

**Bills Committee on  
Energy Efficiency (Labelling of Products) Bill**

**List of follow-up actions arising from the discussion  
at the meeting on 27 November 2007**

- (1) To consider proposing to the participating fluorescent lamp suppliers under the voluntary Fluorescent Lamp Recycling Programme to offer financial incentives to the public with a view to encouraging them to participate in the Programme. A more effective alternative is to introduce a "deposit" system for used compact fluorescent lamps.
- (2) To consult the relevant stakeholders on the proposed amendments to raise the penalty levels under clause 12 and clause 18.
- (3) To consider specifying the minimum rank of public officers to be appointed as authorized officers under clause 21.
- (4) To advise the manner, such as the source of test sample etc, in which the Director will require a specified person to conduct the test under clause 27. To also advise the cost of testing and consider requiring the specified person to bear the cost of testing under clause 27(2) only if the test results do not conform to those previously submitted to the Director for assignment of the reference number.
