Dear Miss Yu,

**Finance Committee
Meeting on 27 April 2007**

I refer to your meeting with the Chairman of the Finance Committee (FC) and the Deputy Secretary of the Financial Services and the Treasury Bureau held on 24 April 2007. In respect of the item "*Replacement of the Radio System of the Operations Wing of the Hong Kong Police Force*" (FCR (2007-08)5), the Administration was requested to provide the following supplementary information –

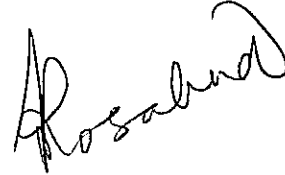

- (a) a list of the Police radio / communications systems approved by the FC in the past ten years;
- (b) whether the systems contained in the list would interface with one another; and
- (c) whether the proposed radio system is a stand-alone type, without interface / connection with other radio systems of the Police.

In the past ten years, FC had given approval to the funding proposals of the radio systems for the Operations Department (i.e. the Third

Generation Command and Control Communications System (CCIII), the Marine Region, and the Criminal Intelligence Bureau / Narcotics Bureau of Crime Wing of the Hong Kong Police Force.

The proposed system of the Special Duties Unit (SDU) will be a standalone system used solely by the SDU. In case there is a need in individual operations, the SDU system could also interface with the CCIII for general communications with other non-SDU frontline officers. The systems set out in para. 2 above can also interface with each other and this mode of operation will be deployed in case of joint operations of the different Police units.

Yours sincerely,

A handwritten signature in black ink, appearing to read "Rosalind", written in a cursive style.

(Miss Rosalind Cheung)
for Secretary for Security
