively) by the Department in 2004 as compared with 2003. Furthermore, the estimated number of contracts for purchases and the value of contracts are also significantly decreased in 2005 as compared with 2003. As there is a significant decrease in the number of contracts for purchases, why the decrease in estimate for this programme is less than 5% as compared with 2003-04?

Asked by: Hon. SIN Chung-kai

Reply:

Although it is of relevance, the financial provision for Programme (1) Procurement is not determined solely by the "value and number of contracts handled" by the Government Logistics Department (GLD) on behalf of user bureaux/departments. The funding is provided for meeting the GLD's operational expenses in the discharge of its procurement functions. These activities involve not only the arrangement of tenders and award of contracts on behalf of other user bureaux/departments but also, equally importantly, subsequent administration of the contracts including, for example, the monitoring of contractors' performance, and following up on contract disputes and claims as necessary. Since many of the contracts awarded were for more than one year, adequate resources have to be allocated to ensure that they are administered properly and fulfilled satisfactorily.

Controlling Officer: Director of Government Logistics

Director of Bureau: Secretary for Financial Services and the Treasury

Question:

The Department will replace 612 vehicles in 2005-06, an increase of 25% as compared with 484 vehicles in 2004. What is the reason for the rapid increase?

- (1) What is the percentage of these vehicles in terms of total vehicles currently managed by the Department?
- (2) Please categorise these 612 vehicles by user departments with breakdown by types, age and reasons for replacement and the expected expenditure involved.

Asked by: Hon. SIN Chung-kai

Reply:

The increase in the number of replacement vehicles is mainly due to the cyclical nature of the vehicle replacement programme. The vehicles included are entirely for replacement of the existing ones which have all reached the end of their serviceable life based on the assessment of the Economic Life Model which takes into account accumulated maintenance cost, vehicle age, mileage and replacement cost.

- (1) The 612 vehicles account for 9.3% of the government fleet of 6,592 vehicles;
- (2) All the 612 vehicles are required for replacing those existing vehicles which have reached the end of their serviceable life. Annex A provides a breakdown of existing vehicles to be replaced by type and age. Annex B shows the breakdown of user departments and usages of the vehicles. The estimated expenditure involved is \$90M.

Head: 59 - Government Logistics  
Department

Subhead(No. &  
title):

Programme: (4) Printing Services

Controlling Officer: Director of Government Logistics

Director of Bureau: Secretary for Financial Services and the Treasury

Question:

- (1) What is the percentage of the printing services provided by the Department in terms of the overall printing services required by the Government?
- (2) Does the Government Logistics Department outsource any printing services? If yes, what is the reason? Please specify the outsourced printing services as a percentage of the Department's printing services.
- (3) If there are outsourced printing services, please specify the types of printed materials that are outsourced.
- (4) What is the value of each contract awarded for outsourced printing services in 2004 financial year?

Asked by: Hon. WONG Kwok-hing

Reply:

1. 92% of the overall printing services required by the Government in 2004-05 were provided by the Government Logistics Department (GLD). The remaining 8% was procured by bureaux/departments under direct printing authority given by the GLD.
2. GLD's printing jobs are mostly performed in-house when manpower and machine resources allow. We would only procure from private sector printing services which we cannot undertake due to technical (no equipment) or capacity reasons (unavoidable clash of schedule). Outsourced printing services take up about 15.5% of the total cost of GLD's printing services.
3. Outsourced printing services include, for example, the production of envelopes, hard file jackets, hardcover book, provision of lamination service, on-site film assembly and miscellaneous finishing work such as embossing, die-cutting, UV vanishing, foil blocking, index cutting, engraving, silk screen printing, book binding, spiral binding etc.

- In 2004-05, about 1 200 print orders involving a wide range of printing services were outsourced. The total cost incurred was \$33.3 million. The value involved varied significantly from \$400 for the making of 400 envelopes to \$864,000 for the printing of 2.4 million multi-pack address packs. It would not be practicable to list out each outsourced contract because of the volume of details involved.

Subhead (No. & title) :

Programme :

Controlling Officer : Commissioner of Inland Revenue

Director of Bureau : Secretary for Financial Services and the Treasury

Question : In relation to the deletion of 32 posts in total in the Inland Revenue Department in 2005-06, please account for the names of posts to be deleted, reasons of the deletion and the savings in expenditure achieved in the year.

Asked by : Hon. CHAN Kam-lam

Reply : In 2005-06, through streamlining procedures and re-engineering work processes and wider use of information technology, the Department will be able to delete 36 posts. These include 1 Senior Assistant Assessor, 6 Taxation Officers, 6 Assistant Taxation Officers, 1 Chief Tax Inspector, 1 Senior Tax Inspector, 2 Tax Inspectors I, 2 Tax Inspectors II, 3 Assistant Clerical Officers, 5 Clerical Assistants, 2 Office Assistants, 1 Senior Typist, 5 Typists and 1 Data Preparation Supervisor. These will be partly offset by the creation of 4 posts, including 1 Chief Systems Manager and 3 Assistant Assessors, bringing the overall net deletion to 32 posts in 2005-06.

The net deletion of 32 posts will enable the Department to achieve savings of \$6.163 million in personal emoluments in 2005-06.

Subhead (No. & title) :

Question Serial No.

Programme : (3) Investigation and Field Audit

1614

Controlling Officer : Commissioner of Inland Revenue

Director of Bureau : Secretary for Financial Services and the Treasury

Question:

According to newspaper reports, the Inland Revenue Department estimated that the tax recoverable in this financial year would be \$2.8 billion, representing a substantial increase of 38% over the original estimate of \$2.05 billion. The increase is mainly due to the strengthening of efforts against the tax avoidance schemes of large enterprises.

Please advise:

1. Whether the reports are true? If yes, whether the original estimate of \$2.1 billion in the "back tax and penalty assessed" under Field audit and tax investigation will be revised to \$2.8 billion next year?
2. On the computation of the above estimated figures.
3. Whether the combat against tax avoidance of large enterprises is carried out by means of "the computer-assisted risk-based case selection programme...enhanced to enable comprehensive tax compliance measurement and support more efficient and sophisticated selection of cases", as stated by the Inland Revenue Department?

Asked by : Hon. CHAN Kam-lam

Reply:

1. The Inland Revenue Department (IRD) estimates that the tax and penalty recoverable in 2004-05 will increase to \$2.8 billion. The increase mainly comes from major tax avoidance schemes successfully cracked down by IRD towards the end of 2004-05. As tax avoidance schemes are usually very complicated plans involving overseas associated companies, the audit work of such cases is very complex and time-consuming. It may take years to complete their investigation. As such, it is difficult to predict if the same result as for 2004-05 would be achieved in 2005-06. We therefore maintain the estimate for 2005-06 at \$2.1 billion, which is based on experience in previous years.
2. The estimated amount of \$2.8 billion for 2004-05 is based on the back tax and penalty assessed under the field audit and investigation cases finalized in the year.
3. The enhancement of the "computer-assisted risk-based case selection programme" facilitates the identification of suspected evasion or avoidance cases for further investigation by the Field Audit and Investigation Unit. The availability of effective anti-avoidance provisions in the legislation is also very important as far as successfully combating tax avoidance and recovering tax are concerned. In this respect, the enactment of the specific anti-avoidance provisions in the Inland Revenue (Amendment) Ordinance 2004 in June 2004 has helped to combat the abuse of interest deductions by some corporations to avoid tax.

Programme : (1) Assessing Functions

Controlling Officer : Commissioner of Inland Revenue

Director of Bureau : Secretary for Financial Services and the Treasury

Question : Under this Programme, the Department is going to delete 28 non-directorate posts. What is the reason for it? Will it have any negative impact on the assessing work?

Asked by : Hon. FUNG Kin-kee, Frederick

Reply : The Inland Revenue Department has put in a constant effort to re-engineer its work processes and streamline its work procedures. The Department has also adopted a wider use of information technology in recent years. As a result of these efforts, the Department should be able to save 28 non-directorate posts for its assessing work under Programme (1) in 2005-06. The displaced officers will be redeployed to fill vacancies in other divisions. The assessing work will not be adversely affected by this establishment change.

Question : As the Budget proposes to scrap the Estate Duty, how much Departmental Expenses may be reduced per year?

Asked by : Hon. Jeffrey LAM Kin-fung

Reply : In the draft Estimates of Expenditure for 2005-06, provisions totalling \$18.5 million relate to the assessment of estate duty. Personal emoluments account for some 90% of total expenditure. The Estate Duty Office (EDO) has an establishment of 36, comprising 9 Assessor grade staff, 13 Taxation Officer grade staff and 14 clerical grade staff. In addition, 6 Tax Inspector grade staff assist with the inventory-taking of the deceased's safe deposit boxes and 3 Typists provide typing services to the EDO. There are a number of other supporting and administrative staff who provide general administrative support and management supervision to the EDO as well as to other divisions.

As the Government's proposal is to abolish estate duty in respect of persons who pass away after enactment of the enabling legislation, and as the affidavit for estate duty is normally filed 6 to 12 months after the date of death of a person, we envisage that the EDO will need to operate at full strength in 2005-06. Our plan is to reduce the establishment of the EDO and the supporting departmental posts in line with the actual caseload in future years. The surplus staff will be redeployed to other divisions.

Question: Regarding the work of combating tax evasion in 2003-04, please advice-

- (1) the number of tax evaders;
- (2) the number of offenders successfully prosecuted; and
- (3) the staff required for combating tax evasion.

Asked by : Hon. LEUNG Kwan-yuen, Andrew

- Reply :
- (1) In 2003-04, the Field Audit & Investigation (FAI) Unit of the Inland Revenue Department (IRD) completed 1,863 audit / investigation cases on tax evasion and avoidance. Tax and penalties recovered in the year amounted to \$2,059 million.
  - (2) The vast majority of field audit and investigation cases were settled with the imposition of a penalty in accordance with the IRD's published penalty policy. Taking into account factors such as the seriousness of the offence, the strength of evidence, the amount of tax involved, etc., the IRD will initiate prosecution action whenever this is warranted. In 2003-04, the IRD conducted 5 prosecution cases involving 8 taxpayers. All were successful.
  - (3) The FAI Unit of the IRD had an establishment of 250 in 2003-04.

0088

Programme : (2) Collection

Controlling Officer : Commissioner of Inland Revenue

Director of Bureau : Secretary for Financial Services and the Treasury

Question : Please provide details of the numbers of tax payments that have been made by electronic means under different types of tax and various kinds of electronic payments since the introduction of electronic payment services by the Department. What percentage of cases do payments of tax by electronic means account for each type of tax?

Please list out the costs and expenditure involved in processing tax payments by electronic means and non-electronic under different types of tax.

What will the Government do in 2005-06 in order to “continue to promote the use of electronic services for payment of tax”? What will be the amount of expenditure involved? How many people are expected to be attracted to the use of electronic services for payment of tax?

Asked by : Hon. SIN Chung-kai

Reply : At present, the Inland Revenue Department (IRD) accepts electronic payment of tax (e-payments) via “Payment by Phone”, the bank automated teller machines and Internet. An analysis of e-payments of Earnings & Profits Tax for 2001-02 to 2004-05 is at Annex. The percentage of tax payments by electronic means has been rising in recent years. IRD does not have statistics broken down into different tax types.

IRD does not keep the statistics on the costs and expenditure involved in processing tax payments by electronic means and non-electronic means for different types of tax.

In 2005-06, IRD will continue to promote the use of electronic services for payment of tax through information leaflets, Internet publicity, advertisements, etc. The expenditure, which will not be significant, will be absorbed within IRD's existing resources. As it is safe and convenient to pay tax by electronic means, IRD expects that the utilization rate will continue to rise.

Controlling Officer : Commissioner of Inland Revenue

Director of Bureau : Secretary for Financial Services and the Treasury

Question :

In 2005-06, the Inland Revenue Department will delete 33 non-directorate posts. According to the information it provided there are at least 50 posts for processing estate duty assessing work (15 600 cases finalized and 312 cases processed per post last year). Please advise:

- (1) Whether the above-mentioned 33 non-directorate posts to be deleted include posts for the estate duty assessing work? If not, which grades are involved? What are the reasons for deleting in these grades?
- (2) In 2005-06, how many posts are for the estate duty assessing work? If the Department is required to delete any of these posts, what is the arrangement for the staff members affected? Will the arrangement involve any additional expense?
- (3) After abolition of estate duty, what will be saving by the government per year in processing estate duty?

Asked by : Hon. SIN Chung-kai

Reply :

- (1) The above-mentioned 33 non-directorate posts to be deleted do not include posts for assessing estate duty. In 2005-06, through streamlining procedures and re-engineering the work processes, and wider use of information technology, the Inland Revenue Department (IRD) will delete 33 non-directorate posts in the Assessor grade, Taxation Officer grade, Tax Inspector grade, clerical grade, secretarial grade and Data Processor grade.
- (2) & In the draft Estimates of Expenditure for 2005-06, provisions totalling \$18.5 million relate to the assessment of estate duty. Personal emoluments account for some 90% of total expenditure. The Estate Duty Office (EDO) has an establishment of 36, comprising 9 Assessor grade staff, 13 Taxation Officer grade staff and 14 clerical grade staff. In addition, 6 Tax Inspector grade staff assist with the inventory-taking of the deceased's safe deposit boxes and 3 Typists provide typing services to the EDO. There are a number of other supporting and administrative staff who provide general administrative support and management supervision to the EDO as well as to other divisions.
- (3)

As the Government's proposal is to abolish estate duty in respect of persons who pass away after enactment of the enabling legislation, and as the affidavit for estate duty is normally filed 6 to 12 months after the date of death of a person, we envisage that the EDO will need to operate at full strength in 2005-06. Our plan is to reduce the establishment of the EDO and the supporting departmental posts in line with the actual caseload in future years. The surplus staff will be redeployed to other divisions.

Programme : (1) Assessing Functions

Controlling Officer : Commissioner of Inland Revenue

Director of Bureau : Secretary for Financial Services and the Treasury

Question : How will the Department assist the Financial Services and the Treasury Bureau in the public consultation on implementation of a Goods and Services Tax? Will this involve any expenditure? If yes, what are the details of the expenditure?

Asked by : Hon. James TIEN Pei-chun

Reply : In 2005-06, the Inland Revenue Department (IRD) will, through internal staff redeployment, assist the Financial Services and the Treasury Bureau in the public consultation on implementation of a Goods and Services Tax. This will include assistance in issuing the public consultation document, meeting relevant professional and other bodies, answering enquiries, collecting and analyzing the responses received, etc. As the work will be absorbed by existing staff resources of IRD, no financial provision has been earmarked for the exercise in 2005-06. Regarding the work, the IRD is presently assisting the Financial Services and the Treasury Bureau in drawing up a public consultation document and related publicity materials to prepare for the public consultation exercise to be held later this year.

INITIAL WRITTEN QUESTION**

Head : 76 Inland Revenue Department    Subhead (No. & title) :

Programme : (4) Taxpayer Services

Controlling Officer : Commissioner of Inland Revenue

Director of Bureau : Secretary for Financial Services and the Treasury

Question :

Under this programme, it is stated that the existing Interactive Voice Response System will be replaced. May the Administration inform the Council of:

- (a) the benefits of replacing the above system?
- (b) the details of the expenditure earmarked in 2005-06 and the specific work in the year for the replacement?

Asked by : Hon. Ronny TONG Ka-wah

Reply :

- (a) The existing Interactive Voice Response System (IVRS) has been in use for six years since August 1999. Its serviceable life will end in 2005-06. In 2003 and 2004, there were incidences of system malfunction. The IVRS is equipped with system components which have become obsolete and cannot support the new operating system and application software. As advised by the Electrical and Mechanical Services Department, it is necessary to replace the system in order to sustain a high level of system reliability for the sizable telephone enquiry service of the Inland Revenue Department (IRD).
- (b) The IRD has earmarked \$1,755,000 under Subhead 661 Minor plant, vehicles and equipment (block vote) for the replacement of the IVRS in 2005-06, which comprises hardware replacement and software upgrade. Specifically, the work involves tendering of the project, acquisition, installation, integration with other systems and testing of the new system.

Head : 76 Inland Revenue Department      Subhead (No. & title) :  
661 Minor plant, Vehicles &  
Equipment (block vote)

Programme :

Controlling Officer : Commissioner of Inland Revenue

Director of Bureau : Secretary for Financial Services and the Treasury

Question : Under this subhead, the provision of \$2,267,000 for 2005-06 is 297.0% more than the revised estimate for 2004-05. It is mainly due to an increased requirement for the purchase of minor equipment. May the Administration inform the Council details of the expenditure items under this subhead for 2005-06, itemizing all the costs and purposes?

Asked by : Hon. Ronny TONG Ka-wah

Reply : The increase in expenditure in 2005-06 under Subhead 661 is due to a greater demand for the procurement or replacement of essential equipment by the Inland Revenue Department (IRD). An analysis of the expenditure is as follows:

1.	\$0.27 million	the procurement of a folding machine to allow automatic and accurate folding of tax documents in a wider range before enveloping;
2.	\$0.242 million	the replacement of the aged inserting machine to enhance efficiency in bulk issue of tax returns, notice of assessments, refund notices and demand notes; and
3.	\$1.755 million	the replacement of the aged Interactive Voice Response System to sustain a high level of system reliability for the telephone enquiry service of the IRD.
Total :	\$2.267 million

Question Serial No.

0871

Head: 162 Rating and Valuation Department                      Subhead(No. & title):

Programme:                      (2) Collection and Billing of Rates and Government Rent

Controlling Officer: Commissioner of Rating and Valuation

Director of Bureau: Secretary for Financial Services and the Treasury

Question: As mentioned by the Government in a Legislative Council meeting, the arrears in respect of Government rent and rates demanded from 1 July 1997 to the end of February 2005 amounted to \$27m and \$24m respectively. The reasons accounting for the arrears include financial difficulties faced by payers and the query of Government's justifications in collecting Government rent.

Please inform:

1. The number of arrears cases for Government rent and rates in the past three years and the total amount involved. Is there an increase or decrease when compared with that of the previous year and what is the magnitude?
2. For the amount of arrears involving Government rent and rates mentioned above, how many cases are currently being recovered through legal proceedings and what is the amount involved for those cases?

Furthermore,

3. In light of the higher level of arrears in the past two years, the Department adjusts the target "to keep the amount of arrears within a set percentage of the Government rent demanded for the preceding 12 months" from previously less than 1.1% to less than 1.2% in 2005-06. As the actual percentages for the past two years are more than 1.2%, how certain is the Government of being able to keep the target of less than 1.2% of arrears in the new year? If so, why?

Asked by: Hon. CHAN Kam-lam

Reply:

1. The arrears of Government rent and rates in respect of the Government rent and rates demanded from 1 July 1997 to the end of February 2005 mentioned in the Administration's reply to the Legislative Council Question on 9 March 2005 was in relation to village houses in the New Territories.

The overall arrears of Government rent and rates on a territory-wide basis in the last three years are as follows:

Financial Year	Government Rent				Rates			
	Average total amount of arrears (\$ million)	(Increase/decrease over the previous year)	No. of Accounts	(Increase/decrease over the previous year)	Average total amount of arrears (\$ million)	(Increase/decrease over the previous year)	No. of Accounts	(Increase/decrease over the previous year)
2002-03	63	(+8.6%)	36,000	(+5.9%)	101	(-28.4%)	55,000	(-3.6%)
2003-04	66	(+4.7%)	41,000	(+13.9%)	105	(+4%)	66,000	(+20%)
2004-05 (estimate)	70	(+6.1%)	38,000	(-7.3%)	125	(+19%)	60,000	(-9.1%)

2. The Department has initiated legal action and taken the cases to Small Claims Tribunal or District Courts to recover the Government rent and rates arrears. The relevant figures for the past three years are as follows:

Year	Small Claims Tribunal		District Courts	
	Amount involved (\$ million)	Number of Cases	Amount involved (\$ million)	Number of Cases
2002-03	74.3	13,167	8.7	83
2003-04	56.3	16,632	12.5	64
2004-05 (estimate)	49.7	14,850	8.5	38

3. In the past few years, the percentages of Government rent arrears have been higher than the targets. This was mainly due to an increase in the number of properties assessed to Government rent for the first time, particularly village-type houses in the New Territories, many of which are owned by indigenous villagers.

The Department has been taking a series of measures to reduce the level of arrears such as imposing statutory surcharges as soon as payments are overdue. For cases involving financial difficulties, the Department will allow payment by instalments so as to increase the recovery rate. In the event that payers fail to make payment as demanded, prompt action will be taken for recovery of the arrears through the Small Claims Tribunal or the District Court, depending on the amount of arrears involved. The Administration will also strengthen its publicity on the responsibility for paying Government rent and the proper procedures for indigenous villagers in the New Territories to apply for exemption for Government rent. We expect that, given the above measures, the arrears position would improve.

Head: 162 – Rating and Valuation Department      Subhead(No. & title): 000 Operational Expenses

Programme:

Controlling              Commissioner of Rating and Valuation

Officer:

Director of Bureau: Secretary for Financial Services and the Treasury

Question : The department's Personal Emoluments in the 2005-06 Estimates are \$20m lower than last year's Revised Estimates. However, the Allowances and the Job-related allowances under this item are increased. Please explain.

Asked by: Hon. CHAN Kam-lam

Reply:

The Allowances item under the Personal Emoluments provision accounts for three types of allowances namely acting, overtime and on-call allowances. The increase of \$0.155 million in Allowances in the 2005-06 Estimates over the 2004-05 Revised Estimates is mainly due to:

- (i) the need for full-year provision of acting allowance in 2005-06 for filling some of the vacancies by acting appointment pursuant to officers leaving the department in 2004-05 for reasons of normal retirement or completion of agreement. The salary provision related to these posts in 2005-06 is correspondingly reduced; and
- (ii) the need to retain sufficient provision of overtime allowance in 2005-06 to meet any unexpected surge in workload as the property market has turned more active.

The Job-related Allowances item under the Personal Emoluments provision accounts for typhoon allowance, the actual expenditure of which fluctuates with the frequency of typhoons. There were fewer typhoons in 2004-05, leading to a lower expenditure in this relation in the year. The increase of \$4,000 over the 2004-05 Revised Estimates is mainly due to the need to keep the provision at a level comparable to the 2003-04 actual expenditure.

0079

Head: 162 Rating and Valuation Department

Subhead(No. & title):

Programme: (1) Statutory Valuation and Assessments

Controlling Officer: Commissioner of Rating and Valuation

Director of Bureau: Secretary for Financial Services and the Treasury

Question : Under this Programme, the department will "review and enhance the computer systems to further improve efficiency and service to the public". Please give details on this activity. What are the amount of expenditure and the number of staff involved in this activity?

Asked by: Hon. FUNG Kin-kee, Frederick

Reply:

The department has been reviewing its computer systems to identify areas of improvement, and is undertaking the following computer projects to further improve efficiency and services to the public:

- Electronic Submission of Forms  
The system allows the public to submit forms through the internet direct to the department. Apart from forms that have already been launched, including Notice of New Letting or Renewal Agreement and Notice of Objection to interim Valuation/Deletion/Correction, the department will continue to launch other forms including Proposal for Alteration of Valuation List or Government Rent Roll and Requisition for Particulars of Tenement. The forms in the latter group can currently only be submitted in hard copy.
- Geographic Information System Valuation Modules  
The department seeks to integrate property related spatial information (such as location maps and floor plans) with textual property description in the department's database. For this purpose, the Integrated Property Database (IPDB) has already established a link from the department's computerized database to the digital mapping data of the Lands Department and provides the functions of storing and managing the spatial data. These will facilitate data retrieval and the department's valuation work. The system will also facilitate the production of property market statistics in the department's annual Property Review. This project therefore contributes to the department's work under both Programme 1 in statutory valuation and assessments and Programme 3 in providing valuation and property information services.

In 2005-06, the IPDB will be enhanced by developing the Geographic Information System (GIS) Valuation Modules to facilitate valuation and property information services further. It will streamline the data input work and integrate the existing fragmented work procedures, helping to improve the efficiency and effectiveness of statutory valuation and assessments. As a result, ratepayers will be informed of the rateable value and the rates payable for their new properties in a timelier manner.

The department will keep under review the need and opportunities for further enhancements to its computer systems.

The estimated non-recurrent cost of the above projects in 2005-06 is \$4.929 million (\$1.078 million for electronic submission of forms and \$3.851 million for the GIS Valuation Modules), which will be funded under Capital Works Reserve Fund Head 710 Computerisation. The estimated manpower resources involved in the projects in 2005-06 are 25.64 man-months (8.64 man-months for electronic submission of forms and 17 man-months for the GIS Valuation Modules). The department will absorb the recurrent cost of \$0.294 million (\$0.152 million for electronic submission of forms under Programme 1 and \$0.142 million for the GIS Valuation Modules under Programmes 1 and 3).

Programme:                    (2) Collection and Billing of Rates and Government Rent

Controlling Officer: Commissioner of Rating and Valuation

Director of Bureau: Secretary for Financial Services and the Treasury

Question:            Under this Programme, the department will "review and enhance its Accounting and Billing System". Please give details on this activity. What are the amount of expenditure and the number of staff involved in this activity?

Asked by: Hon. FUNG Kin-kee, Frederick

Reply: We stated in the Controlling Officer's Report that we would "review and enhance its Accounting and Billing System to speed up the recovery of arrears and to look for improvements in service delivery". We have undertaken or will undertake the following computer projects for this purpose:-

- Bulk Billing Service  
This offers rates and Government rent payers the option of consolidating their multiple rates/Government rent accounts into one bill for single payment. This has reduced the operating costs of both the payers and the Government for processing multiple bills. We will continue to promote this service.
- Rates and Government Rent Demand in Chinese  
All demands, forms and letters are enhanced to include the property address in Chinese. Payers can opt to receive quarterly demands with information printed in Chinese.
- Accounting and Billing for Certain Apportioned Rates and/or Government Rent Assessments  
This project will enhance the existing Accounting and Billing System by automating the billing of rates and/or Government rent for properties the rateable values of which have been informally apportioned. For instance, where several rateable tenements are occupied and used as a single property, the department used to, on request of payers, manually break down the property into the component tenements, informally apportion the rates/rent payable and issue manually-prepared demands to the respective payers. With the new system, the department can automate the apportionment and separation of the rates/Government rent demands, thereby reducing the chance of error. Besides, the enhancement can speed up the recovery action in relation to these apportioned accounts because the automated system can provide more up-to-date account information and generate reports to alert the department when these accounts become overdue.

The department will keep under review the opportunities and needs for further enhancing its Accounting and Billing Systems.

The estimated non-recurrent cost of the above projects in 2005-06 is \$3.72 million, which will be funded under CWRP Head 710 Computerisation. The estimated manpower resources involved in the above projects in 2005-06 are 38.05 man-months. The department will absorb the recurrent cost of \$0.42 million a year.

Subhead(No. & title):

Programme: (3) Provision of Valuation and Property Information Services

Controlling Officer: Commissioner of Rating and Valuation

Director of Bureau: Secretary for Financial Services and the Treasury

Question : Under this Programme, the department will “develop an Integrated Property Database to provide a comprehensive textual and graphic repository of property information for parties concerned including government departments and agencies”. Please give details on this activity. What are the amount of expenditure and the number of staff involved in this activity?

Asked by: Hon. FUNG Kin-kee, Frederick

Reply:

In order to achieve greater efficiency and effectiveness in its assessment work, the department seeks to integrate property related spatial information (such as location maps and floor plans) with textual property description in the department's database. The Integrated Property Database (IPDB) has already established a link from the department's computerized database to the digital mapping data of the Lands Department and provides the functions of storing and managing the spatial data. These will facilitate data retrieval and the department's valuation work. The system will also facilitate the production of property market statistics in the department's annual Property Review. This project therefore contributes to the department's work under both Programme 1 in statutory valuation and assessments and Programme 3 in providing valuation and property information services.

In 2005-06, the IPDB will be enhanced by developing the Geographic Information System (GIS) Valuation Modules to further facilitate valuation and property information services. It will streamline the data input work and integrate the existing fragmented work procedures, helping to improve efficiency in the production of property market statistics. The estimated non-recurrent cost of enhancing the IPDB (i.e. developing the GIS Valuation Modules) in 2005-06 is \$3.851 million, to be funded under Capital Works Reserve Fund Head 710 Computerisation. The estimated manpower resources involved in this project in 2005-06 are 17 man-months. The department will absorb the recurrent cost of \$0.142 million under Programmes 1 and 3.

The data transfer and sharing capability of the IPDB has the potential to allow integration of the department's property data with those held by other departments in addition to Lands Department's and dissemination of integrated property information to the public in future. This is subject to further studies to be carried out.

Head: 162 – Rating and Valuation Department Subhead(No. & title): 000 Operational expenses

Programme:

Controlling Officer: Commissioner of Rating and Valuation

Director of Bureau: Secretary for Financial Services and the Treasury

Question : Under this Subhead, the allowances of personal emoluments in 2005-06 are higher than those of the previous two years. Please explain.

Asked by: Hon. FUNG Kin-kee, Frederick

Reply:

The Allowances item under the Personal Emoluments provision accounts for three types of allowances namely acting, overtime and on-call allowances. The increase of \$0.155 million in Allowances in the 2005-06 Estimates over the 2004-05 Revised Estimates is mainly due to:

- (i) the need for full-year provision of acting allowance in 2005-06 for filling some of the vacancies by acting appointment pursuant to officers leaving the department in 2004-05 for reasons of normal retirement or completion of agreement. The salary provision related to these posts in 2005-06 is correspondingly reduced; and
- (ii) the need to retain sufficient provision of overtime allowance in 2005-06 to meet any unexpected surge in workload as the property market has turned more active.

For similar reasons, there is an increase of \$0.847 million in Allowances in the 2004-05 Revised Estimates over the 2003-04 Actual Expenditure. The actual expenditure on acting and overtime allowances in 2003-04 was particularly low also because of an exceptionally small number of officers taking vacation leave, hence fewer acting appointments, and overtime work.

Programme : (2) Licensing of Vehicles and Drivers

Controlling Officer : Commissioner for Transport

Director of Bureau : Secretary for Financial Services and the Treasury

Question : Financial Secretary, Mr Henry TANG, pointed out that it is estimated that the launch of the Personalised Vehicle Registration Marks Scheme (PVRM) will be delayed to the end of this year because it has to go along with the new system of the Transport Department. Please tell the details of the new system, when it will be ready and how much funding it needs.

Asked by : Hon. CHAN Kam-lam

Reply :

If the PVRM Scheme is to be implemented, a new computer system interfacing with the Vehicles and Drivers Licensing Integrated Data system (which is currently being upgraded and is scheduled for completion by end 2005) will also need to be developed to support the processing of PVRM applications. This, as well as other related system enhancement, will cost about \$15-16 million (\$8-9 million for Transport Department, \$4 million for Customs and Excise Department and \$3 million for Hong Kong Police Force).

Head : 186 – Transport Department Subhead (No. & title) :

Programme : (2) Licensing of Vehicles & Drivers

Controlling Officer : Commissioner for Transport

Director of Bureau : Secretary for Financial Services and the Treasury

Question : With regard to the Personalised Vehicle Registration Marks (PVRM) Scheme proposed by the Financial Secretary last year, please advise-

- (a) What is the present progress?
- (b) Can the Scheme be launched in 2005-06? If in the affirmative, what are the implementation schedule and the estimated cost? If in the negative, what are the reasons?

Asked by : Hon. LAU Kong-wah

Reply :

- (a) The Administration consulted the LegCo Panel on Financial Affairs on the PVRM Scheme in November 2004. Details of the proposal are being formulated taking into account views expressed by LegCo Members and members of the community. The Administration aims to introduce the necessary legislation into LegCo within this legislative session.
- (b) Subject to the passing of the legislation, the Transport Department intends to begin accepting applications under the PVRM Scheme in end 2005/early 2006, when the new licensing computer system is in place.

The staff cost for developing details of the PVRM Scheme, including supporting the preparation of legislative amendments, devising the application and vetting procedures, and drawing up a publicity plan is estimated to be around \$1 million in 2005-06. The cost of system development and enhancement is estimated to be about \$15-16 million (\$8-9 million for Transport Department, \$4 million for Customs and Excise Department and \$3 million for Hong Kong Police Force). Upon implementation of the Scheme, the cost of administering the Scheme is estimated to be about \$6 million per year.

Head : 186 – Transport Department Subhead (No. & title) :

Programme : (2) Licensing of Vehicles & Drivers

Controlling Officer : Commissioner for Transport

Director of Bureau : Secretary for Financial Services and the Treasury

Question : (a) The Administration will draw up and implement the Personalised Vehicle Registration Marks (PVRM) Scheme in 2005-06. What is the actual work involved and how much would it incur?

(b) Based on the Administration's estimation, how many PVRMs will be issued and what is the cost for processing each PVRM in 2005-06?

Asked by : Hon. LAU Wai-hing, Emily

Reply :

- (a) The Transport Department's staff cost for developing details of the PVRM Scheme, including supporting the preparation of legislative amendments, devising the application and vetting procedures, and drawing up a publicity plan is estimated to be around \$1 million in 2005-06. The cost of system development and enhancement is estimated to be about \$15-16 million (\$8-9 million for Transport Department, \$4 million for Customs and Excise Department and \$3 million for Hong Kong Police Force). Upon implementation of the Scheme, the cost of administering the Scheme is estimated to be about \$6 million per year. The work covers the receipt and processing of PVRM applications, vetting, auction, handling enquiries, etc. These cost estimates are subject to any refinements to the Administration's proposals for the Scheme.
- (b) The Administration aims to introduce legislation to implement the Scheme into the Legislative Council within this legislative session. Subject to any refinements to the Administration's proposal, on a full year basis, about 3 000 PVRMs would be auctioned and the recurrent cost is estimated to be around \$6 million i.e. each PVRM would cost \$2,000 to process.

Question :

What are the reasons for the significant increase of participants in the Civil Service Provident Fund Scheme from only 282 in 2003 to nearly 1 100 in 2004 and 2 216 in 2005?

Asked by : Hon. CHAN Kam-lam

Reply :

Under the new entry system introduced for civil servants appointed on or after 1 June 2000, officers will be entitled to join the Civil Service Provident Fund (CSPF) Scheme as a retirement benefit when they are offered permanent terms of appointment upon satisfactory completion of service on probation and/or agreement terms. The number of participants in the CSPF Scheme has been on the rise in recent years as more officers who joined the civil service since June 2000 are offered permanent terms of appointment and become eligible to join the CSPF Scheme.

Programme:

Controlling Officer : Director of Accounting Services

Director of Bureau : Secretary for Financial Services and the Treasury

Question :

With a reduction in staffing by 5 as well as the civil service pay cut, a decrease is seen in the estimated expenditure for salaries under Personal Emoluments; nevertheless, the expenditure for allowances is estimated to be \$2.76m, which is an increase of 25% and 18% respectively over the previous two years (i.e. the revised estimate for 2004-05 and the actual expenditure in 2003-04). What are the reasons for that?

Asked by : Hon. CHAN Kam-lam

Reply :

The increases in expenditure for allowances are mainly due to the anticipated increase in overtime work arising from system testing of the new Government Financial Management Information System, and some additional requirements for expected increase in number of officers taking up acting appointments.

Question :

What are the main reasons for the increase of general departmental expenses from the revised estimate of \$130m for 2004-05 to the estimate of \$150m for 2005-06?

Asked by : Hon. CHAN Kam-lam

Reply :

The increase in provision of \$20m for 2005-06 is attributed mainly to the following:

- (a) additional provision for the recurrent cost for replacement of the Government Financial Management Information System (GFMIS);
- (b) rescheduling of some of the tasks of the GFMIS project from 2004-05 to 2005-06; and
- (c) additional provision for payment to collection agents due to growing number of government bills.

Programme : (2) Payment of Salaries, Pensions and Benefits

Controlling Officer :          Director of Accounting Services

Director of Bureau : Secretary for Financial Services and the Treasury

Question :

What are the reasons for the significant increase in the number of recipients under the mandatory provident fund in 2004 and 2005?

Asked by : Hon. KWONG Chi-kin

Reply :

The Treasury is responsible for making mandatory provident fund (MPF) payments for civil servants and other categories of officers/government employees such as officers of the Independent Commission Against Corruption and Judges and Judicial Officers who are subject to the provisions of the Mandatory Provident Fund Scheme Ordinance. The numbers of officers involved for 2003 to 2005 are shown below:

2003 (Actual) No.	2004 (Actual)		2005 (Estimate)			
	No.	Increase		No.	Increase	
		No.	%		No.	%
<b>8 615</b>	<b>8 818</b>	203	+2.4%	<b>8 916</b>	98	+1.1%

There is no significant increase in the number of the aforementioned MPF recipients. The actual increase of 2.4% in 2004 and the projected increase of 1.1% in 2005 are mainly due to the new recruits to the civil service who are subject to the Mandatory Provident Fund Schemes Ordinance.

The Treasury does not have similar data in respect of non-civil service contract staff as their MPF payments are arranged by the respective departments and are not centrally administered by the Treasury.

Director of Bureau : Secretary for Financial Services and the Treasury

Question :

Please provide the number of permanent staff, agreement officers and non-civil service contract staff who are recipients under the mandatory provident fund.

Asked by : Hon. KWONG Chi-kin

Reply :

The Treasury is responsible for making mandatory provident fund (MPF) payments for civil servants and other categories of officers/government employees such as officers of the Independent Commission Against Corruption (ICAC) and Judges and Judicial Officers who are subject to the provisions of the Mandatory Provident Fund Schemes Ordinance. There were 8 818 such officers in 2004, with the following breakdown:

Category of officers	Number of officers
Civil servants on permanent terms	1 096
Civil servants on agreement / probationary terms	6 532
Others (e.g. ICAC officers, Judges and Judicial Officers)	1 190
<b>Total</b>	<b>8 818</b>

The Treasury does not have similar data in respect of non-civil service contract staff as their MPF payments are arranged by the respective departments and are not centrally administered by the Treasury.

Question : What are the respective costs incurred by the Treasury in handling counter collections, postal remittances, collections by autopay and collections by other electronic means?

Asked by : The Hon. SIN Chung-kai

Reply : The estimated expenditure on the different forms of revenue collection is as follows :

	<u>\$ million</u>
Counter collection	40.7
Postal remittance	2.2
Collection by autopay	1.1
Collection by other electronic means	9.2
	-----
Total	53.2

Question : In what ways will the Treasury promote e-payments in 2005-06 and what resources have been set aside for this purpose?

Asked by : The Hon. SIN Chung-kai

Reply : The Treasury has recently revamped its website to make e-payments more convenient and user-friendly. In addition, the Treasury plans to promote e-payments in 2005-06 through :

- (a) printing promotional leaflets and dispatching them with rates and water bills to customers;
- (b) launching promotional programmes jointly with e-payment service providers; and
- (c) working with the Office of the Government Chief Information Officer (OGCIO) to develop more customer oriented e-payment services.

No specific provision has been made for the purpose.

Question:

It is mentioned under "Matters Requiring Special Attention in 2005-06" that the Treasury will work on the redevelopment of the pension management system. However, with the deletion of 1 post, will the staffing be able to take on the new task to redevelop the pension management system, besides achieving the targets of the performance indicators for 2005-06? What are the estimated expenditure and the staffing involved in the redevelopment of the pension management system?

Asked by: Hon. WONG Ting-kwong

Reply:

The Treasury will make sure that the deletion of post will not in any way impair the existing services and that new and enhanced services will be delivered as scheduled. The estimated project cost of redeveloping the pension management system is \$9.8 million and it will be funded under Capital Works Reserve Fund Head 710 – Computerisation. With regard to staffing, about 12 staff are deployed to work on the project.
