#### **1. Impact of the Mainland and Hong Kong Closer Economic Partnership Arrangement (CEPA)**

Members were updated on the progress of the implementation of CEPA at the meetings on 10 May and 19 October 2004. Some members suggested that the Administration should consider setting up a high-level committee comprising representatives from the Government and business leaders to explore innovative ways to leverage on the opportunities brought about by CEPA. The Administration advised that a quantitative survey and analysis of the economic impact, including that on local employment would be conducted 9 to 12 months after CEPA's implementation; and that the Administration would revert to the Panel in due course.

At the meeting held on 16 November 2004 when the Panel was briefed on the subsidiary legislation relating to the implementation of CEPA, Hon CHAN Yuen-han was concerned whether the Administration could provide an evaluation on the impact of CEPA on Hong Kong's economy expeditiously. The Panel agreed that the Administration should report to the Panel at the earliest possible date.

The Administration plans to submit a preliminary report to the Panel in February based on the available outcome of the analysis which should cover the impact of the Individual Visit Scheme and the zero tariff benefit for trade in goods, to be followed by a full report in April 2005.

#### **2. Unauthorized downloading of copyright works from the Internet**

Item raised at the special meeting of the Panel on Information Technology and Broadcasting (ITB Panel) on 25 March 2004 in connection with the discussion on "Measures to facilitate the development of film industry". Organizations attending the meeting pointed out that with the advancement in technology, there has been an increase in activities relating to making available movie products on the Internet for access and downloading through various means of transfer, in particular, the so called peer to peer transfer (P2P network) by users without the authorization of the copyright owners concerned. They

considered that the act of making available infringing copies through the P2P network should be sanctioned, lest the well-being of the creative industries would be adversely affected.

Since copyright issues relating to the unauthorized downloading of movie and musical products from the Internet fall within the purview of the CI Panel, members of the ITB Panel agreed that the CI Panel should be invited to explore the subject further in conjunction with the Administration and deputations.

The Administration continues to give active consideration to how to address the Internet piracy issue including the concern over the sharing of infringing materials through P2P networks. Enforcement actions will be taken against those P2P users who distribute infringing copies of copyright work to such an extent as to affect prejudicially the concerned copyright owners. The Administration is also engaging in constructive dialogue with copyright owners and Internet Service Providers to explore how to alleviate the P2P problem. The Administration will report to the Panel on the issue in February 2005.
