

**Subcommittee on
Waste Disposal (Designated Waste Disposal Facility)
(Amendment) Regulation 2004 and
Waste Disposal (Charges for Disposal of Construction) Waste Regulation**

**List of follow-up actions arising from the discussion
at the meeting on 3 December 2004**

Waste Disposal (Charges for Disposal of Construction Waste) Regulation

- (1) To review the proposed disposal charge for refuse transfer stations in outlying islands which is currently set with reference to the landfill charge of \$125 per tonne. The proposed fee level may not be appropriate for wasteload containing 100% inert materials.
- (2) To alert the trades about the confusion which may arise if a billing account for a contract with a value of \$1 million or above is used to cover other contracts each with a value under \$1 million. To also discuss with them the desirability and practicability of using separate billing accounts for contracts with a value of \$1 million or above and contracts each with a value under \$1 million.
- (3) To consider imposing a validity period on billing accounts for contracts with a value of \$1 million or above if these accounts are also used to cover other contracts each with a value under \$1 million.
- (4) To consider applying a uniform rate of deposit for all billing accounts, including those with a contract value under \$1 million, to avoid possible disputes.
