

The systems and mechanisms to handle the interface and coordination of the works projects for the arts and cultural facilities, retail/dining/entertaining facilities and infrastructure facilities which would be constructed during Phase 1 of the WKCD project.

The works projects under the purview of the WKCD Authority include the arts and cultural facilities and related facilities comprising transport facilities, communal facilities, public open spaces and retail/dining/entertainment facilities. There are also some works projects in the WKCD area that will be under the responsibility of the Government such as public roads, drainage and other Government facilities. The Board of the WKCD Authority (which will include public officer members) will oversee the implementation of the works projects for the facilities under the purview of the WKCD Authority. We envisage that dedicated committees or working groups would be set up under the Board to take charge of the implementation of these works projects and the interface and coordination among them. As regards the interface and coordination between the works projects under the purview of the WKCD Authority and those public works projects within or affecting the WKCD, the Government would put in place a mechanism to handle the interface and coordination between such projects, such as through appointing public officers with relevant professional expertise to participate in the work of the relevant committees or working groups, or setting up a multi-disciplinary team or committee in the Government for such purpose.
