Head : 49 Food and Environmental Hygiene Department

Subhead (No. & title) :

Programme : (2) Environmental Hygiene and Related Services

Controlling Officer : Director of Food and Environmental Hygiene

Director of Bureau : Secretary for Health, Welfare and Food

Question :

Under this programme, there will be a net deletion of 51 posts in 2007-08. With regard to the posts to be deleted, what are their respective ranks and relevant duties?

Asked by : Hon. WONG Kwok-hing

Reply :

The posts to be deleted under this programme are Workman I and Workman II vacancies. The main duties of these posts are to provide environmental hygiene services.

Head : 49 Food and Environmental Hygiene Department

Subhead (No. & title) :

Programme : (4) Public Education and Community Involvement

Controlling Officer : Director of Food and Environmental Hygiene

Director of Bureau : Secretary for Health, Welfare and Food

Question :

Under matters requiring special attention in 2007-08, the Department will enhance the outreaching efforts in promoting public health and environmental hygiene through the use of the publicity vehicle. In this connection, please advise on:

1. the relevant details;
2. the estimated expenditure so involved;
3. whether the Administration has assessed the nuisance the publicity vehicle may cause to the environment, and whether the Administration has considered other ways to promote outreaching activities besides using the publicity vehicle.

Asked by : Hon. WONG Kwok-hing

Reply :

1. The publicity vehicle will enable the Department to enhance its outreaching efforts in promoting public health and environmental hygiene messages to the general public. We will arrange the publicity vehicle to visit mainly schools and housing estates. Students and members of the public will have better knowledge about food safety and environmental hygiene through exhibits, publications and various interactive games on the vehicle.
2. It is estimated that the expenditure involved in the running of the vehicle in 2007-08 will be \$0.7 million.
3. Publicity vehicle visits are mainly arranged by appointment. The vehicle is fuelled by Liquefied Petroleum Gas (LPG) and does not use a loud-hailer. The operation of the vehicle would not cause unnecessary nuisance to the public and the environment. Apart from the

use of the publicity vehicle, officers from the Health Education Exhibition and Resource Centre also pay regular visits to schools, elderly centres and local organisations to deliver talks/seminars on public health, hold exhibitions and organise outreaching activities to disseminate messages on food safety and environmental hygiene to the public.

Head: 22 Agriculture, Fisheries and Subhead (No. &
Conservation Department title):

Programme: (3) Animal, Plant and Fisheries Regulation and Technical Services

Controlling Director of Agriculture, Fisheries and Conservation

Officer:

Director of Secretary for Health, Welfare and Food

Bureau:

Question:

Under this programme, the provision for 2007-08 is \$185.5 million higher than the revised estimate for 2006-07, representing a significant increase. Will the Government provide the breakdown figures of estimated expenditures for the work items under this programme, justifications for the expenditures and the expected results?

Asked by: Hon. TAM Heung-man

Reply:

The 2007-08 Estimate for Programme (3) is \$662.3 million, which is \$185.5 million over the 2006-07 Revised Estimate of \$476.8 million. The increase is mainly attributable to \$21.5 million earmarked under this Programme for enhancing avian influenza (AI) surveillance programme, including the collection of dead wild birds for AI testing, enforcement of the ban on the keeping of backyard poultry, regulatory control of keeping poultry for exhibition and for establishing detector dog teams to combat animal smuggling, \$2.0 million for strengthening law enforcement action against cruelty to animals and promoting animal welfare, \$1.2 million for enhancing veterinary care of animals caught and detained at animal management centres, \$27.4 million for the enhancement of import control and inspection of non-food live animals and birds; and the remainder of \$133.4 million is to meet more cash payment expected in 2007-08 for ex-gratia payment to pig farm licencees and one-off grant to assist affected pig farm and live pig transport workers under the voluntary surrender scheme (VSS).

The VSS is a one-year scheme which started on 1 June 2006 for pig farmers to receive an ex-gratia payment in return for surrendering their livestock keeping licences, and for local live pig transporters to receive a loan for switching to other transport business.

Question:

A number of chicken and pig farmers have already surrendered their licenses to the authorities under the voluntary surrender schemes. In this connection, does the Administration have any plans to provide assistance for alternative employment to them? What is the amount of expenditure involved?

Asked by: Hon. WONG Yung-kan

Reply:

We are assisting affected livestock farmers to switch to other farming operations. The Assistance provided includes the provision of training and demonstration on mushroom production, intensive greenhouse production and indoor fish fry rearing. We have also established a one-stop service to assist livestock farmers in seeking the necessary approvals for converting their livestock sheds for the new operations. An expenditure of \$5.5 million has been earmarked for providing these services.

Question:

What plans does the Government have for the promotion of local agricultural and fisheries products in 2007-08? What is the amount of expenditure involved?

Asked by: Hon. WONG Yung-kan

Reply:

In 2007-08, the Agriculture, Fisheries and Conservation Department will promote local agricultural produce emphasizing on quality and food safety, the key characteristics of produce coming out from accredited farms, organic farms and intensive greenhouse production. New or improved vegetable species and varieties will also be introduced to stimulate market demand and help capture high end markets for better economic returns. In addition, the Department will organize promotional activities and exhibitions to promote local produce to consumers.

As regards fisheries, we will continue helping fish farmers to raise production and quality control standards as well as the competitiveness of their products through organizing training workshops, implementing the Accredited Fish Farm Scheme and introducing new fish species such as Jade Perch for culture. We will also help fishermen and fish farmers to promote their products through the development of local brand names and marketing network as well as organizing promotional activities for local fisheries products, emphasizing good quality to capture high-value market niches.

A total of \$20.3 million has been earmarked for these tasks in 2007-08.

Question:

There is a substantial decline in the productivity of the livestock industry as a result of government policy and the composite productivity index for agriculture drops rapidly. In this connection, what will the Government do to promote the sustainable development of agriculture, including programmes such as leisure farming? What is the amount of expenditure involved?

Asked by: Hon. WONG Yung-kan

Reply:

The Government promotes the sustainable development of agriculture through the provision of infrastructural support, technical assistance and advice, credit facilities and vocational training to local farmers.

In 2007-08, we will assist farmers to capture high-value market niches by promoting the development of organic farming and intensive greenhouse production, implementation of the Accredited Farm Scheme, as well as development of brand names and marketing network for local agricultural products emphasizing on good quality and food safety. We shall also devise programmes to assist livestock farmers to convert to other modes of farming.

A total of \$19.8 million has been earmarked for these tasks in 2007-08.

Question:

For the 7 new posts created under this programme, what are the ranks, duties and work arrangement involved?

Asked by: Hon. WONG Yung-kan

Reply:

The 7 posts include 1 Veterinary Officer, 1 Veterinary Technologist, 2 Veterinary Laboratory Technician I and 3 Veterinary Laboratory Technician II for enhancing the capacity for testing of livestock and fish diseases and chemical residues in food animals.

The Veterinary Officer is to develop, implement, review and manage the method of testing, types and number of samples collected, and ensuring the quality of testing.

The Veterinary Technologist is to oversee laboratory testing procedures, design quality assurance programme and provide training to technicians.

The Veterinary Laboratory Technician I is to undertake routine laboratory testing, results reporting and conduct quality assurance tests.

The Veterinary Laboratory Technician II is to undertake routine laboratory testing, preparation of testing reagents and equipments.

Question:

What is the amount of resources earmarked for helping fishermen develop offshore fishing and other sustainable fisheries?

Asked by: Hon. WONG Yung-kan

Reply:

A provision of \$4.5 million has been earmarked in 2007-08 for providing technical support, liaison services and training, and administering of credit facilities to help fishermen develop offshore fishing and other sustainable fisheries. Low interest loans under the Fisheries Development Loan Fund with an approved commitment of \$250 million are made available for application by local fishermen for the purpose. Moreover, fishermen may apply to the Marine Fish Scholarship Fund for sponsorships to attend the relevant training courses.

Question:

What is the amount of resources earmarked for conserving the local fisheries resources?

Asked by: Hon. WONG Yung-kan

Reply:

A provision of \$13.9 million has been earmarked in 2007-08 for the management and conservation of fisheries resources through conducting regular patrols and taking enforcement actions to combat destructive fishing practices, deployment and monitoring of artificial reefs, monitoring of local fisheries resources, and implementation of relevant educational and publicity activities. In addition, we will continue the exercise to formulate a suitable framework for regulating fishing activities in Hong Kong waters with a view to conserving local fisheries resources.

Question:

The estimate for 2007-08 is 38.9% (\$185.5 million) higher than the revised estimate for 2006-07. What are the amounts of provision earmarked for the prevention and control of avian influenza, combating animal smuggling and enhancing veterinary care of animals caught and detained at animal management centres respectively?

Asked by: Hon. EU Yuet-mee, Audrey

Reply:

Of the additional provision of \$185.5 million for 2007-08:

- (i) \$21.5 million is earmarked for enhancing the avian influenza (AI) surveillance programme, including the collection of dead wild birds for AI testing, enforcement of the ban on the keeping of backyard poultry, regulatory control of keeping poultry for exhibition and for establishing detector dog teams to combat animal smuggling, and
- (ii) \$1.2 million is earmarked for enhancing veterinary care of animals caught and detained at animal management centres; besides, to strengthen law enforcement action against cruelty to animals and to further promote animal welfare, we have earmarked another \$2 million for these tasks.

Controlling Officer: Permanent Secretary for Health, Welfare and Food (Food and
Environmental Hygiene)

Director of Bureau: Secretary for Health, Welfare and Food

Question:

On continuing to review and update the existing standards on food safety having regard to international practice and local needs under Matters Requiring Special Attention in 2007-08, please advise:

1. the projected expenditure required; and
2. whether the standards are reviewed and updated regularly. If so, the interval between each review and update. If not, please state the reasons.

Asked by: Hon. WONG Kwok-hing

Reply:

The information sought is provided as follows:

1. The detailed work is undertaken by the Centre for Food Safety at Food and Environmental Hygiene Department (FEHD). The Health, Welfare and Food Bureau (HWFB) provides a steer on the policy direction and coordination as necessary. The work is absorbed by existing resources in HWFB and the expenditure required cannot be separately identified.

2. The FEHD has been conducting regular review and update of food safety standards. The frequency of such reviews will depend on the need to meet with the objective of protecting consumers' interest in food safety and enhancing public health.

Question:

On continuing to develop proposals to prevent avian influenza outbreak under Matters Requiring Special Attention in 2007-08, please advise the projected expenditure required and details of the proposals.

Asked by: Hon. WONG Kwok-hing

Reply:

To prevent avian influenza outbreak, we will introduce legislative amendments in 2007-08 to control the importation of poultry eggs by requiring that they be accompanied with a health certificate and come from avian influenza free areas. We will also work closely with the Mainland, local and international experts to monitor the avian influenza outbreaks and possible mutation of the viruses in other parts of the world with a view to enhancing our preventive and control measures. We have earmarked a total of \$19.5 million as contingency funding to meet the expenditure for controlling avian influenza.

Question:

On introducing legislation to strengthen control over imported poultry eggs and farmed aquatic products under Matters Requiring Special Attention in 2007-08, please advise:

1. the legislative timetable;
2. the projected expenditure required; and
3. whether the Administration will also consider introducing legislation for recall of problem food.

Asked by: Hon. WONG Kwok-hing

Reply:

1. We plan to introduce legislation to regulate imported poultry eggs within 2007, to be followed by the regulation of imported farmed aquatic products. Consultation on farmed aquatic live and frozen products with our trading partners is underway and we hope to introduce new legislation in the 2007-08 legislative session.
2. The work is absorbed by existing resources and the expenditure cannot be separately provided.
3. We put forward a legislative proposal on the recall/prohibition of sale of unsafe food to the LegCo Panel on Food Safety and Environmental Hygiene in February 2007. We hope to introduce new legislation in 2008, subject to the progress of legal drafting and consultation with the trade.

Question:

On collaboration with the Mainland authorities to explore the feasibility of applying information technology to enhance the traceability of food under Matters Requiring Special Attention in 2007-08, please advise:

1. the timetable for the study;
2. the projected expenditure required;
3. how the study will help strengthen protection of food safety.

Asked by: Hon. WONG Kwok-hing

Reply:

1. We are in collaboration with the Mainland authorities in using Radio Frequency Identification (RFID) technology to enhance the traceability of food supplied by the Mainland to Hong Kong. This is a pilot programme to apply RFID in tracing live pigs imported from Guangdong. We aim to complete it within 2007 and we will assess the outcome of the pilot programme with a view to exploring the feasibility of applying such information technology (IT) to other food.
2. We are using existing manpower and resources to cover the pilot project on live pigs. So far, we committed about \$100,000 for purchasing hand-held detectors, gate-type readers, etc. for the pilot project.
3. The use of IT in food tracing is a worldwide trend, although it is also acknowledged that it is not a panacea for preventing all food incidents. However, enhancing food traceability will facilitate producers to take rectification action on the production line and relevant authorities to render more focused response in respect of food incidents targeted at specific problem areas in the supply chain.

Question:

On continuing to promote the sustainable development of local agriculture and fisheries industry under Matters Requiring Special Attention in 2007-08, please advise:

1. the details of the related measures or plans;
2. the projected expenditure required;
3. whether the Administration will step up assistance to the trade in respect of promotion and distribution network. If so, please advise details of the measures. If not, please state the reasons.
4. whether the Administration will set up a fund to finance or offer loan facilities to the trade to develop their business.

Asked by: Hon. WONG Kwok-hing

Reply:

1. The Government promotes the sustainable development of agriculture and fisheries through the provision of infrastructural support, technical assistance and advice, credit facilities and vocational training to local farmers and fishermen. The support measures are chiefly provided by the Agriculture, Fisheries and Conservation Department (AFCD). In relation to agriculture, the AFCD assists farmers to capture high-value market niches by promoting the development of organic farming and intensive greenhouse production, implementing the Accredited Farm Scheme, as well as developing brand names and marketing network for local agricultural products emphasizing good quality and food safety. In relation to fisheries, it has set up a Committee on Sustainable Fisheries to study the overall direction and long term goals for the fisheries industry and the viable strategies and options for the sustainable development of the industry.
2. A total of \$52.7 million has been earmarked under Head 22 for these tasks in 2007-08. Another \$3 million has been earmarked under Head 139 for conducting studies on measures to promote the sustainable development of the fisheries industry.
3. The AFCD will assist farmers marketing their produce to high end markets like hotels, health institutions, supermarket chains and specialty health food stores through the sales network of the Vegetable Marketing Organization. The department also promotes direct sale by farmers through agro-tourism and weekend farmer markets. In addition, the AFCD organizes regular promotional activities and exhibitions to promote local produce to consumers.

As regards fisheries, the AFCD helps fishermen and fish farmers to promote their products in conjunction with the Fish Marketing Organization through development of local brand names and marketing network as well as organizing promotional activities, emphasizing good quality to capture high-value market niches.

4. Low interest loans under various loan funds administered by the AFCD are made available to local farmers and fishermen for the development of sustainable operations. For instance, the Fisheries Development Loan Fund, with an approved commitment of \$290 million, is available for application by local fishermen and fish farmers for developing sustainable fisheries and aquaculture operations.

Question:

On the introduction of a nutrition labelling scheme for prepackaged food under Matters Requiring Special Attention in 2007-08, please advise:

1. the legislative timetable for the scheme;
2. the projected expenditure required for the scheme.

Asked by: Hon. WONG Kwok-hing

Reply:

1. We plan to introduce the legislation relating to the Labelling Scheme on Nutrition Information for prepackaged food in 2007-08.
2. There is no separate breakdown on the financial provision required for introducing the nutrition labelling scheme. The work is absorbed by existing resources in HWFB.

Question:

Regarding the total financial provision:

Compared with the revised provision of \$15.3 million for 2006-07, the total provision for 2007-08 has surged to \$63.4 million, representing an increase of 314.4%, which will be used mainly in strengthening food safety protection, prevention of zoonotic diseases and promoting the sustainable development of local fisheries industry. What are details of these initiatives? What are the respective expenditures of these three major initiatives? Please provide detailed projected expenditures for the measures under these three major initiatives.

Asked by: Hon. WONG Kwok-hing

Reply:

The increase in funding provides for all the major initiatives as listed in the section "Matters Requiring Special Attention in 2007-08". In brief, the major initiatives are to provide for expenditure under the Voluntary Surrender Scheme for pig farmers (\$20 million), provision of posts such as Senior Executive Officer, Senior Information Officer, etc. to strengthen food safety functions (\$5.59 million); consultancy study to promote sustainable development of local agricultural and fisheries industries (\$3 million) and contingency funding to meet expenditure for controlling avian influenza (\$19.5 million).

Question:

Regarding the total financial provision:

The total provision for 2006-07 has been revised up to \$15.3 million, representing an increase of 15% from the original estimate of \$13.3 million. Please explain.

Asked by: Hon. WONG Kwok-hing

Reply:

The increase mainly provides for expenses incurred in work related to the application of technology to enhance food traceability, promotion of prevention of cruelty to animals, consultancy work on quarantine issues, and organization of a major conference planned for June 2007 on port health, animal and plant quarantine and food safety participated by the relevant authorities from Guangdong, Hong Kong and Macao. The increased provision also covers the salary expenditure of a newly created post in the Bureau.

Question:

Regarding the total financial provision:

1. Compared with the revised provision of \$13 million for 2006-07, the total provision for 2007-08 has surged to \$20.6 million, representing an increase of 58.5%, which is used mainly for preparing the development of a Poultry Slaughtering and Processing Plant and strengthening support for other environmental hygiene-related initiatives. Please provide details of these measures.
2. Please provide the projected expenditures of these measures in detail.

Asked by: Hon. WONG Kwok-hing

Reply:

The increase in funding under Programme (3) "Environmental Hygiene" is for engaging a consultant to prepare for the tender documents for developing a Poultry Slaughtering and Processing Plant, stepping up education and publicity activities relating to vector-borne diseases, street/market cleansing, and meeting unexpected contingencies.

Question:

On invitation for tender to develop a Poultry Slaughtering and Processing Plant under Matters Requiring Special Attention in 2007-08, please advise:

1. the details and timetable of the project;
2. the projected expenditure required;
3. when the Poultry Slaughtering and Processing Plant will come into operation and how the Administration will ensure its compliance with environmental hygiene standards.

Asked by: Hon. WONG Kwok-hing

Reply:

1. The Government has identified a site in Sheung Shui for the development of the Poultry Slaughtering and Processing Plant (the Plant) under a "Build, Own, Operate and Transfer" approach. It is intended that the Plant would be run by a private operator on commercial principles. The Government intends to invite open tenders for developing the Plant from the private sector in end 2007 and to have the Plant coming into operation in 2009/10. The Government will appoint a consultant to prepare the tender documents soon.

2. As we have yet to appoint the consultant to prepare the tender documents, the information sought is not available.

3. To regulate the operation of the Plant, the Government plans to introduce a legislation in 2007 to provide for the licensing and operation of the Plant. The environmental hygiene standards that need to be complied by the Plant will be stipulated in the licensing conditions.

Director of Bureau: Secretary for Health, Welfare and Food

Question:

On implementation of measures to meet the increasing demand for columbarium and crematorium facilities under Matters Requiring Special Attention in 2007-08, please advise:

1. the projected expenditure required;
2. the details of these measures;
3. whether the Administration will purchase niches from private columbaria;
4. the measures may meet the projected demand for how many years.

Asked by: Hon. WONG Kwok-hing

Reply:

The information sought is provided as follows -

1. Policy work undertaken by the Health, Welfare and Food Bureau on issues related to columbarium and crematoria facilities will be absorbed by existing resources. The expenditure for the reprovisioning of 6 existing cremators in Diamond Hill and the construction of 22 700 new niches in Cheung Chau, Diamond Hill and Kwai Chung is estimated to be \$ 363.6 million.
2. In addition to the reprovisioning of cremators and provision of niches, the other measures include encouraging the public to scatter cremated human ashes in Gardens of Remembrance and promoting the greater use of scattering human ashes at sea.
3. The Administration has no plan to purchase niches from private columbaria. However, the Government will encourage the non-Government sector including private organizations to play a more active role in providing private columbaria for use by the public.
4. The cremators and niches in public columbaria will likely meet public demand for the next two years.

Question:

On considering ways to improve the occupancy and viability of public markets under Matters Requiring Special Attention in 2007-08, please advise:

1. the projected expenditure required;
2. the current occupancy rate of public markets;
3. whether the Administration has set any targets for the occupancy rate. If so, what are the targets? If not, why not?
4. whether the Administration plans to commission a consultancy study on the subject. If so, what is the projected expenditure?

Asked by: Hon. WONG Kwok-hing

Reply:

1. To improve the occupancy and viability of public markets, the government plans to spend around \$3 million (under Head 49 Food and Environmental Hygiene Department) on market promotion and \$103 million (under Capital Works Reserve Fund) on general improvement works in 10 markets in 2007-08.
2. The occupancy rate of public markets as at 31.1.2007 is 76.3%.
3. The Administration has set the target for the occupancy rate at 76%.
4. The Administration has no plan to commission a consultancy study on the subject.

Question :

Under the indicator "blood samples taken from poultry for testing of avian influenza H5 antibodies", the number of samples fell from 87 452 in 2006 to the estimated figure of 82 000 in 2007. What are the reasons for the decrease?

Asked by : Hon. WONG Kwok-hing

Reply :

The number of blood samples estimated to be taken in 2007 is based on the current number of live poultry supplied from the Mainland. The total number of samples taken in 2006 was greater because the number of imported chicken during the period January to March 2006 was 30 000 per day. Since April 2006, the number has been adjusted to 20 000 per day.

With regard to the 125 posts to be created under this programme in 2007-08, please advise on:

1. the estimated expenditure involved;
2. whether these 125 posts are permanent posts, their respective ranks and relevant duties.

Asked by : Hon. WONG Kwok-hing

Reply :

In 2007-08, there will be a net increase of 125 posts under this programme. This involves the creation of 127 posts and the deletion of 2 posts. The overall annual salary is \$37.2 million. The posts to be created are permanent posts relating to the grades of Chemist, Field Officer, Health Inspector, Pest Control Assistant, Pest Control Officer, Science Laboratory Technician, Scientific Officer (Medical), Veterinary Officer and administrative support posts. The main duties of these posts are to perform food safety regulatory functions and provide pest control services.

Question :

In view of the spate of food incidents in recent years, please advise if the Administration will make use of the additional provision under this programme (an increase of \$85.1 million over 2006-07) to increase the number of food samples taken for testing in its regular food surveillance programme?

Asked by : Hon. CHEUNG Yu-yan, Tommy

Reply :

The original estimated number of food samples to be taken for testing in 2006 as shown in the 2006-07 Estimate was 63 000. For 2007, the Administration will enhance its food surveillance work, including taking 65 000 samples for testing under the food surveillance programme, as well as taking additional samples in response to food complaints and food incidents; and strengthen the existing food safety functions, including import control, veterinary input in the management of local slaughterhouses and risk communication capabilities.

Director of Bureau : Secretary for Health, Welfare and Food

Question :

The Administration has planned to establish a Food Safety Testing Laboratory in 2007-08 to provide support to the work of the Food and Environmental Hygiene Department. As such, there should be a sharp increase in the number of food samples to be taken for testing. However, under this programme, the indicator for food samples taken for testing is 65 000, which is similar to the actual number for 2006. Please explain why there is no corresponding significant increase in the number.

Asked by : Hon. CHEUNG Yu-yan, Tommy

Reply :

The Food Safety Testing Laboratory planned to be established under the Government Laboratory in 2007-08 will provide enhanced and timely laboratory support for the increasing number of food samples tested in relation to food complaints, food incidents and food surveillance. The original estimated number of food samples to be taken for testing under the food surveillance programme in 2006 as shown in the 2006-07 Estimate was 63 000. A total of 65 000 samples is planned for testing in 2007. Additional samples will also be taken in response to food complaints and food incidents.

Controlling Officer: Permanent Secretary for Health, Welfare and Food (Food and Environmental Hygiene)

Director of Bureau: Secretary for Health, Welfare and Food

Question:

Please explain why the number of directorate post will rise from six at 31 March 2007 to seven at 31 March 2008 and advise the rank and duties of the newly created directorate post.

Asked by: Hon. CHEUNG Yu-yan, Tommy

Reply:

At present there is only one Administrative Officer Staff Grade C (AOSGC) post responsible for food safety matters in the Food and Environmental Hygiene Branch of Health, Welfare and Food Bureau. With the increased workload due to rise in food incidents and need to develop new policy and legislative proposals, there is a need to create an additional AOSGC post in 2007-08 to strengthen policy support and coordination work. We intend to create the post to review the set-up and work of the Centre for Food Safety (CFS) under the Food and Environmental Hygiene Department with a view to further improving its structure and strategies for safeguarding food safety (including the launching of new legislation, communication with the trade and public etc). It is also expected that new policy initiatives on food safety will need to be launched and more coordination work within Government and with the Mainland is required.

Director of Bureau: Secretary for Health, Welfare and Food

Question:

As stated in the Matters Requiring Special Attention in 2007-08, the Administration will establish a Food Safety Testing Laboratory. In this connection, will the Administration inform this Committee of the provision required, the annual estimated expenditure, scope of work, staffing establishment and the additional staff involved?

Asked by: Hon. CHEUNG Yu-yan, Tommy

Reply:

The Food Safety Testing Laboratory (FSTL) is expected to commence operation in July 2007 and the estimated recurrent provision in 2007-08 is \$49.9 million. The annual expenditure for subsequent years is estimated at \$44.9 million.

The Food Safety Testing Laboratory will perform a wide range of chemical analysis of food products, ranging from major components to additives, contaminants, agricultural and veterinary residues, and genetically modified ingredients.

The staffing establishment of the FSTL consists of 23 professional and 60 technical posts. Of these, 12 professional and 26 technical posts are additional.

As stated in Matters Requiring Special Attention in 2007-08, the Administration will establish a Food Safety Testing Laboratory. In this connection, will the Administration inform this Committee whether provision would be earmarked for introducing advanced and practical testing methods? Please elaborate with examples.

Asked by: Hon. CHEUNG Yu-yan, Tommy

Reply:

In connection with the setting up of the Food Safety Testing Laboratory in 2007-08, a provision of \$17 million has been earmarked for the laboratory to acquire additional instruments to strengthen the analytical capability for food samples. These include:

- (a) an integrated liquid chromatograph – tandem mass spectrometer (LC-MS/MS) system to provide extended analytical support to the Centre for Food Safety on the testing of veterinary drugs / chemical residues in fish tissues and aquaculture products at trace levels;
- (b) additional LC-MS/MS systems to facilitate the affirmative determination of low levels of food additives such as artificial sweeteners and colouring matters;
- (c) a scanning electron microscope for the testing of food complaint samples; and
- (d) a computerised microplate spectrophotometer will also been acquired for conducting high throughput detection of food allergens. Other new equipment include a high resolution inductively coupled plasma – mass spectrometer for the testing of trace element and an automated liquid handling system to provide a precise and labour saving platform for setting up real-time Polymerase Chain Reactions for the detection of genetically modified food.

Question:

As stated in Matters Requiring Special Attention in 2007-08, the Administration will establish a Food Safety Testing Laboratory. In this connection, will the Administration inform this Committee of the estimated annual capacity of the Laboratory in testing food samples; the increase in testing capacity as compared with the level before the Laboratory is established; and the estimated percentages of samples originating respectively from complaint cases, regular surveillance programme, emergency cases and imported foodstuffs?

Asked by: Hon. CHEUNG Yu-yan, Tommy

Reply:

The estimated number of tests to be performed by the Food Safety Testing Laboratory in 2007 is 142 000, for the testing of 36 200 food samples collected by the Food and Environmental Hygiene Department. This represents an increase of 11.8% from 2006. The percentage of samples originating from complaint cases and regulatory compliance in 2006 was 11.5% and 88.5% respectively, and the estimation for 2007 is respectively 8.5% and 91.5%. The percentages attributable to emergency cases and imported foodstuff are included in the percentage for regulatory compliance and cannot be separately identified.

Question:

As stated in Matters Requiring Special Attention in 2007-08, the Administration will establish a Food Safety Testing Laboratory. In this connection, will the Administration inform this Committee to what extent it is estimated that testing can be speeded up upon the setting up of the laboratory? Why are the indicators for the reporting of tests performed on food poisoning samples and food complaint samples under this programme not raised accordingly?

Asked by: Hon. CHEUNG Yu-yan, Tommy

Reply:

The target completion/reporting time of one working day for all tests relating to food poisoning cases is already 100% met and cannot be raised.

The performance pledge for all tests relating to food complaints is that 80% of these cases should be completed/reported within 25 working days. Due to the increasing workload on food complaint cases and the higher level of complexity of these cases, the actual performance in 2006 only reached 75%. The setting up of the Food Safety Testing Laboratory would help achieve the 80% performance pledge in 2007-08.

Subhead (No. & title):

Controlling Officer: Government Chemist

Director of Bureau: Secretary for Health, Welfare and Food

Question:

As shown in the indicators for statutory testing regarding the performance measures in paragraph 5 under the Brief Description of Programme (1), the number of tests performed on food samples is estimated at 130 000 in 2007, representing an increase of 17 579 or 15.6% over the actual number of tests performed in 2006. In this connection, please advise this Committee of the numbers of tests performed in the past five years on food samples and the costs to be incurred.

	2002	2003	2004	2005	2006
Number of tests performed on food samples					
Total costs incurred

Question:

As mentioned in Matters Requiring Special Attention in 2007-08, the Administration is planning to establish a Food Safety Testing Laboratory to cope with the increasing demand for analytical services from the Food and Environmental Hygiene Department. In this connection, please list in the table the number (with total strength of the Laboratory), rank, job title, spectrum of duties and annual payroll cost of staff to be employed.

Number of staff	Rank / Job Title	Spectrum of Duties	Annual Payroll

Asked by: Hon. KWOK Ka-ki

Reply:

In addition to the deployment of 45 existing posts, 38 additional posts will be created in 2007-08 for staffing the Food Safety Testing Laboratory. The breakdown of the 38 new posts is as follows-

Number of staff	Rank	Duties	Emoluments
2	Senior Chemist	To administer the Section that provides analytical and advisory services pertaining to the analysis of food samples.	1,858,440
10	Chemist	To take charge of the Unit of the Section and be responsible for the examination of food samples. To supervise Science Laboratory Technician Is and IIs.	5,680,200
6	Science Laboratory Technician I	To assist the Chemist in the management of the Unit, to check test results submitted by Science Laboratory Technician IIs, and to undertake the regular maintenance of laboratory equipment. To carry out analysis of routine and non-routine samples.	2,190,960
20	Science Laboratory Technician II	To carry out analysis of routine samples under the supervision of the Chemist.	4,322,400

Question:

Under Matters Requiring Special Attention in 2007-08, it is mentioned that a Food Safety Testing Laboratory will be established to cope with the increasing demand for analytical services from the Food and Environmental Hygiene Department. In this regard, please inform this Committee upon the establishment of the Food Safety Testing Laboratory, how will its task of testing food samples be delineated from that of the Government Laboratory and the Centre for Food Safety of the Food and Environmental Hygiene Department in terms of manpower deployment, category and number?

Asked by: Hon. KWOK Ka-ki

Reply:

The Food Safety Testing Laboratory (FSTL) will be established in 2007-08 under the Government Laboratory (GL) to primarily support the Centre for Food Safety's general requirement for chemical analysis of food products for regulatory compliance/surveillance purposes and investigation of food complaints. The estimated number of tests to be performed in 2007 is 142 000.

On the other hand, the Centre for Food Safety (CFS) is responsible for conducting chemical tests at Man Kam To Food Control Office (MKTFCO), to assess the safety of imported fresh produce (mainly vegetables) from the Mainland. It also operates a Food Research Laboratory to support its food risk assessment and standard setting work on project basis. The estimated number of samples to be taken for these purposes is over 15 000 in 2007.

Controlling Officer : Director of Food and Environmental Hygiene

Director of Bureau : Secretary for Health, Welfare and Food

Question :

Are there any effective measures to eradicate the hawker blackspots?

Asked by : Hon. LI Wah-ming, Fred

Reply :

Hawker Control Team (HCT) staff adopt the operational strategies of mobile patrol and/or raiding to deter unlicensed hawking. In mobile patrol, the HCT deploy the tactics of constantly disrupting the target hawkers from trading at their favourite spots and to prevent the hawkers from taking root . If the hawkers persist in trading and do not disperse, arrest action would follow.

HCT staff also mount raiding operations at target blackspots to arrest hawkers and seize their goods and equipment to increase the deterrent effect.

Question :

With regard to the “target” of “dealing with complaints of illegal hawking in built-up areas within 30 minutes”, how many complaints were received in 2006? What are the criteria to evaluate whether the dispersal was successful? Based on those criteria, how many complaints for which dispersal of illegal hawkers was successful?

Asked by : Hon. LI Wah-ming, Fred

Reply :

A total of 12,565 complaints of illegal hawking in built-up areas were received in 2006. The Hawker Control Team (HCT) staff take stringent enforcement action against those hawkers found selling prohibited/restricted food or cooked food or trading at main thoroughfares and areas with high pedestrian flow causing obstruction. If the hawking activity does not fall under the above circumstances, the HCT staff normally issue verbal warning and disperse the hawkers. If the warning is not heeded, arrest and prosecution action would follow.

Under normal circumstances, the illegal hawkers would be dispersed upon the arrival of the HCT staff in dealing with the complaints.

Question :

Regarding the indicator for “vehicles carrying poultry inspected at Man Kam To”, the number of inspections falls year by year. What are the reasons for the decrease?

Asked by : Hon. LI Wah-ming, Fred

Reply :

The estimated number of vehicles carrying poultry inspected at Man Kam To in 2007 is based on the current number of live poultry supplied from the Mainland which is set at 20 000 live chickens per day. The number of imported live poultry has been decreasing as a result of the Government's measures to minimize the occurrence of avian influenza in Hong Kong.

Question :

With regard to the “indicator” for poison treatment of rodent infestation in building blocks, what yardstick is used by FEHD to ascertain that poison treatment is an effective way to reduce rodent infestation?

Asked by : Hon. LI Wah-ming, Fred

Reply :

Poison treatment is used in building blocks under a systematic programme. Staff of the Department conduct surveys regularly in the area to assess the degree of rodent problem. Rodent signs such as droppings, smears, footprints and gnawing marks found are useful indicators to show the effectiveness of the control work. The treatment will be concluded when fresh sign of rodent activities no longer exists.

Programme: (3) Animal, Plant and Fisheries Regulation and Technical Services

Controlling Officer: Director of Agriculture, Fisheries and Conservation

Director of Bureau: Secretary for Health, Welfare and Food

Question:

Please inform this Committee of the expected rise in successful detection rate following the setting up of dog teams. What is the basis for this estimation?

Asked by: Hon. LI Wah-ming, Fred

Reply:

According to overseas experience, quarantine detector dogs are very useful in combating smuggling of animals. Detector dogs can screen a large number of passengers or cargos. Information data from overseas quarantine authorities such as the Australian Quarantine and Inspection Services (AQIS) indicates that each dog can practically screen 300 passengers per hour.

The Agriculture, Fisheries and Conservation Department will launch a pilot quarantine detector dog programme comprising 3 handlers and 3 dogs. According to the Australian experience, the performance of a quarantine detector dog program can be assessed using the number of inspection of passengers or cargos, the accuracy of the detection by the quarantine detector dogs and the awareness of the programme in the community.

Since the dogs would act as a visual deterrent against smuggling and also serve an educational role regarding the importance of quarantine, this should lead to a decrease in smuggling activity. In this connection, we do not have an expected successful detection rate because the number of seizures would just be one of the indicators for assessing the effectiveness of the programme.

Question:

On inviting tender to develop a Poultry Slaughtering and Processing Plant under Matters Requiring Special Attention in 2007-08, please inform this Committee:

1. details of the project, including tender conditions and projected expenditure. Will the tender conditions include preferential recruitment for live poultry traders who have applied to surrender their licences voluntarily and their workers? Will there be a condition for opening a production line for freshly slaughtered warm chickens?
2. What is the background of the consultant commissioned to prepare the tender documents? How much does the consultant fee cost?
3. How many Submission of Expressions of Interest have the authorities received?
4. When will the tender process commence?
5. Is there any provision for setting up an assistance fund or paying compensation to poultry traders who are still in the trade at present and their workers after the tendered construction works commences?

Asked by: Hon. CHEUNG Yu-yan, Tommy

Reply:

1. The Government has identified a site in Sheung Shui for the development of the Poultry Slaughtering and Processing Plant (the Plant) under a "Build, Own, Operate and Transfer" approach. We have yet to prepare the tender documents and the tender conditions are therefore not available.
2. We have yet to appoint the consultant and the information sought is not available.
3. The Government has received six submissions of Expression of Interest.
4. The Government intends to invite open tenders from the private sector to develop the Poultry Slaughtering and Processing Plant in end 2007.
5. We will give consideration in due course to making arrangements relating to ex-gratia payments for the parties affected.

Controlling Officer: Permanent Secretary for Health, Welfare and Food (Food and Environmental Hygiene)

Director of Bureau: Secretary for Health, Welfare and Food

Question:

Compared with 2006-07, the provision for this programme in 2007-08 has tripled and increased by \$48.1 million, which is mainly due to additional provision for strengthening food safety, preventing zoonotic diseases and promoting sustainable development of local fisheries industry. What are the respective provisions for these three items? And what are the respective salary provisions under each of these items?

Asked by: Hon. CHEUNG Yu-yan, Tommy

Reply:

The increase in funding provides for all the major initiatives as listed in the section "Matters Requiring Special Attention in 2007-08". In brief, the major initiatives are to provide for expenditure under the Voluntary Surrender Scheme for pig farmers (\$20 million), provision of posts to strengthen food safety functions (\$5.59 million); consultancy study to promote sustainable development of local agricultural and fisheries industries (\$3 million) and contingency funding to meet expenditure for controlling avian influenza (\$19.5 million).

A total provision of \$5.59 million has been made to pay for the post of the Permanent Secretary for Health, Welfare and Food (Food and Environmental Hygiene) as well as five new posts required to launch the initiatives in this Programme and Programme (3) Environmental Hygiene. We intend to create an additional AOSGC responsible for reviewing the set-up and work of the Centre for Food Safety under the Food and Environmental Hygiene Department with a view to further improving its structure and strategies for safeguarding food safety (including the launching of new legislation, communication with the trade and public etc.) It is also expected that new policy initiatives on food safety will need to be launched and more coordination work within Government and with the Mainland is required. An additional SEO will provide the necessary executive support to the Bureau in particular the management of resources deployed to the food safety front while an additional SIO is responsible for handling publicity and media initiatives to address public concerns relating to food incidents and food safety policies. The new posts of PA and the Chauffeur will respectively provide secretarial support and transport service to the Permanent Secretary for Health, Welfare and Food (Food and Environmental Hygiene).

Welfare and Food Bureau (Food and
Environmental Hygiene Branch)

Programme: (2) Agriculture, Fisheries and Food Safety

Controlling Officer: Permanent Secretary for Health, Welfare and Food (Food and Environmental Hygiene)

Director of Bureau: Secretary for Health, Welfare and Food

Question:

Please advise the Committee on the following:

Additional provision is made for this Programme in 2007-08 to prevent zoonotic diseases. What are the diseases covered under this item? Do they include avian influenza, porcine streptococcus and clostridium chauvoei recently discovered in livestock in Japan? What are the prevention measures prescribed for individual diseases? Furthermore, if avian influenza is included, why is it necessary to make additional provision to strengthen work in this respect in 2007-08, given that we have already achieved zero infection in local farms and markets after years of efforts and continual increase in resources provision. How will the Administration assess the cost effectiveness of such measures?

Asked by: Hon. CHEUNG Yu-yan, Tommy

Reply:

The major zoonotic diseases covered under this Programme are Avian Influenza, West Nile Virus, Streptococcus Suis, Japanese encephalitis, Food and Mouth Disease and Rabies. We are also working with the relevant Departments to monitor any new and emerging zoonotic diseases, including streptococcus, etc. The Health, Welfare and Food Bureau will provide policy steer to the relevant Departments on the implementation of monitoring and preventive measures for these diseases, including surveillance on local farms, import control protocol for importation of live animals and animals products, anti-smuggling measures for live animals and meat, inspection of live poultry stores, pet shops and animal breeders, etc.

As for the prevention of avian influenza, the continuous outbreaks of avian influenza in our neighbouring areas point to the continued need to provide sufficient resources, including contingency funding, for making timely responses to any outbreak of avian influenza in Hong Kong.

Department

Programme: (1) Agriculture, Fisheries and Fresh Food Wholesale Markets

Controlling Officer: Director of Agriculture, Fisheries and Conservation

Director of Bureau: Secretary for Health, Welfare and Food

Question:

The revised estimate for 2006-07 is 36.7% less than the original estimate. Please inform this Committee of the reasons for the substantial decrease in the estimate.

Asked by: Hon. CHAN Wai-yip, Albert

Reply:

The 2006-07 Revised Estimate for Programme (1) is \$238.1 million, which is \$138 million (or 36.7%) lower than the 2006-07 Original Estimate of \$376.1 million. The decrease is mainly due to a lower cash payment estimated for ex-gratia payment for the voluntary licence surrender scheme for local live poultry farmers. The application period of the scheme ended in August 2006 and the approved participants would all vacate their farms and collect payment towards end April and early May 2007.

Controlling Officer: Director of Agriculture, Fisheries and Conservation

Director of Bureau: Secretary for Health, Welfare and Food

Question:

The revised estimate for 2006-07 is 189% more than the original estimate. Please inform this Committee of the reasons for the substantial increase in the estimate.

Asked by: Hon. CHAN Wai-yip, Albert

Reply:

The 2006-07 Revised Estimate for Programme (3) is \$476.8 million, which is \$311.8 million (or 189% increase) over the 2006-07 Original Estimate of \$165 million. The increase is mainly attributable to the non-recurrent expenditure amounting to \$308.4 million for ex-gratia payment to pig farm licencees and one-off grant to assist affected pig farms and live pig transport workers under the Voluntary Surrender Scheme (VSS). The VSS is a one-year scheme which started on 1 June 2006 for pig farmers to receive an ex-gratia payment in return for surrendering their livestock keeping licences, and for local live pig transporters to receive a loan for switching to other transport business.

The remainder of \$3.4 million is mainly to meet increased expenditure for the collection service of dead birds referred from the general public.

Programme : (1) Food Safety and Public Health

Controlling Officer : Director of Food and Environmental Hygiene

Director of Bureau : Secretary for Health, Welfare and Food

Question :

As the many food poisoning cases occurred in recent years which pose health hazards to the public involved improper handling of food during food preparation in food premises, please advise on whether briefings and training on proper food handling process are provided for food handlers, and if so, the financial provision for 2007-08 and the estimated number of food handlers who will be benefited.

Asked by : Hon. HO Chung-tai, Raymond

Reply :

Under the Hygiene Manager and Hygiene Supervisor (HS) Scheme launched in May 2005, the Department has provided free HS training courses for food handlers of licensed food premises and will continue to do so in 2007-08. The financial provision for the HS courses in 2007-08 is estimated to be \$0.7 million and the estimated number of food handlers who will attend the training is 6 000.

Head : 49 Food and Environmental Hygiene Department

Subhead (No. & title) :

Programme : (1) Food Safety and Public Health

Controlling Officer : Director of Food and Environmental Hygiene

Director of Bureau : Secretary for Health, Welfare and Food

Question :

Provision for 2007-08 is \$85.1 million (13.7%) higher than the revised estimate for 2006-07. This is mainly due to additional provision for enhancing food safety and public health efforts. There will be a net creation of 125 posts in 2007-08. In this connection, please advise on the post titles, functions and the estimated expenditure of these 125 posts, as well as the expenditure for enhancing food safety and public health efforts.

Asked by : Hon. CHAN Wai-yip, Albert

Reply :

In 2007-08, there will be a net increase of 125 posts under this programme. The posts to be created are Chemist, Field Officer, Health Inspector, Pest Control Assistant, Pest Control Officer, Science Laboratory Technician, Scientific Officer (Medical), Veterinary Officer and other administrative support grades. The main duties of these posts are to perform food safety regulatory functions and pest control services. The net annual salary is \$37.2 million.

The increase in 2007-08 estimated expenditure under this programme is mainly to cater for the following –

- (a) enhancing food safety regulatory functions such as food import control, food safety risk communication capabilities and strengthening veterinary input in the management of local slaughterhouses;
- (b) increased capital expenditure such as population-based food consumption survey, integrated mass spectrometer system;
- (c) upgrading equipment for operation in slaughterhouse; and
- (d) enhancing pest control services and surveillance.

Head: 48 Government Laboratory
Programme: (1) Statutory Testing

Subhead (No. & title):

Controlling Officer: Government Chemist

Director of Bureau: Secretary for Health, Welfare and Food

Question:

In view of the frequent food problems found recently, please advise this Committee how many food complaint cases were received in 2006-07; in that connection, how many food samples on which tests were successfully performed; and how much the cost involved was. Also, would the Administration explain why the indicator for the number of tests performed on food complaint samples in the 2007-08 Estimates is lowered by 2 604 to 12 000, as compared with the actual figure in 2006?

Asked by: Hon. EU Yuet-mee, Audrey

Reply:

In 2006, the Food and Environmental Hygiene Department received about 5 860 food complaints and the Government laboratory conducted 14 600 tests on 2 880 food complaint samples.

In projecting the number of test to be 12 000 for 2007, we have taken into account the estimated workload of 10 000 for 2006. Regardless of the estimation, we will cope with the actual test requirement, even if they exceed the amount estimated.

Question:

In view of the frequent food problems found recently, please advise this Committee the number of staff involved in food testing and the related staff cost in 2006-07. Under the 2007-08 Estimates, will the Administration recruit additional staff for the enhancement of food testing? If yes, how many will be recruited? In this regard, how much will the expenditure be?

Asked by: Hon. EU Yuet-mee, Audrey

Reply:

The 2006-07 staffing establishment relating to food safety consists of 11 professional staff and 34 technical staff. The revised estimate of recurrent expenditure in 2006-07 for food safety is \$26 million. 38 additional new posts, which include 12 professional staff posts and 26 technical staff posts, will be created in 2007-08 for enhancement of food safety. The additional recurrent provision required for the creation of these 38 new posts in 2007-08 is \$13.5 million.

Director of Bureau: Secretary for Health, Welfare and Food

Question:

In connection with the total financial provision, the provision for 2007-08 has been significantly increased to \$119.4 million, 58.4% higher than the revised provision of \$75.4 million for 2006-07. It is mainly due to the additional provision for creating 48 posts for enhancement of food safety and meeting other operational needs. Would the Administration advise whether the 48 posts are permanent ones and provide information on their respective ranks and work portfolios?

Asked by: Hon. WONG Kwok-hing

Reply:

A total of 48 permanent posts will be created in 2007-08 under this Programme. The breakdown of these 48 civil service posts is as follows :-

Number of staff	Rank	Work portfolios
2	Senior Chemist	To administer the Section that provides analytical and advisory services pertaining to the analysis of food samples.
14	Chemist	To take charge of the Unit of the Section and be responsible for the examination of food/ drug/ Chinese medicine samples. To supervise Science Laboratory Technician Is and IIs.
6	Science Laboratory Technician I	To assist the Chemist in the management of the Unit, to check test results submitted by Science Laboratory Technician IIs, and to undertake the regular maintenance of laboratory equipment. To carry out analysis of routine and non-routine samples.
26	Science Laboratory Technician II	To carry out analysis of routine samples under the supervision of the Chemist.

Question:

The Administration will increase provision for promoting sustainable development of local fisheries industry. Please provide the details, including means of promotion and benchmarks against which their effectiveness may be gauged.

Asked by: Hon. CHEUNG Yu-yan, Tommy

Reply:

The Government promotes the sustainable development of the local fisheries industry through the provision of infrastructural support, technical assistance and advice, credit facilities and vocational training to local fishermen. The support measures are chiefly provided by the Agriculture, Fisheries and Conservation Department (AFCD). A total of \$34.4 million has been earmarked under Head 22 for these tasks in 2007-08. Another \$3 million has been earmarked under Head 139 for conducting studies on measures to promote the sustainable development of the fisheries industry. The AFCD has set up a Committee on Sustainable Fisheries to study the overall direction and long term goals for the fisheries industry and the viable strategies and options for the sustainable development of the industry. The AFCD also helps fishermen and fish farmers to promote their products in conjunction with the Fish Marketing Organization through development of local brand names and marketing network as well as organizing promotional activities, emphasizing good quality to capture high-value market niches. AFCD would closely monitor the response and views of the trade in assessing the effectiveness of the measures.

Head : 49 Food and Environmental Hygiene Department

Subhead (No. & title) :

Programme : (3) Market Management and Hawker Control

Controlling Officer : Director of Food and Environmental Hygiene

Director of Bureau : Secretary for Health, Welfare and Food

Question :

During 2007-08, the Food and Environmental Hygiene Department will extend the scheme on contracting out market management to two additional districts, namely Southern and Tuen Mun districts. In this connection, please advise on:

1. the estimated expenditure involved;
2. the date the scheme commences;
3. the manpower savings, if any;
4. the selection criteria for these two districts.

Asked by : Hon. WONG Kwok-hing

Reply :

- (1) Contracts for market management services are awarded through open tender. The tender exercise has yet to commence and information on estimated expenditure will only be available after its completion.
- (2) The scheme on contracting out market management of Southern and Tuen Mun districts is scheduled to commence in October 2007.
- (3) We expect manpower savings of around 43 staff when the scheme has been extended to Southern and Tuen Mun districts. The incumbent staff will be gainfully redeployed.

- (4) In outsourcing market management services, we aim to minimize disruption to the on-going operations in the markets. The cleansing contracts for the current markets/cooked food centres in Southern and Tuen Mun districts will expire in 2007-08, thereby offering an opportunity to outsource the management services in these markets/cooked food centres.

1205

Programme : (1) Agriculture, Fisheries and Fresh Food Wholesale Markets

Controlling Officer : Director of Agriculture, Fisheries and Conservation

Director of Bureau : Secretary for Health, Welfare and Food

Question :

The total financial provision will increase substantially by \$120.2 million (50.5%) to \$358.3 million in 2007-08 from \$238.1 million in 2006-07. Please inform this Committee of the reasons for the increase and provide details on the estimated expenditures involved.

Asked by : Hon. WONG Kwok-hing

Reply :

The increase is mainly due to: the provision of \$5.7 million for enhancing the testing capacity of the veterinary laboratory, \$9.6 million for setting up a voluntary registration scheme for local pond fish farms and carrying out surveillance of chemical residues in fish cultured in local fish farms, \$18.0 million for strengthening the management of government wholesale food markets and \$96.9 million more cash payment in the year for ex-gratia payment to live poultry farmers, wholesalers and related transporters and one-off grants to the affected live poultry farm, wholesale and transport workers under the Voluntary Surrender Scheme for the live poultry industry. The increase is partly offset by decrease of non-recurrent expenditure of \$8.9 million as a result of the completion of the Entry Registration Trial in Government Wholesale Markets and of \$1.1 million for the disbursement of the initial enforcement action for the banning of backyard poultry.

Head: 22 Agriculture, Fisheries and Conservation Subhead (No. & title):
Department

Programme: (1) Agriculture, Fisheries and Fresh Food Wholesale Markets

Controlling Officer: Director of Agriculture, Fisheries and Conservation

Director of Bureau: Secretary for Health, Welfare and Food

Question:

In connection with assisting farmers to capture high-value-market niches by providing technical advice on organic cultivation and intensive greenhouse production under Matters Requiring Special Attention in 2007-08, please answer these questions:

- (1) Apart from technical support in farming, will assistance be provided to farmers in expanding the sales network, marketing, wholesaling etc? If yes, what are the details? If no, what are the reasons?
- (2) Apart from technical advice, will financial assistance or loans be offered to them for their development in these areas? If yes, what is the amount of estimated expenditure involved? What are the details? If no, what are the reasons?

Asked by: Hon. WONG Kwok-hing

Reply:

- (1) The Agriculture, Fisheries and Conservation Department will continue helping local farmers market their produce to high end markets through the sale network of Vegetable Marketing Organization, encouraging direct sale by farmers through agro-tourism and weekend farmer markets and organizing promotional activities and exhibitions. In addition, the Department will also provide local farmers with training on sales and marketing skills and techniques.
- (2) The Department operates the Kadoorie Agricultural Aid Loan Fund, the J.E. Joseph Trust Fund and the Vegetable Marketing Organization Loan Fund to meet the credit needs of local farmers. A total sum of \$23 million is available at present.

Controlling Officer: Director of Agriculture, Fisheries and Conservation

Director of Bureau: Secretary for Health, Welfare and Food

Question:

In 2007-08, the Administration will formulate measures to promote sustainable development of the fisheries industry and to conserve fisheries resources in Hong Kong waters. What is the amount of resources earmarked for the conduct of environmental assessment so as to ensure the water quality and the quality of fishery catch?

Asked by: Hon. CHEUNG Chiu-hung, Fernando

Reply:

A provision of \$0.7 million has been earmarked in 2007-08 for provision of technical advice on environmental impact assessment studies and development proposals that may have impact on local fisheries resources and fishing operations. This service would help ensure that the quality of fishery catch would not be significantly affected by development works.

Head : 49 Food and Environmental Hygiene Department

Subhead (No. & title) :

Programme : (1) Food Safety and Public Health

Controlling Officer : Director of Food and Environmental Hygiene

Director of Bureau : Secretary for Health, Welfare and Food

Question :

Regarding the indicator for “blood samples taken from poultry for testing of avian influenza H5 antibodies”, the 2007-08 estimate number is 82 000 and the 2006 actual number is 87 452, showing a drop of 31 413 (27.69%) and 25 961 (22.9%) respectively as compared with the actual number of 113 413 in 2005. Please advise on the reasons for the decrease.

Asked by : Hon. CHAN Wai-yip, Albert

Reply :

The number of blood samples estimated to be taken in 2007 is based on the current number of live poultry supplied from the Mainland. The number of samples taken in 2005 was greater because the average number of imported chickens per day was 30 000 or more. Since April 2006, the number has been adjusted to 20 000 per day.

Head : 49 Food and Environmental Hygiene Department

Subhead (No. & title) :

Programme : (1) Food Safety and Public Health

Controlling Officer : Director of Food and Environmental Hygiene

Director of Bureau : Secretary for Health, Welfare and Food

Question :

Regarding the performance indicator for “blood samples taken from poultry for testing of avian influenza H5 antibodies”, the number of samples taken fell from 113 413 in 2005 to 87 452 in 2006. What are the reasons for the decrease? How will the Administration ensure that food safety is not affected?

Asked by : Hon. LAU Wai-hing, Emily

Reply :

The decrease in the number of blood samples taken in 2006 when compared with 2005 was due to the decrease in the number of imported chickens from the Mainland. Food safety and public health will not be compromised because each consignment of chicken will be tested using the same testing protocol.

Head: 48 Government Laboratory
Programme: (1) Statutory Testing

Subhead (No. & title):

Controlling Officer: Government Chemist

Director of Bureau: Secretary for Health, Welfare and Food

Question:

Please inform this Committee of the new initiatives (in terms of hardware, software and technical staffing) to be taken by the Administration to enhance the testing ability for food safety. What is the expenditure involved?

Asked by: Hon. WONG Yung-kan

Reply:

To strengthen the analytical capability relating to food safety, the Food Safety Testing Laboratory (FSTL) will be established in 2007-08 under the Government Laboratory (GL). The FSTL will perform a wide range of chemical analysis of food products for surveillance and verification of compliance with the statutory standards. It also provides analytical services related to food complaint cases.

A total of 38 posts will be created in 2007-08 for enhancement of food safety and a recurrent financial provision of \$49.9 million has been included in the 2007-08 Estimate for this purpose. A number of major instruments will be acquired by GL in 2007-08. These include an integrated liquid chromatograph – tandem mass spectrometer system to provide extended analytical support on the testing of veterinary drugs/chemical residues at trace levels, a scanning electron microscope for testing of food complaint samples and a high resolution inductively coupled plasma – mass spectrometer for testing of trace element.

Subhead (No. & title) : 603 Plant, vehicles and equipment

Programme :

Controlling Officer : Director of Food and Environmental Hygiene

Director of Bureau : Secretary for Health, Welfare and Food

Question :

Under this Subhead, the Food and Environmental Hygiene Department will purchase one integrated high resolution inductively coupled mass spectrometer system. Please advise on how this equipment will actually help with the laboratory work.

Asked by : Hon. WONG Yung-kan

Reply :

The Integrated High Resolution Inductively Coupled Plasma Mass Spectrometer System (HR-ICP-MS) is designed for accurate and precise measurement of chemicals such as cadmium and arsenic in foodstuffs, at very low level of chemical concentration. The addition of HR-ICP-MS will strengthen the existing analytical systems in FEHD for the purpose of supporting food risk assessment and standard setting work.

Question :

In 2007-08 how many in-house professional training will be organized by the Centre for Food Safety (CFS)? What will be included in the training? What is the expenditure involved? How many professionals of CFS will be trained?

Asked by : Hon. WONG Yung-kan

Reply :

In 2007-08, a total of about 52 training programmes will be provided for in-house staff of the Centre for Food Safety. These programmes will cover topics such as Food Safety Risk Analysis, Assessment and Communication, Food Safety Management, Food Import and Export Inspection, Food Additives, Food Labelling, Residues of Veterinary Drugs in Foods, Toxins and Food Allergens, Microbiological Control on Food of Animal Origin, Control of Vegetable Poisoning and Hazard Analysis Critical Control Point. The expenditure involved is about \$2.1 million. The total number of trainees is around 370, including Medical Officers, Chemists, Veterinary Officers, Scientific Officers, Health Inspectors, Field Officers and Registered Nurses.

Question :

In view of the increase in myiasis cases in recent years, what initiatives will be put in place by the Administration in 2007-08 to strengthen its fly disinfestation work? What is the expenditure involved?

Asked by : Hon. WONG Yung-kan

Reply :

The Department works closely with the Department of Health in following up myiasis cases. This includes prompt investigation and control measures around the premises concerned for each reported case. Besides, the Department will continue to carry out inspections at potential fly-breeding grounds such as refuse collection points and lanes and, in particular, in the vicinity of homes for the elderly.

There is no separate breakdown on expenditure for this programme.

Question :

Please advise on the details and expenditure involved in converting designated aqua privies into flushing toilets by phases in 2006-07, and the details and expenditure involved in this area in 2007-08.

Asked by : Hon. LEUNG Yiu-chung

Reply :

The conversion project covers 100 aqua privies in the New Territories and outlying islands and is being implemented by phases starting from early 2005. In 2006-07, 44 aqua privies were converted into flushing toilets. Conversion works for the last batch of 37 aqua privies are targeted for completion in 2007-08. The total estimated cost for the entire project is \$92.8 million.

Controlling Officer : Director of Food and Environmental Hygiene

Director of Bureau : Secretary for Health, Welfare and Food

Question :

Regarding the matters requiring special attention in 2007-08, please advise on the details and expenditure involved in market improvement works and market promotion carried out in 2006-07 as well as the details and expenditure for such works and promotion in 2007-08.

Asked by : Hon. LEUNG Yiu-chung

Reply :

In 2006-07, the Department carried out general improvement works in six markets. The estimated total project cost of these items added up to \$130.8 million. In 2007-08, the Department will carry out general improvement works in another 10 markets, at an estimated total cost of about \$103 million. These market improvement works include mainly upgrading of drainage, lighting, ventilation, signage and fire services provisions.

In 2006-07, the Department organized a range of promotional activities in public markets such as roving exhibitions, thematic workshops, festive decorations and promotions. Special promotional activities were held for four renovated/new markets. The Department also published quarterly newsletters to publicize the promotional activities. The total estimated expenditure involved in market promotion in 2006-07 is around \$3.3 million. In 2007-08, the Department will continue to carry out similar promotional activities in public markets and special programmes for renovated/new markets. The resources required can only be determined after consulting market tenants on the programme details and the expenditure incurred will be absorbed within the Department's allocation.

Question :

Regarding the matters requiring special attention in 2007-08, please advise on the details and expenditure involved in contracting out market management in 2006-07 as well as the details and expenditure in this area in 2007-08.

Asked by : Hon. LEUNG Yiu-chung

Reply :

In 2006-07, the management services for public markets in Kowloon City, Wong Tai Sin and Mong Kok are being contracted out at a total contract sum of \$41.7 million for a period of 2 years. The services include overall management, cleansing services, minor repairs and maintenance and security services as appropriate.

The Department plans to extend the scheme to all the public markets/cooked food centres in Southern District and Tuen Mun District in 2007-08. We will award the service contracts by open tender. Information on expenditure will only be available after completion of the tender exercise.

Director of Bureau: Secretary for Health, Welfare and Food

Question:

On collaborating with the Mainland authorities to explore the feasibility of applying information technology to enhance the traceability of food under Matters Requiring Special Attention in 2007-08, please provide the details, including timetable for the study, expenditure and manpower required and the scope of application.

Asked by: Hon. CHEUNG Yu-yan, Tommy

Reply:

We are in collaboration with the Mainland authorities in using Radio Frequency Identification (RFID) technology to enhance the traceability of food supplied by the Mainland to Hong Kong. This is a pilot programme to apply RFID in tracing live pigs imported from Guangdong. We aim to complete it within 2007 and we will assess the outcome of the pilot programme with a view to exploring the feasibility of applying such information technology to other food. The expenditure and manpower required will be assessed at a later stage.

So far, we are using existing manpower and resources to cover the pilot project on live pigs. We have committed about \$100,000 for purchasing hand-held detectors, gate-type readers, etc. and other equipment for the pilot project.

Director of Bureau: Secretary for Health, Welfare and Food

Question:

Regarding "animals vaccinated and quarantined" under the Indicators, please inform this Committee of the basis for the estimated decrease from 57 557 in 2006 to 41 140 in 2007.

Asked by: Hon. WONG Kwok-hing

Reply:

A dog will be vaccinated against rabies when it is licensed or relicensed. A dog licence is valid for three years. The increase in rabies vaccination in 2006 was mainly because a compulsory registration scheme was introduced in 2003 by the Housing Authority and a large number of dogs in the public housing estates were required to be re-licensed after three years.

The number of rabies vaccination in 2007 is estimated on the basis of the figure in 2005.

Question Serial No.

1695

Head: 22 Agriculture, Fisheries and Conservation Department
Subhead (No. & title):

Programme: (3) Animal, Plant and Fisheries Regulation and Technical Services

Controlling Officer: Director of Agriculture, Fisheries and Conservation

Director of Bureau: Secretary for Health, Welfare and Food

Question:

Following the implementation of the Voluntary Surrender Schemes for poultry and pig farms, the workload on farm inspection and farm licensing of the Agriculture, Fisheries and Conservation Department should decrease significantly. In this connection, please inform this Committee whether the Department has made any predictions on the decrease in inspections and the number of licences to be issued, as well as the amount of expenditure and manpower saved. Are there any plans to redeploy the manpower for enhancing other services? The livestock farm licences to be issued are expected to drop from 168 in 2006 to 58 in 2007, representing a significant decrease of 65%. What types of farms are involved? Please also give similar figures for pig farms.

Asked by: Hon. CHEUNG Yu-yan, Tommy

Reply:

The estimated number of livestock keeping licences to be issued in 2007-08 includes both pig and poultry farms.

Farm type	Pigs	Chickens	Pigeons	Total
Licensed in 2006-07	133	35	0	168
To be licenced in 2007-08	28	29	1	58

The drop in the number of license renewal/issuing in 2007-08 as a result of the implementation of the Voluntary Surrender Schemes (VSS) for livestock farms is, however, more than offset by the corresponding increase in workload arising from processing ex-gratia payment and one-off-grant applications under the VSS. We shall review the workload and resources requirement concerned by end 2007 upon conclusion of the VSS with a view to redeploying savings, if any, for enhancing other services.

Question:

Please inform this Committee of how many applications under the Voluntary Surrender Scheme for pig farms have been received and the amounts of ex-gratia payment involved since the scheme was introduced in 2006. Please provide figures of affected pig farms and live pig transport workers who have applied and the amounts of ex-gratia payment involved.

Asked by: Hon. CHEUNG Yu-yan, Tommy

Reply:

As at end February 2007, we received 122 applications from pig farmers for ex-gratia payment totalling \$386.9 million, and 34 applications from pig farm workers for one-off grant totalling \$612,000. There has been no application from pig transport workers.

Head: 22 Agriculture, Fisheries and Conservation Department Subhead (No. & title): 700 General non-recurrent

Programme:

Controlling Officer: Director of Agriculture, Fisheries and Conservation

Director of Bureau: Secretary for Health, Welfare and Food

Question:

As the Voluntary Surrender Scheme for live poultry farmers, wholesalers and related transporters ended in August 2006, please inform this Committee of the balance of the respective ex-gratia payments after assessing all the applications. Has the effectiveness of the Scheme been reviewed? If yes, please give the details.

Asked by: Hon. CHEUNG Yu-yan, Tommy

Reply:

The take-up rate and estimated expenditure on ex-gratia payment of the Scheme are provided below-

	Ex-gratia Payment (\$'million)		
	Farmer	Wholesaler	Transporter
Approved commitment	293	45.5	6
Estimated expenditure up to the conclusion of the scheme	203	9	0
Estimated balance	90	36.5	6
Take up rate in terms of number of operators (%)	73	18	0

The Scheme has led to a reduction of on-farm poultry population from some 3.7 million to 1.7 million, which has achieved our target and will in turn help in the prevention of avian influenza outbreak in Hong Kong.

Question:

The provision for 2007-08 under this programme is higher than the revised estimate for 2006-07. This is due to a number of reasons, including implementation of new avian influenza control measures and enhancement of the testing capacity on avian influenza. Please provide details on the new measures and targets, including the expenditure and manpower involved.

Asked by: Hon. CHEUNG Yu-yan, Tommy

Reply:

The additional provision under this Programme for new avian influenza (AI) control measures is \$21.5 million which provides for 13 new posts and other operational expenses for the enforcement of the ban on the keeping of backyard poultry, collection of dead wild birds for AI testing, and regulating the keeping of poultry for exhibition and setting up of detector dog teams to combat animal smuggling.

Head: 22 Agriculture, Fisheries and Conservation Subhead (No. & title):
Department

Programme: (1) Agriculture, Fisheries and Fresh Food Wholesale Markets

Controlling Officer: Director of Agriculture, Fisheries and Conservation

Director of Bureau: Secretary for Health, Welfare and Food

Question:

In connection with assisting fishermen to switch to sustainable fisheries operations and fish farmers to develop sustainable aquaculture through technical support services and credit facilities under Matters Requiring Special Attention in 2007-08, please answer these questions:

- (1) What are the details of the plan?
- (2) What is the estimated amount of expenditure involved? What are the amounts of expenditure for technical support services and credit facilities respectively?
- (3) What are the application criteria for credit facilities? What is the implementation date? What are the details?
- (4) Are there indicators for reviewing the results of the plan? How many fishermen/fish farmers are expected to be provided with loans?

Asked by: Hon. WONG Kwok-hing

Reply:

- (1) We assist fishermen to switch to sustainable fisheries operations and fish farmers to develop sustainable aquaculture through provision of technical advice, liaison services and training to help fishermen and fish farmers upgrade their skills and knowledge, draw up and assess the feasibility of their development plans. Loans at concessionary interest rates under the Fisheries Development Loan Fund (with an approved commitment of \$290 million) are made available for application by local fishermen and fish farmers for the purpose. Moreover, fishermen and fish farmers may also apply to the Marine Fish Scholarship Fund for sponsorships to attend relevant training courses.
- (2) A total of \$6.8 million has been earmarked for these tasks in 2007-08, including \$5.3 million for provision of technical support services and \$1.5 million for administration of the credit facilities.
- (3) Local fishermen who are interested to switch to other sustainable fisheries and local fish farmers who plan to develop sustainable aquaculture operations may apply to the Fisheries Development Loan Fund. Each application will be assessed on its individual merit according to vetting criteria including the technical feasibility and financial viability of the development proposal, loan security, credit history and repayment ability of the applicant. Upon the endorsement of the vetting criteria by the Fisheries Development Loan Fund Advisory Committee, we will invite applications from the fisheries industry.

- (4) We have not drawn up any indicator for this activity as whether local fishermen and fish farmers will pursue sustainable fisheries or aquaculture operations is a business decision of their own. This department will continue to assist them through provision of the above services and review these services as necessary to cope with the needs of the industry.

Question:

In connection with promoting environmentally-friendly culture practices under Matters Requiring Special Attention in 2007-08, please answer these questions:

- (1) What are the details of the plan?
- (2) What is the estimated amount of expenditure involved?
- (3) Are there indicators for reviewing the results of the plan?

Asked by: Hon. WONG Kwok-hing

Reply:

(1) This department promotes environmentally-friendly culture practices including the use of dry pellet feeds and proper waste and refuse disposal measures to reduce water pollution in fish culture zones. We provide technical advice and assistance in the selection and purchase of suitable feeds, and organize educational and publicity activities for fish farmers. We will also continue to implement the Accredited Fish Farm Scheme to help fish farmers raise production and quality control standards through the adoption of proper farm management and good aquaculture practices.

(2) A provision of \$5.6 million is earmarked under Head 22 for these tasks in 2007-08.

(3) The indicators include the total raft area of mariculture farms adopting environmentally-friendly practices, and the total number and area of farms participating in the Accredited Fish Farm Scheme.

Regarding the establishment of a Food Safety Testing Laboratory, please provide the following information:

1. the timetable for its establishment;
2. its structure, terms of reference and functions, and how it performs the role of enhancing food safety; and
3. the estimated expenditure to be incurred.

Asked by: Hon. WONG Kwok-hing

Reply:

1. The Food Safety Testing Laboratory (FSTL) is expected to commence operation in July 2007.
2. The staffing establishment of the FSTL consists of 23 professional staff and 60 technical staff. The FSTL will perform a wide range of chemical analysis of food products ranging from major components to additives, contaminants, agricultural and veterinary residues, and genetically modified ingredients for surveillance and verification of compliance with the statutory standards. It also provides analytical services related to food complaint cases. The estimated number of tests performed in 2007 is 142 000, including the testing of samples for regulatory compliance and food complaint.
3. The estimated recurrent provision required in 2007-08 for food safety is \$49.9 million.

Head : 49 Food and Environmental Hygiene Department

Subhead (No. & title) :

Programme : (2) Environmental Hygiene and Related Services

Controlling Officer : Director of Food and Environmental Hygiene

Director of Bureau : Secretary for Health, Welfare and Food

Question :

Provision for 2007-08 is \$187.1 million (9.8%) higher than the revised estimate for 2006-07. This is mainly due to increased operating expenses for cleansing services. However, there will be a net deletion of 51 posts in 2007-08. In this regard, please advise on the post titles and functions of these 51 posts and the estimated expenditure that can be saved, as well as the reasons for the increased operating expenses for cleansing services and the amount involved.

Asked by : Hon. CHAN Wai-yip, Albert

Reply :

The posts to be deleted under this programme are Workman I and Workman II vacancies involved in environmental hygiene and related services. Their deletion does not involve any reduction in salary expenditure.

The increase in 2007-08 estimated expenditure of \$187.1 million under Programme (2) is mainly to cater for the following –

- (a) managing and operating new facilities, such as public toilets and refuse collection points; and providing cleansing services for new development areas (\$16.1 million);
- (b) increased expenditure on managing cemeteries and crematoria such as maintenance for new cremators (\$30.7 million);
- (c) enhancing hygiene in aqua privies (\$17.4 million); and
- (d) coping with increases in utility charges, contract expenses, maintenance and training requirements (\$122.9 million).

Question :

What is the estimated expenditure, detailed plan and time table of the Administration for the year 2007-08 on the study for the introduction of "paper coffin"?

Asked by : Hon. CHOY So-yuk

Reply :

To promote the use of eco-coffins, the Food and Environmental Hygiene Department (FEHD) has put up notices at its cremation booking offices, and disseminated relevant information via its website. Publicity leaflets have been distributed to the public at public mortuaries, hospitals, elderly homes and non-government organizations providing care services for senior citizens. The resources required for the above measures will be absorbed from within the Department's allocation.

FEHD will take the lead in using eco-coffins for cremating unclaimed bodies, and has invited contractors to supply eco-coffins by open tender. The actual amount of expenditure will only be available upon completion of the open tendering exercise.

Controlling Officer : Director of Food and Environmental Hygiene

Director of Bureau : Secretary for Health, Welfare and Food

Question :

The number of food business licences suspended/cancelled in 2006 was 23 more than the number in 2005, representing an increase of about 20%. What are the reasons?

Asked by : Hon. CHEUNG Yu-yan, Tommy

Reply :

The major offences leading to suspension / cancellation of licence include improper storage of open food; use of open space for storage / scullery / food preparation; and unauthorized extension of food business beyond the licensed area. There was an increase in the number of prosecutions against unauthorized extension of food business beyond the licensed area in 2006 compared to 2005. The increase in the number of suspension / cancellation of licence in 2006 could be attributable to this factor.

Question :

Among the food business licences suspended in 2006, how many licensees had lodged appeals and how many were allowed? What is the maximum, minimum and average time of suspension of these licences?

Asked by : Hon. CHEUNG Yu-yan, Tommy

Reply :

In 2006, there were nine appeal cases against the suspension of licence. Eight cases were heard and the remaining one will be heard in late March 2007. Of the cases heard, five were upheld, one was allowed and the decision of the Appeals Board on two cases is pending. The suspension imposed ranged from seven days to 14 days.

Question :

In view of the increasing importance of implementing food control measures at sources, did the Administration, after introducing the registration system for Mainland freshwater fish farms for supply to Hong Kong, allocate additional resources and manpower for inspecting the registered fish farms? If so, please provide details. What are the anticipated indicators for the number of inspections and the number of fish farms to be inspected in 2007-08?

Asked by : Hon. CHEUNG Yu-yan, Tommy

Reply :

Financial provision has been included in the 2007-08 Estimate for the creation of 8 additional posts including 2 Veterinary Officers and 6 Field Officers to enhance farm inspections in the Mainland, including some 20 visits to the registered fish farms. The amount of financial provision for the above activity is not separately identifiable.

Question :

The Administration will take step to introduce legislative amendments to regulate the import of poultry eggs in 2007-08. In this connection, please advise on the timetable for the legislative amendments as well as the estimated expenditure and manpower involved in the implementation and monitoring of the regulation (including poultry egg suppliers are required to register and to obtain import licences, etc).

Asked by : Hon. CHEUNG Yu-yan, Tommy

Reply :

The Government aims to submit the legislative proposal within the 2006-07 legislative session. The expenditure involved for regulating poultry eggs after enactment of the new legislation will be absorbed from within existing resources of the Centre for Food Safety.

Head : 49 Food and Environmental Hygiene Department

Subhead (No. & title) :

Programme : (1) Food Safety and Public Health

Controlling Officer : Director of Food and Environmental Hygiene

Director of Bureau : Secretary for Health, Welfare and Food

Question :

With the growing public concern over the safety of imported food, and as chilled pork and poultry are imported to our local market, please advise on whether resources and manpower have been reserved for inspecting the slaughtering/processing plants of the chilled pork and poultry that are imported to Hong Kong. If so, what are the details? If not, what are the reasons?

Asked by : Hon. CHEUNG Yu-yan, Tommy

Reply :

The Food Import and Export Section (FIES) and the Compliance and Investigation Unit (CIU) under the Centre for Food Safety are responsible for the control of import of food, including chilled pork and poultry, and inspections to farms exporting live food animals to Hong Kong and food processing plants in the Mainland and overseas.

Financial provisions of \$69 million and \$6.7 million have been earmarked in 2007-08 for the work of the FIES and CIU respectively. Separate breakdown on resources and manpower provided for inspection to slaughtering /processing plants of chilled pork and poultry is not readily available.

Question :

Given our long coastline, a large amount of live fish without health certificates can still be smuggled into Hong Kong for human consumption. Please advise on whether resources and manpower will be increased for the sampling of live fish taken from vessels and vehicles importing fish to Hong Kong, wholesale fish markets and retail outlets. If so, what are the details? If not, what are reasons?

Asked by : Hon. CHEUNG Yu-yan, Tommy

Reply :

In 2007-08, 28 additional Health Inspector grade posts will be created to strengthen food import control work at various sea, land and airport border points, including inspection and enforcement of importation of live freshwater fish through improper channels.

Question :

With regard to item 012 "population-based food consumption survey", please advise on its objective, content, methodology, the manpower required, the anticipated dates of completion and announcement of results as well as the expenditure (including salary) involved.

Asked by : Hon. CHEUNG Yu-yan, Tommy

Reply :

The Chinese University of Hong Kong has been commissioned to conduct the population-based food consumption survey. The survey aims to collect up-to-date food consumption information of the people of Hong Kong. A database will be constructed and used in risk assessment studies on food hazards. A financial provision of \$4.2 million has been earmarked for the survey. The survey is expected to be completed in late 2007. The results of the survey will be released in 2008.

Head : 49 Food and Environmental Hygiene Department

Subhead (No. & title) :

Programme : (3) Market Management and Hawker Control

Controlling Officer : Director of Food and Environmental Hygiene

Director of Bureau : Secretary for Health, Welfare and Food

Question :

Regarding the matters requiring special attention in 2007-08, the Department will extend the scheme on contracting out market management to two additional districts, namely Southern and Tuen Mun districts. Please advise on the details of the scheme (including the monitoring of service quality and performance indicator) and the estimated savings in manpower and expenditure.

Asked by : Hon. CHEUNG Yu-yan, Tommy

Reply :

The Department plans to extend the scheme on contracting out market management to all the public markets/cooked food centres in Southern District and Tuen Mun District in 2007-08. The service contractor will provide overall management, cleansing services, minor repairs and maintenance services in those markets/cooked food centres. District staff will closely monitor the performance of the contractors. We will assess their performance with reference to the cleanliness and general conditions in the markets, as well as feedback from customers, market tenants and the Market Management Consultative Committees as appropriate.

The extension of the scheme to Southern and Tuen Mun Districts will lead to manpower saving of around 43 staff. The incumbent staff will be gainfully redeployed. Information on actual savings in expenditure will only be available after completion of the open tendering exercise.

Head : 49 Food and Environmental Hygiene Department

Subhead (No. & title) :

Programme : (3) Market Management and Hawker Control

Controlling Officer : Director of Food and Environmental Hygiene

Director of Bureau : Secretary for Health, Welfare and Food

Question :

The estimated stall let-out rate of public markets is 76% in 2007. What is the rental loss incurred by vacant stalls? Are there any solutions to the increasingly keen competition from retail outlets? Will there be rental reduction or change in the use of markets?

Asked by : Hon. CHEUNG Yu-yan, Tommy

Reply :

Discounting designated stalls that are not made available for leasing due to designated purposes (such as re-development, impending renovation works, resiting commitment), the vacant stalls could bring rental earnings of about \$5.95 million per month if they could all be leased out at the current open market rental.

To enhance the competitiveness of public markets, the Department will continue to implement general improvement works (e.g. upgrading of drainage, lighting, ventilation, signage, fire services provisions), and carry out a range of other measures to improve the markets' trading environment and their attraction to customers, such as -

- (a) maintaining a high standard of cleanliness in the markets and the enforcement of monthly market cleansing day;
- (b) maintaining flexibility in determining and changing the trade of individual stalls, and where feasible, the stall size;
- (c) merging of selected vacant small stalls to form larger stalls and lowering, in selected markets, the upset auction prices of long-standing vacant stalls to attract potential bidders; and

- (d) conducting promotional activities (such as lucky draws, talks and exhibitions) and distributing regular market newsletters to attract customers.

The Administration has extended the rental freeze for all public markets until 30 June 2008 and will consider the possibility of closing down markets with serious viability problems.

Question :

In view of the many food safety problems occurred last year, will more resources be allocated in order to increase the types of food samples taken for testing?

Asked by : Hon. TAM Heung-man

Reply :

The original estimated number of food samples to be taken for testing under the regular food surveillance programme in 2006 was 63 000 as shown in the 2006-07 Estimate. In response to the occurrence of various food incidents in 2006, additional samples were taken for testing. For 2007, 65 000 samples are planned for testing. Additional samples will also be taken in response to food complaints and food incidents during the year.

Director of Bureau : Secretary for Health, Welfare and Food

Question :

There is no mention of pest control work under "Matters Requiring Special Attention in 2007-08". Please provide details of the work plan and the allocation of resources in this area.

Asked by : Hon. TAM Heung-man

Reply :

The Department will continue to provide effective pest control service. The work plan for 2007-08 is to enhance: (a) risk assessment and communication on pests affecting public health; (b) publicity and community participation; and (c) control and prevention of disease-borne vectors. The work includes the continuation of the territory-wide dengue vector surveillance programme which provides useful information on the distribution, prevalence and the seasonal fluctuation of the dengue vector in Hong Kong; the launching of anti-mosquito and anti-rodent campaigns which aim at heightening public awareness on the potential risk of vector-borne diseases and encouraging community participation. Besides, the Department will continue to enforce relevant legislation to prevent pest problems in private premises.

The direct expenditure on pest control work for 2007-08 is about \$365.6 million.

Head : 49 Food and Environmental Hygiene Department

Subhead (No. & title) :

Programme : (2) Environmental Hygiene and Related Services

Controlling Officer : Director of Food and Environmental Hygiene

Director of Bureau : Secretary for Health, Welfare and Food

Question :

Under this programme, the estimated expenditure for 2007-08 is \$187 million higher than the revised estimate for 2006-07. This is mainly due to increased operating expenses for cleansing services. Please advise in detail on the specific reasons for the increase in the operating expenses and the work plan involved.

Asked by : Hon. TAM Heung-man

Reply :

The increase in 2007-08 estimated expenditure of \$187.1 million under Programme (2) is mainly to cater for the following –

- (a) managing and operating new facilities, such as public toilets and refuse collection points; and providing cleansing services for new development areas;
- (b) increased expenditure on managing cemeteries and crematoria such as maintenance for new cremators;
- (c) enhancing hygiene in aqua privies; and
- (d) coping with increases in utility charges, contract expenses, maintenance and training requirements.

Question :

One of the matters requiring special attention in 2007-08 under this programme is the continuation of the streamlining of the food business licensing regime. Please advise on the details of the work involved and the proposals for improvement.

Asked by : Hon. CHEUNG Yu-yan, Tommy

Reply :

In 2007-08, this Department will work under the "Be the Smart Regulator" Action Plan jointly prepared by the Economic Analysis and Business Facilitation Unit under the Financial Secretary's Office and the Efficiency Unit under the Chief Secretary for Administration's Office to : review the licensing guides; collect comments from the trades on existing licensing operations; review the existing licensing operations; and establish performance pledges for major licensing activities. This Department will also take steps to implement the recommendations of the "Study on the Business-Friendliness of the Regulatory Regime for Outside Seating Accommodation of Restaurants". We will also continue to work on the proposed composite licence to cover the sale of various types of ready-to-eat food for consumption off the premises.

Controlling Officer : Director of Food and Environmental Hygiene

Director of Bureau : Secretary for Health, Welfare and Food

Question :

One of the matters requiring special attention in 2007-08 under this programme is the continuation of the streamlining of the food business licensing regime. Please advise on the following:

As this issue was included as a matter requiring special attention in 2006-07, what improvements have been made and what results have been achieved so far? Please provide the number of completed cases on food business licences in 2005-06 and 2006-07 as well as the average time required for processing the applications.

Asked by : Hon. CHEUNG Yu-yan, Tommy

Reply :

Trade facilitation measures introduced include issue of Letter of Requirements to the applicant prior to the Application Vetting Panel (AVP) meeting to facilitate discussion; involving the applicant's consultant and / or contractor at the AVP meeting to ensure all persons concerned have a clear understanding of the licensing requirements and conditions; deleting the requirement for movable appliances, facilities and furniture not of a substantial and permanent nature to be shown on the layout plan of food premises; lowering or cancelling the licensing requirements and conditions with minimal hygiene impact; and allowing operators of restaurants and food factories to conduct take-away food service and food delivery service without prior approval from this Department provided that they observe a set of additional conditions to ensure food hygiene when conducting such services. In addition, the Department will continue to work on the proposed composite licence to cover the sale of various types of ready-to-eat food for consumption off the premises.

In 2005, 2 117 restaurant licences and 1 730 other food licences were issued. In 2006, the numbers were 1 881 and 1 529 respectively. This Department has no ready information on the average time required for processing these applications.

Head: 139 Government Secretariat: Health, Subhead (No. & title):
Welfare and Food Bureau (Food and
Environmental Hygiene Branch)

Programme: (2) Agriculture, Fisheries and Food Safety

Controlling Officer: Permanent Secretary for Health, Welfare and Food (Food and Environmental Hygiene)

Director of Bureau: Secretary for Health, Welfare and Food

Question:

On collaboration with the Mainland authorities to explore the feasibility of applying information technology to enhance traceability of food:

1. Apart from Radio Frequency Identification technique, what other technology does the Government plan to explore to enhance the identification and traceability of food sources? Please provide details of the plan as well as the expenditure and manpower involved.
2. Given the vast expanse of the Mainland, introduction of any technology and related operation would require collaboration between Hong Kong and a number of customs authorities in the Mainland. What is the scope of the study as conceived by the Government? When will the study be completed?

Asked by: Hon. LEE Kok-long, Joseph

Reply:

We are currently exploring the use of Radio Frequency Identification (RFID) technology with the Guangdong Exit-entry Inspection and Quarantine Bureau to enhance the traceability of live pigs exporting from Guangdong to Hong Kong. In parallel, as part of our planned registration scheme for food importers, we are examining the use of information technology to assist in the management of the database and enhance traceability of food in general.

We aim to complete the pilot project on RFID for tracing live pigs from Guangdong within 2007 and will assess the outcome of the pilot programme with a view to exploring the feasibility of applying appropriate IT identification techniques to food from other areas and other types of food. So far, we are using existing manpower and resources to cover the pilot project on live pigs and have committed about \$100,000 for purchasing hand-held detectors, gate-type readers, etc. and other equipment for the pilot project.

Question:

The provision for 2007-08 has increased by nearly \$50 million, representing a triple increase over the revised estimates for 2006-07. Please set out specific items of work and provide the following information to enable Committee to assess whether the provision is being used properly: a breakdown of their respective allocation and funding percentages, their performance targets and expected efficacy as well as the manpower involved.

Asked by: Hon. LEE Kok-long, Joseph

Reply:

The increase in funding provides for all the major initiatives as listed in the section "Matters Requiring Special Attention in 2007-08". In brief, the major initiatives are to provide for expenditure under the Voluntary Surrender Scheme for pig farmers (\$20 million or 41.6%), provision of posts to strengthen food safety functions (\$5.59 million or 11.6%); consultancy study to promote sustainable development of local agricultural and fisheries industries (\$3 million or 6.2%) and contingency funding to meet expenditure for controlling avian influenza (\$19.5 million or 40.5%). It is not practicable to set performance targets and expected efficacy given the nature of these initiatives. The existing manpower of the Health, Welfare and Food Bureau will implement all the initiatives under Programme (2) Agriculture, Fisheries and Food Safety.

Subhead : 3003NB Additional
columbarium at Diamond Hill

Programme :

Controlling Officer : Director of Architectural Services

Director of Bureau : Secretary for Health, Welfare and Food

Question : For the improvement project under the Subhead, would the Administration advise on the following :

- (a) its progress and percentage of work done in 2006-07;
- (b) its progress in 2007-08;
- (c) its anticipated date of completion; and
- (d) is it feasible to expedite the works in the light of robust demand for columbarium niches?

Asked by : Hon. WONG Kwok-hing

- Reply :
- (a) In 2006-07, we commenced the piling works (which is about 20% of the whole project) in July 2006 for completion by end March 2007.
 - (b) In 2007-08, we plan to commence superstructure construction in end March/early April 2007, immediately after the completion of the piling works.
 - (c) The anticipated completion date of the project is December 2008.
 - (d) The works are being carried out under a tight programme. There is little room to further expedite the construction works.

Head : 703 Buildings

Subhead : 3010NT Conversion of aqua privies
into flushing toilets – phase 4

Programme :

Controlling Officer : Director of Architectural Services

Director of Bureau : Secretary for Health, Welfare and Food

Question : Please advise this Committee of the locations of the aqua privies that are included in the conversion of aqua privies into flushing toilets – phase 4 and the detailed schedule for the works.

Asked by : Hon. LAU Chin-shek

Reply : The Phase 4 conversion programme being planned includes the conversion of 20 aqua privies (APs). The locations of these APs are listed below :

District	Location
North	Tam Shui Hang Village Tong Hang Tsuen Lin Tong Mei Residential Area Kam Tsin Tsuen (South) Ling Shan Tsuen
Sai Kung	Nam Shan Village
Tai Po	Wai Tau Village Hang Ha Po
Yuen Long	Shek Wu Wai Fan Tin Tsuen (2), San Tin San Sang Tsuen Fung Chi Tsuen, Ping Shan Tin Sum Tsuen, Pat Heung Pau Wai, Ha Tsuen Lam Hau Tsuen
Tuen Mun	Tuen Tsz Wai Tuen Tsz Wai Vegetable Market Office, Lam Tei
Island	Nam Chung, Tai O, Lantau Shan Tau, Tung Chung, Lantau Yung Shue Ha, Sok Kwu Wan, Lamma

Subject to funding approval, the works for Phase 4 will start in late 2007 for completion in early 2009.

Head : 49 Food and Environmental Hygiene Department

Subhead (No. & title) :

Programme : (2) Environmental Hygiene and Related Services

Controlling Officer : Director of Food and Environmental Hygiene

Director of Bureau : Secretary for Health, Welfare and Food

Question :

Upon completion of the conversion of aqua privies (APs) into flushing toilets—phase 4, are there any aqua privies which have not yet been converted into flushing toilets? If so, please advise on their locations and the conversion plans, if any.

Asked by : Hon. LAU Chin-shek

Reply :

Subject to funding approval, FEHD will complete phase 4 of the AP conversion programme in late 2008, by which time a total of about 150 APs will have been upgraded to flushing toilets. By then, there will still be 369 APs in nine districts yet to be converted into flushing toilets. Distribution of these APs are as follows –

<u>District</u>	<u>No. of APs</u>
Islands	29
Kwai Tsing	6
Sha Tin	5
Sai Kung	43
Tuen Mun	30
Tai Po	33
Tsuen Wan	14
Yuen Long	112
North	97

FEHD continues to review the need and timing for converting more APs into flushing toilets. The Department is working on plans to convert 50 more APs into flushing toilets after completion of phase 4.

Welfare and Food Bureau (Food and
Environmental Hygiene Branch)

Programme: (2) Agriculture, Fisheries and Food Safety

Controlling Officer: Permanent Secretary for Health, Welfare and Food (Food and Environmental Hygiene)

Director of Bureau: Secretary for Health, Welfare and Food

Question:

Compared with the revised estimates for 2006-07, the provision for 2007-08 has more than tripled. Can the Government provide specific plans, activities and studies as well as projected expenditures of these items of work?

Asked by: Hon. TAM Heung-man

Reply:

The increase in funding provides for all the major initiatives as listed in the section "Matters Requiring Special Attention in 2007-08". In brief, the major initiatives are to provide for expenditure under the Voluntary Surrender Scheme for pig farmers (\$20 million), provision of posts such as Senior Executive Officer, Senior Information Officer, etc. to strengthen food safety functions (\$5.59 million), consultancy study to promote sustainable development of local agricultural and fisheries industries (\$3 million) and contingency funding to meet expenditure for controlling avian influenza (\$19.5 million).

Programme: (2) Agriculture, Fisheries and Food Safety

Controlling Officer: Permanent Secretary for Health, Welfare and Food (Food and Environmental Hygiene)

Director of Bureau: Secretary for Health, Welfare and Food

Question:

On the net creation of five posts, please provide detailed information on the posts to be created and deleted, including their ranks, numbers and duties as well as the reasons for their creation and deletion.

Asked by: Hon. TAM Heung-man

Reply:

There will be no deletion of posts under Programme (2) Agriculture, Fisheries and Food Safety in 2007-08. The reason for the creation of the five posts under the Programme, namely, one Administrative Officer Staff Grade C (AOSGC), one Senior Executive Officer (SEO), one Senior Information Officer (SIO), one Personal Assistant (PA) and one Chauffeur, is to strengthen the support in the Bureau to handle additional workload in relation to food safety matters.

The AOSGC is responsible for reviewing the set-up and work of the Centre for Food Safety under the Food and Environmental Hygiene Department with a view to further improving its structure and strategies for safeguarding food safety (including the launching of new legislation, communication with the trade and public etc). It is also expected that new policy initiatives on food safety will need to be launched and more coordination work within Government and with the Mainland is required. The SEO will provide the necessary executive support to the Bureau in particular the management of resources deployed to the food safety front while the SIO is responsible for handling publicity and media initiatives to address public concerns relating to food incidents and food safety policies. The PA and the Chauffeur will respectively provide dedicated secretarial support and transport service to the Permanent Secretary for Health, Welfare and Food (Food and Environmental Hygiene).

Question Serial No.

2190

Head: 48 Government Laboratory
Programme: (1) Statutory Testing

Subhead (No. & title):

Controlling Officer: Government Chemist

Director of Bureau: Secretary for Health, Welfare and Food

Question:

In 2007-08, the Government Laboratory will recruit 48 non-directorate officers for setting up a Food Safety Testing Laboratory. Please advise on:

- (1) the deployment, ranks and salaries of the new recruits and how they will work with the existing staff to enhance the testing and analytical output of the Government.
- (2) the time when the new Food Safety Testing Laboratory will come into operation, the anticipated number of food samples to be tested annually and the target time for completing the test reports.

Asked by: Hon. SHEK Lai-him, Abraham

Reply:

1. Of the 48 posts proposed to be created under Programme (1) Statutory Testing, 38 posts will be on the establishment of the Food Safety Testing Laboratory. Details about these 38 posts are as follows -

Number of staff	Rank / Job Title	Emolument
2	Senior Chemist	1,858,440
10	Chemist	5,680,200
6	Science Laboratory Technician I	2,190,960
20	Science Laboratory Technician II	4,322,400

The new recruits will work together with existing staff to perform chemical analysis of food products for surveillance and verification of compliance with the statutory standards. They will also provide analytical services for food complaint cases.

2. The Food Safety Testing Laboratory is scheduled for opening in July 2007. The total number of tests performed in 2007 is estimated to be 142 000. The target time for completing the food samples tests varied with the types and methodologies of the tests.

Head : 49 Food and Environmental Hygiene Department

Subhead (No. & title) :

Programme : (1) Food Safety and Public Health

Controlling Officer : Director of Food and Environmental Hygiene

Director of Bureau : Secretary for Health, Welfare and Food

Question :

There will be a net creation of 125 posts and an additional provision of \$85.1 million (13.7% increase) under this programme in 2007-08 for enhancing food safety and public health efforts. In this connection, please advise on:

1. the ranks, functions and responsibilities of these new posts; and
2. how the new resources will be allocated. Please quantify the additional work or services, list the relevant performance indicators and the percentage of the allocation.

Asked by : Hon. LEE Kok-long, Joseph

Reply :

1. The net 125 posts to be created in 2007-08 are posts relating to the grades of Chemist, Field Officer, Health Inspector, Pest Control Assistant, Pest Control Officer, Science Laboratory Technician, Scientific Officer (Medical) and Veterinary Officer as well as administrative support posts. Their functions/ responsibilities are to perform food safety regulatory functions and provide pest control services.
2. The increase in 2007-08 estimated expenditure under this programme is mainly to cater for the following –
 - (a) creation of posts and departmental expenses in relation to enhancement of food safety regulatory functions and pest control services (\$67.2 million);
 - (b) increased capital expenditure such as population-based food consumption survey, integrated mass spectrometer system (\$8.7 million); and

—
— (c) upgrading equipment for operation in slaughterhouse (\$9.2 million).

The new posts are to enhance existing services under this Programme. There are no separate performance indicators for the enhanced activities.

Head : 49 Food and Environmental Hygiene Department

Subhead (No. & title) :

Programme : (1) Food Safety and Public Health

Controlling Officer : Director of Food and Environmental Hygiene

Director of Bureau : Secretary for Health, Welfare and Food

Question :

Under this programme, provision for 2007-08 is \$85.10 million (13.7%) higher than the revised estimate for 2006-07. The work targets include conducting food surveillance at various points of the food chain, as well as investigating and managing food incidents. In 2006-07, the Administration failed to respond swiftly to Mainland food safety incidents. It was slow in source-tracing, investigation, and affirmation of food problems. The media identified the problems before the Administration and even tracked down the smuggling channel and proces. In this regard, please advise on how the increased provision will be allocated to carry out source-tracing as well as investigation and disclosure of food incidents in order to improve food surveillance and the related work as well as expedite the investigation process.

Asked by : Hon. LEE Kok-long, Joseph

Reply :

A financial provision of \$37.2 million has been included in the 2007-08 Estimate for the creation of 75 posts and related departmental expenses, including Veterinary Officers, Field Officers, Scientific Officers, Health Inspectors and administrative support staff for enhancing food import control, strengthening veterinary input in the management of local slaughterhouses as well as enhancing food safety risk communication capabilities.

Head : 49 Food and Environmental Hygiene Department

Subhead (No. & title) :

Programme : (1) Food Safety and Public Health

Controlling Officer : Director of Food and Environmental Hygiene

Director of Bureau : Secretary for Health, Welfare and Food

Question :

Under this programme, the number of food samples to be taken for testing in 2007-08 is 65 000, only 85 more than the actual number in 2006. What is the difference between the 65 000 food samples under this programme and the 130 000 food samples to be taken by the Government Laboratory for regulatory compliance purposes?

Asked by : Hon. LEE Kok-long, Joseph

Reply :

The Food Safety Testing Laboratory planned to be established under the Government Laboratory in 2007-08 will provide enhanced and timely laboratory support for the increasing number of food samples taken for chemical testing in relation to food complaints, food incidents and food surveillance. The original estimated number of food samples to be taken for testing under the food surveillance programme in 2006 as shown in the 2006-07 Estimate was 63 000. For 2007, 65 000 samples are planned for testing. Additional samples will also be taken in response to food complaints and food incidents for microbiological and/or chemical tests. The number 130 000 refers to the number of chemical tests performed by the Government Laboratory. Usually, one food sample is subject to more than one chemical tests.

Head : 49 Food and Environmental Hygiene Department

Subhead (No. & title) :

Programme : (2) Environmental Hygiene and Related Services

Controlling Officer : Director of Food and Environmental Hygiene

Director of Bureau : Secretary for Health, Welfare and Food

Question :

Under this programme, provision for 2007-08 is \$187.1 million (9.8%) higher than the revised estimate for 2006-07 to meet operating expenses for cleansing services. However, there will be a deletion of 51 posts. Please specify the items with increased operating expenses and the provision involved; the ranks, functions and relevant duties of the posts to be deleted; the reasons for the deletion and the impact on the related services or work.

Asked by : Hon. LEE Kok-long, Joseph

Reply :

The increase in 2007-08 estimated expenditure of \$187.1 million under Programme (2) is mainly to cater for the following –

- (a) managing and operating new facilities, such as public toilets and refuse collection points; and providing cleansing services for new development areas (\$16.1 million);
- (b) increased expenditure on managing cemeteries and crematoria such as maintenance for new cremators (\$30.7 million);
- (c) enhancing hygiene in aqua privies (\$17.4 million); and
- (d) coping with increases in utility charges, contract expenses, maintenance and training requirements (\$122.9 million).

The posts to be deleted under this programme are Workman I and Workman II vacancies involved in environmental hygiene and related services. There is no operational need to keep them. Environmental hygiene and related services will not be affected as a result of the deletion of these posts.

Subhead (No. & title) :

Programme : (2) Environmental Hygiene and Related Services

Controlling Officer : Director of Food and Environmental Hygiene

Director of Bureau : Secretary for Health, Welfare and Food

Question :

Under this programme, the estimated number of inspections to food premises in 2007-08 is 235 000, 425 less than the actual number in 2006. In this connection, please advise on:

1. whether the inspections to shops to check the compliance of separation of the sale of chilled and fresh pork after the implementation of "one licence for one shop" regulatory arrangement for pork retailers in 2006 have been included in the number of inspections under this indicator; and
2. the reasons for the decrease of 425 inspections and the impact on food safety surveillance.

Asked by : Hon. LEE Kok-long, Joseph

Reply :

- (a) The number of inspections has included the regular inspections to fresh provision shops, during which checking will be made to ensure compliance with the separation of the sale of chilled and fresh pork under the "one licence for one shop" requirement.
- (b) The number of inspections for 2007-08 at 235 000 is an estimated number based on the actual number of inspections in 2006 rounded off to the nearest thousand.

Head : 49 Food and Environmental Hygiene Department

Subhead (No. & title) :

Programme : (2) Environmental Hygiene and Related Services

Controlling Officer : Director of Food and Environmental Hygiene

Director of Bureau : Secretary for Health, Welfare and Food

Question :

Regarding Programme (2) Environmental Hygiene and Related Services, please advise on the following:

- (1) The reasons why the revised expenditure for 2006-07 is 7.9% lower than the original estimated expenditure for 2006-07;
- (2) The number of public cleansing services contracts that have been awarded each year from 2000 to 2007, highlighting the value, the number of staff employed, the wages and the total working hours of workers of these contracts;
- (3) Details of the changes in the actual expenditure on the outsourced public cleansing services in 2005-06 and 2006-07 as well as the reasons for the changes, and details of the estimated expenditure on public cleansing services to be outsourced in 2007-08; and
- (4) The changes, if any, in the terms of the new contracts to be outsourced in 2007-08 as compared with the previous contracts, for example, any downward or upward adjustment in the number of staff, wages and total working hours. What is the estimated expenditure saved or increased as a result of such changes?

Asked by : Hon. LEUNG Kwok-hung

Reply :

- (1) For 2006-07 the revised estimate under this programme is lower than the original estimate by 7.9%. This is mainly due to the lower than expected expenditure under personal emoluments arising from natural wastage of officers, general departmental expenses and capital account items.
- (2) The information of public cleansing services contracts awarded in 2000-2002 is kept in manual records and will take time to compile. For 2003-2007, the requested information is as follows –

<u>Year</u>	<u>No. of public cleansing contracts</u>	<u>Contract period</u>	<u>Total contract value</u> (as at 1 st December)	<u>Number of workers employed</u>	<u>Range of wages</u>	<u>Daily maximum working hours of workers</u>
2003-04	71	6 months to 5 years (majority are 2 years)	\$1,377 million	6 799	\$4,368 -\$8,028	Not more than 10 working hours daily
2004-05	68		\$1,149 million	5 680	\$4,381 -\$8,028	
2005-06	65		\$1,148 million	5 243	\$4,381 -\$8,028	
2006-07	55		\$1,172 million	4 737	\$4,442 -\$8,200	

- (3) The actual and estimated expenditure for 2005-06 and 2006-07 are \$492 million and \$495 million respectively. The difference is due to changes in service requirements and contract prices. Expenditure for 2007-08 will be subject to the tender results of contracts to be renewed and changes in service requirements.
- (4) The terms of the new contracts to be outsourced in 2007-08 will depend on the service requirements as compared with previous contracts. Wages of workers are subject to adjustments in the wages level of the relevant trade as published in the latest Census and Statistics Department's Quarterly Report of Wage and Payroll Statistics. We do not anticipate major change to the overall working hours. Information on estimated expenditure or savings for 2007-08 will only be available after completion of the tendering exercise.

Subhead (No. & title) :

Programme : (3) Market Management and Hawker Control

Controlling Officer : Director of Food and Environmental Hygiene

Director of Bureau : Secretary for Health, Welfare and Food

Question :

Many markets in Hong Kong, particularly those constructed in earlier years, have poor ventilation and temperature control. In summer, these markets are hot and stuffy, affecting the health of those who work long hours there, and the fresh meat sold in the markets is prone to deterioration that endangers public health.

It is noted that the Administration has started relevant improvement works. Please advise if such works was completed in all substandard markets. If not, has provision been reserved in 2007-08 for such works to be done in markets that required improvements? Please also advise on the details of the improvement works and names of the markets involved.

Asked by : Hon. HO Chung-tai, Raymond

Reply :

The Department is continuing general improvement works in public markets. The works include mainly upgrading of drainage, lighting, ventilation, signage and fire services provisions.

In 2007-08, the Department will continue to carry out general improvement works in 10 markets at an estimated total project cost of \$103 million. The markets involved are Sheung Wan Market, Tsuen Wan Market, Yeung Uk Road Market, North Kwai Chung Market, Wing Fong Street Market, Haiphong Road Temporary Market, Plover Cove Road Market, Hung Shui Kiu Temporary Market, Shau Kei Wan Market and Choi Hung Road Market. In addition, the Department is working on plans to carry out general improvement works in another 12 markets and 2 cooked food centres.

Subhead (No. & title) :

Programme : (2) Environmental Hygiene and Related Services

Controlling Officer : Director of Food and Environmental Hygiene

Director of Bureau : Secretary for Health, Welfare and Food

Question :

Since the implementation of the risk-based categorization scheme for restaurants, inspections to food premises kept decreasing in 2006-07. In this connection, please advise on whether food hygiene education for food handler was stepped up correspondingly during inspections subsequent to the decrease in food premises inspections, the duration of each inspection, and the proportion of time spent on disseminating food safety knowledge to food handlers during each inspection.

Asked by : Hon. CHEUNG Yu-yan, Tommy

Reply :

Health education is disseminated to food handlers during the course of inspection to food premises. To enhance health education, inspecting officers have since January 2007 given a short briefing at the end of the inspection on an appropriate topic or to summarise the findings and important lessons to learn. The inspection time for restaurants ranges from 15 to 25 minutes on average but can be longer if considered necessary.

Question :

Since the implementation of the risk-based categorization scheme for restaurants, inspections to food premises kept decreasing in 2006-07. In this connection, please advise on whether health inspectorate posts will be deleted subsequent to the decrease in food premises inspections, or will health inspectors charged with such duties be redeployed to other posts in 2007-08? If so, what are the respective numbers involved? How much savings will be achieved?

Asked by : Hon. CHEUNG Yu-yan, Tommy

Reply :

The frequency of inspection of low risk and medium risk food premises has been reduced, in order that more efforts and resources could be targetted at high risk food premises, including those food premises which have operated without a licence. There is therefore no plan to delete health inspector posts.

Controlling Officer : Director of Food and Environmental Hygiene

Director of Bureau : Secretary for Health, Welfare and Food

Question :

There will be a net deletion of 51 posts in 2007-08. In this regard, please advise on:

1. The respective ranks, terms of employment and the main duties of the posts to be deleted;
2. Whether the work involved has been outsourced to private companies. If so, whether the staff laid off will have priority in employment by contractors;
3. The reasons for the deletion of the posts concerned even though the provision for 2007-08 has been increased by \$187.1 million (9.8%). How will the additional provision be used?

Asked by : Hon. LI Fung-ying

Reply :

1. The net 51 posts to be deleted in 2007-08 involves the Workman I and Workman II grades. They are civil service posts for providing environmental hygiene and related services.
2. No staff are laid off as all these are vacant posts.
3. The increase in 2007-08 estimated expenditure of \$187.1 million under Programme (2) is mainly to cater for the following –
 - (a) managing and operating new facilities, such as public toilets and refuse collection points; and providing cleansing services for new development areas;
 - (b) increased expenditure on managing cemeteries and crematoria, such as maintenance for new cremators;

- (c) enhancing hygiene in aqua privies; and
- (d) coping with increases in utility charges, contract expenses, maintenance and training requirements.

Question :

The Administration will continue the market improvement works in 2007-08. Please advise on the details and the estimated expenditure involved.

Asked by : Hon. LEONG Kah-kit, Alan

Reply :

In 2007-08, the Department will continue the general improvement works in 10 markets, the estimated total cost of which amounts to \$103 million. In addition, the Department is working on plans to carry out general improvement works in another 12 markets and 2 cooked food centres. These market improvement works include mainly upgrading of drainage, lighting, ventilation, signage and fire services provisions.

Subhead (No. & title):

Programme: (3) Environmental Hygiene

Controlling Officer: Permanent Secretary for Health, Welfare and Food (Food and Environmental Hygiene)

Director of Bureau: Secretary for Health, Welfare and Food

Question:

Regarding the additional provision of \$7.6 million for Programme (3) in 2007-08, how much will be used to prepare the development of the Poultry Slaughtering and Processing Plant? Apart from this provision, will it be necessary to make further provision for the Poultry Slaughtering and Processing Plant in future? If so, please advise the projected amount and its uses. Furthermore, has any assessment been conducted to evaluate the economic benefits and employment opportunities to be generated by the development of the Poultry Slaughtering and Processing Plant for benefit of the Government and the community at large?

Asked by: Hon. FANG Kang, Vincent

Reply:

A consultant will be commissioned to prepare the tender documents for developing the Poultry Slaughtering and Processing Plant (the Plant). As we have yet to appoint the consultant, information on the relevant projected expenditure is not available. The Government's intention is to invite open tenders from the private sector for developing the Plant under a "Build, Own, Operate and Transfer" model. The Plant operator will be responsible for the construction cost of the Plant.

Like other modern poultry slaughtering and processing plants, employment within the plant is unlikely to be high since the objective is to reduce direct contact between human and live poultry. However, the stable, efficient and safe production and processing of poultry products will provide the same if not more employment opportunities for workers responsible for transportation, distribution and sale, etc. In overall terms, we expect the proposal to generate net economic benefits to the community by reducing the risk and associated economic losses of avian influenza outbreaks in Hong Kong.

Question:

On considering ways to improve the occupancy and viability of public markets under Matters Requiring Special Attention in 2007-08, please advise what approach would the Administration adopt in conducting the study and if any special provision would be required? The Food and Environmental Hygiene Department has made an addition allocation of \$21.2 million in the year to manage new public markets and implement market improvement programmes. Have the assessments for the markets under this programme been completed? Or are these markets excluded from the study?

Asked by: Hon. FANG Kang, Vincent

Reply:

We will provide steer to the Food and Environmental Hygiene Department (FEHD) on improving the occupancy and viability of public markets. The measures already adopted include improving the facilities of markets and launching promotional programme to attract more trades and patronage. In 2007-08, a financial provision of \$3 million has been earmarked under Head 49 FEHD for the proposed market promotion measures. An amount of \$103 million has also been earmarked under the Capital Works Reserve Fund for general improvement works in 10 markets in 2007-08. We have not conducted any assessment for the markets under this programme.

Programme: (1) Agriculture, Fisheries and Fresh Food Wholesale Markets

Controlling Officer: Director of Agriculture, Fisheries and Conservation

Director of Bureau: Secretary for Health, Welfare and Food

Question:

In 2007-08, the Government will provide technical advice on organic cultivation to farmers.

- (i) What are the amounts of expenditure involved for 2006-07 and 2007-08 respectively?
- (ii) What is the target number set by the government for farms converting to organic farms with the support provided by the Agriculture, Fisheries and Conservation Department?

Asked by: Hon. EU Yuet-mee, Audrey

Reply:

- (i) The Government's spending on the promotion of organic farming in 2006-07 is \$11.8 million. Same financial resources have been earmarked for these tasks in 2007-08.
- (ii) The Agriculture, Fisheries and Conservation Department is presently providing technical support to some 80 local organic farms. The development of local organic farming is totally market driven and the Government does not set a target on the number of local organic farms.

Head : 49 Food and Environmental Hygiene Department

Subhead (No. & title) :

Programme : (4) Public Education and Community Involvement

Controlling Officer : Director of Food and Environmental Hygiene

Director of Bureau : Secretary for Health, Welfare and Food

Question :

The estimated financial provision for 2007-08 is 8.2% less than the 2006-07 original. In this regard, please advise on the following:

1. The series of food incidents in 2006-07 have raised the concern of the public and the media over food safety. How will the Administration enhance public awareness of the importance of food safety and empower customers to make informed choices with the reduced provision?
2. Recently, there have been discussions about trans fat and calls for government regulation or self-regulation by the food trade over the use of trans fat, revealing the public's aspiration for informed choices. However, the Administration has not yet indicated its stance, not to mention educating the public on this issue and implementing regulatory measures to include trans fat in nutrition labels to facilitate the public to make informed choices. Has the Administration considered increasing the provision for 2007-08 in this regard?

Asked by : Hon. LEE Kok-long, Joseph

Reply :

1. The estimated financial provision for 2007-08 under Programme (4) remains at approximately the same level as the revised estimated expenditure for 2006-07. In addition to the promotional activities on environmental hygiene and general food safety for the public and schools provided under Programme (4), a financial provision of \$21.5 million has been included in the 2007-08 Estimate under Programme (1) to strengthen food safety promotion activities, representing an increase of 19.4%. A comprehensive publicity and education programme covering various aspects of food safety will be delivered in 2007-08 through workshops, seminars, website, Food Safety Day, press conferences, press releases, announcements in the public interest, telephone hotlines, media interviews, newsletters, leaflets, posters and audio-visual productions.

2. In response to public health concerns over trans fat, the Department will introduce a series of activities to raise awareness of the community on trans fat and health. These activities include education leaflets, newsletters, talks and a study to examine the levels of trans fat in various indigenous foods. The feasibility of including trans fat as one of the core nutrients in the proposed labelling scheme on nutrition information would also be explored. The resources required for the above activities in 2007-08 will be absorbed from within the allocated resources of the Department.

Question :

There has been a continuous decline in the number of inspections to food premises in recent years. The 2005 figure was 10% less than the that of 2004 and the 2006 figure was 6% less than that of 2005. There will be a further drop of 2% in the 2007 estimated figure. What are the reasons?

Asked by : Hon. TAM Yiu-chung

Reply :

Under the Risk-based Inspection System, licensed food premises are classified into Type I (low risk), Type II (medium risk) and Type III (high risk) for the determination of inspection frequency by health inspectors. The frequency of inspection of low risk and medium risk food premises has been reduced, resulting in a lower number of inspections in total since 2005 in order to better target the Department's resources at high risk food premises, including those food premises which have operated without a licence. The number of inspections for 2007 at 235 000 is an estimated number based on the actual number of inspections in 2006 rounded off to the nearest thousand.

Question :

What is FEHD's estimated expenditure on cleansing services for 2007? What is the proportion of the services to be contracted out? What is the number of staff employed by the cleansing contractors in 2005? How is it compared to that in 2006?

Asked by : Hon. TAM Yiu-chung

Reply :

In 2007-08, FEHD's estimated expenditure on public cleansing services under Programme (2) is \$1,597 million. The proportion of the services to be contracted out under Programme (2) is about 63%. The number of workers employed by the contractors on public cleansing services in 2005-06 was 5 243 as compared with 4 737 in 2006-07.

Question :

Including the additional provision of \$21.2 million in 2007-08, what is the provision for the management of new public markets and the implementation of market improvement works for the year? How many new markets will come into operation and how many stalls will they provide? How many on-street hawkers will be resited in 2007-08 and will there be enough public market stalls to resite them?

Asked by : Hon. FANG Kang, Vincent

Reply :

Additional provision of \$12.5 million has been earmarked in 2007-08 under Programme 3 for the management of new public markets and implementation of market improvement works. Two new markets, namely the new Wan Chai Market and Aldrich Bay Market with a provision of about 200 stalls in total are scheduled for commissioning in 2007-08.

About 80 licensed fixed pitch hawkers are planned to be resited into the new Wan Chai Market. We are still considering the leasing and occupation arrangements for the Aldrich Bay Market and will consult the relevant District Council and other concerned parties when the proposals are ready.

Head : 49 Food and Environmental Hygiene Department

Subhead (No. & title) :

Programme : (3) Market Management and Hawker Control

Controlling Officer : Director of Food and Environmental Hygiene

Director of Bureau : Secretary for Health, Welfare and Food

Question :

How many public markets and stalls are there to date and how many of them have their management contracted out? Are there any comparisons between markets managed by the Department and those contracted out in terms of the stall let-out rate and customer flow? What is the number of markets planned for contracting out management in 2007-08 and how many stalls are involved? What is the current stall let-out rate of these markets? What is the estimated savings achieved by the contracting out? Is there a long-term policy for contracting out market management?

Asked by : Hon. FANG Kang, Vincent

Reply :

Currently, the Department operates a total of 104 public markets/cooked food centres (CFC) with 14 960 stalls. The management of 12 of these markets/CFC in three districts with a total of 2 625 stalls has been contracted out. The occupancy rate of public markets/CFC managed by the Department is 75.8% while that of the 12 markets/CFC with management contracted out is 78.8%. We do not have any statistics on the customer flow of the individual markets/CFC.

The Department plans to extend the contracting-out scheme to Southern and Tuen Mun districts in 2007-08, involving 13 public markets/CFC with 1 387 stalls. The current stall let-out rate of the markets/CFC in these two districts is 78.3%. We will award the service contracts by open tender. We expect manpower savings of around 43 staff. Information on actual expenditure and savings will only be available after completion of the tendering exercise. In the light of experience gained, the Department will consider whether the scheme should be further extended to public markets/CFC in other districts.

Question :

In 2007, the estimated number of licensed hawkers, including fixed pitch hawkers and itinerant hawkers, is 7200, representing a decrease of 284 hawkers over the actual figure in 2006. What measures will be taken to reduce the number of licensed hawkers?

Asked by : Hon. FANG Kang, Vincent

Reply :

The number of licensed fixed-pitch hawkers and itinerant hawkers is estimated to continue to decrease as a result of voluntary non-renewal of the fixed-pitch hawker licence by the licensees themselves and voluntary surrender of itinerant hawker licence for ex-gratia payment.

Question :

Regarding the key performance measures of “inspecting vehicles carrying poultry at Man Kam To” under Brief Description 4, the actual number of vehicles inspected reduced substantially by 1 391 to 4 688 in 2006 as compared with 2005. What are the reasons? Please explain why there is a further reduction of 388 vehicles in the estimated figure of 2007.

Asked by : Hon. FANG Kang, Vincent

Reply :

The estimated number of vehicles carrying poultry inspected at Man Kam To in 2007 is based on the current number of live poultry supplied from the Mainland, which is set at 20 000 live chickens per day. The number of imported live poultry has been decreasing since 2005 as a result of the Government's measures to minimize the occurrence of avian influenza in Hong Kong.

Question :

Regarding "blood samples taken from poultry for testing of avian influenza H5 antibodies", the actual figure in 2006 reduced substantially by 25 961 as compared with 2005 and the estimated figure in 2007 is further reduced by 5 452. What are the reasons?

Asked by : Hon. FANG Kang, Vincent

Reply :

The number of blood samples estimated to be taken in 2007 is based on the current number of live poultry supplied from the Mainland, which is set at 20 000 live chickens per day. As one of the Government's measures to minimize the occurrence of avian influenza in Hong Kong, the number of imported live poultry has been decreased from 30 000 chickens or more per day for 2005, to 20 000 per day since April 2006.

Question :

Including the additional provision of \$85.1 million under Programme (1) in 2007-08, what is the total estimate under this programme for the year? Please give a breakdown of the allocation of the additional provision as well as the ranks of the net 125 posts to be created in 2007-08.

Asked by : Hon. FANG Kang, Vincent

Reply :

The estimate under this programme for 2007-08 is \$705.4 million, representing an increase of \$85.1 million over the 2006-07 revised estimate. It is mainly to cater for the following –

- (a) creation of posts and departmental expenses in relation to enhancement of food safety regulatory functions and pest control services (\$67.2 million);
- (b) increased capital expenditure such as population-based food consumption survey, integrated mass spectrometer system (\$8.7 million); and
- (c) upgrading equipment for operation in slaughterhouse (\$9.2 million).

In 2007-08, there will be a net increase of 125 posts under this programme. The posts to be created relate to the grades of Chemist, Field Officer, Health Inspector, Pest Control Assistant, Pest Control Officer, Science Laboratory Technician, Scientific Officer (Medical), Veterinary Officer and other administrative support grades.

Head : 49 Food and Environmental Hygiene Department

Subhead (No. & title) :

Programme : (1) Food Safety and Public Health

Controlling Officer : Director of Food and Environmental Hygiene

Director of Bureau : Secretary for Health, Welfare and Food

Question :

The Chief Executive indicated earlier that a licensing scheme for imported foods would be implemented in full scale. Please advise on whether manpower and resources are earmarked in 2007-08 for implementation of the scheme. Apart from taking steps to introduce legislative amendments to regulate the import of poultry eggs, will the Administration introduce more legislations to regulate imported foods in 2007-08?

Asked by : Hon. FANG Kang, Vincent

Reply :

In 2007-08, the Administration aims to enact legislation to regulate the import of poultry eggs. At the same time, the Administration is drawing up a Food Safety Bill to extend regulatory control to all imported food items by phases. The Food Safety Bill will also provide statutory power to the Administration in respect of the mandatory registration scheme for food importers and prohibition of sale of problem food. The resources required for the implementation of the food importer registration scheme and other legislative proposals will be considered at a later stage.

Question :

With regard to the target of 76% for "stalls let", please list out the markets where the stall let-out rate fell below target in 2006-07, their respective areas and let-out percentages.

Asked by : Hon. WONG Yung-kan

Reply :

The list of markets/cooked food centres where the occupancy rates fell below the target of 76% in 2006-07, their respective areas and let-out percentages is provided at Annex.

Controlling Officer : Director of Food and Environmental Hygiene

Director of Bureau : Secretary for Health, Welfare and Food

Question :

Is there any assessment of any tendency of reducing occupancy rate of market stalls? Any measures to enhance the competitiveness of public market and how much expenditure will be involved?

Asked by : Hon. WONG Yung-kan

Reply :

We expect that changes in shopping habits of the community and increasing competition from private retail outlets will continue to adversely affect the occupancy rate of public markets.

To enhance the competitiveness of public markets, the Department has been carrying out general improvement works (including upgrading of drainage, lighting, ventilation, signage and fire services provision) in the markets. In 2007-08, improvement works will be carried out in 10 markets at a cost of about \$103 million. To improve the shopping environment and atmosphere in public markets, the Department will continue to implement the following measures:

- (a) maintaining a high standard of cleanliness in markets and the enforcement of the monthly market cleansing day;
- (b) maintaining flexibility in determining and changing the trade of individual stalls, and where feasible, the stall size;
- (c) merging of selected vacant small stalls to form larger stalls and lowering, in selected markets, the upset auction prices of long-standing vacant stalls to attract potential bidders; and

(d) conducting promotional activities (such as lucky draws, talks and exhibitions) and distributing regular market newsletters to attract customers.

The resources required for the above measures will be absorbed within the Department's allocation.

Question :

Please use a table to illustrate the number of live poultry stalls in various public markets currently and before the voluntary surrender scheme? How will FEHD deal with the vacant stalls due to surrender of tenancy agreement?

Asked by : Hon. WONG Yung-kan

Reply :

The total number of occupied live poultry stalls in the public markets before the commencement of the voluntary surrender scheme in July 2004 is 449. The number of occupied live poultry market stalls as at end-February 2007 is 263. Please refer to Annex for details.

The Department will review the position in individual markets and consider the most beneficial use of these vacant stalls. The decision for each market may vary, having regard to the types of business being conducted and the internal environment in the market.

Question :

Regarding the target for “inspecting vehicles carrying vegetables at Man Kam To Food Control Office”, please advise on whether additional resources and manpower will be deployed to various control points for inspection of imported vegetables to combat smuggling of vegetables from the Mainland. If so, what are the manpower and resources involved?

Asked by : Hon. LEE Kok-long, Joseph

Reply :

Financial provision has been included in the 2007-08 Estimate for the creation of 28 additional Health Inspector grade posts to reinforce staff deployment at frontier control points with a view to enhancing imported food inspection services, including checking importation of vegetables not coming from registered farms in the Mainland. The amount of financial provision allocated for inspection of imported vegetables to combat smuggling of vegetables from the Mainland is not separately identifiable.

Question :

Despite the establishment of the Centre for Food Safety in 2006-07 and the 13.7% increase in the provision for food safety and public health for 2007-08 over 2006-07, the target for “food surveillance through testing of food samples” is not enhanced with the planned figure similar to the 2006 actual figure. What are the reasons?

Asked by : Hon. TAM Yiu-chung

Reply :

The original estimated number of food samples to be taken for testing under the routine food surveillance programme in 2006 was 63 000. In response to the occurrence of various food related incidents in 2006, about 2 000 additional samples were taken for testing during the year. The 2007-08 Estimate, which is based on the actual number of samples taken in 2006, has already provided for an increase of 2 000 additional food samples under the regular food surveillance programme, as compared with that as shown in the 2006-07 Estimate (i.e. 63 000 samples). Furthermore, additional samples will also be taken during the year in response to food complaints and food incidents.

The increase in financial provision for food safety in the 2007-08 Estimate is for enhancing import control, strengthening veterinary input in local slaughterhouses as well as enhancing risk communication capabilities.

Question :

What are the specific plans for prevention of avian influenza in 2007-08? What is the expenditure involved in taking blood samples from poultry?

Asked by : Hon. TAM Yiu-chung

Reply :

The control measures taken to prevent the introduction of avian influenza into Hong Kong include poultry farm inspections and liaison with the Mainland authorities to ensure that requirements on animal health, quarantine and farm conditions are complied with; inspection of every consignment of imported poultry including verifying Animal Health Certificates, and collecting blood samples and cloacal swabs for laboratory testing of avian influenza H5.

A financial provision of \$6.8 million has been included in the 2007-08 Estimate for inspection and blood sampling at the border control point.

Question :

Regarding the number of vehicles carrying poultry inspected at Man Kam To, the 2005 actual figure was 30% less than the figure for 2004. There is a further 23% reduction in the 2006 actual figure and another 8.2% reduction in the 2007 estimated figure. What are the reasons? What are the plans in 2007-08 to ensure poultry imported to Hong Kong are safe for consumption?

Asked by : Hon. TAM Yiu-chung

Reply :

The estimated number of vehicles carrying poultry inspected at Man Kam To in 2007 is based on the current number of live poultry supplied from the Mainland which is set at 20 000 live chickens per day. The decreasing number of imported live poultry is a result of the Government's measures to minimize the occurrence of avian influenza in Hong Kong.

Measures to ensure safety of imported live poultry include poultry farm inspections and liaison with the Mainland authorities to ensure that requirements on animal health, quarantine and farm conditions are complied with, import inspection on every consignment of live poultry including verifying Animal Health Certificates, and collecting blood samples and cloacal swabs for laboratory testing of avian influenza H5.

Question :

The Administration will continue to convert designated aqua privies into flushing toilets by phases in 2007-08. Please advise on the details, projected timetable, manpower, expenditure and anticipated progress of the conversion works.

Asked by : Hon. LEONG Kah-kit, Alan

Reply :

The approved conversion project covers the upgrading of 100 aqua privies in the New Territories and outlying islands into flushing toilets. It has been implemented by phases starting from early 2005, at a total estimated cost of \$92.8 million. The last batch of 37 aqua privies will be converted by end 2007. The manpower for planning and implementation of the conversion works is met by existing resources and is not separately identifiable.

Programme: (1) Agriculture, Fisheries and Fresh Food Wholesale Markets

Controlling Officer: Director of Agriculture, Fisheries and Conservation

Director of Bureau: Secretary for Health, Welfare and Food

Question:

Under Matters Requiring Special Attention in 2007-08, the task of “enhancing the management of Western Wholesale Food Market and Cheung Sha Wan Wholesale Food Market by implementing a vehicle and pedestrian entry registration system” is mentioned. It is learned that the Department already implemented the said registration system in 2006-07. What are the details of the task to be carried out in the coming year and what is the amount of provision required?

Asked by: Hon. FANG Kang, Vincent

Reply:

In 2007-08, we shall continue to implement the entry registration system in Cheung Sha Wan Wholesale Food Market and Western Wholesale Food Market. Under the system, all market users and visitors are required to show either a Market Entry Permit or have their names, identity card number and purpose of visit recorded on entering the markets. This aims to deter unscrupulous people from using the market for unlawful activities, and to facilitate normal trading activities and market management. A provision of \$13 million is allocated for the task.

Head: 22 Agriculture, Fisheries and Conservation Subhead (No. & title):
Department

Programme: (1) Agriculture, Fisheries and Fresh Food Wholesale Markets

Controlling Officer: Director of Agriculture, Fisheries and Conservation

Director of Bureau: Secretary for Health, Welfare and Food

Question:

The estimate for Programme (1) will increase by \$120.2 million in 2007-08. It appears that a substantial part of the increase will be used in helping the development of the local fish farming industry. Please specify the areas in which the provision will be used and explain why such huge support is offered to the fish farming industry. Apart from the fish farming industry, are there plans to help other agricultural sectors such as poultry keeping?

Asked by: Hon. FANG Kang, Vincent

Reply:

Of the additional provision of \$120.2 million earmarked in 2007-08, about \$9.6 million would be allocated for setting up a voluntary registration scheme for local pond fish farms and carrying out a baseline survey on local fish farms to gather information on the environmental conditions and management practices of the farms as well as the food safety conditions of cultured fish. This new initiative is mainly aimed to facilitate the planning and implementation of suitable measures for the food safety control of locally cultured fish in future. The other increase in the provision is mainly due to the higher cashflow requirement for the ex-gratia payment to live poultry operators and one-off grants to affected workers under the Voluntary Surrender Scheme for the live poultry industry.

Apart from fisheries, the Government also promotes the sustainable development of agriculture through the provision of infrastructural support, technical assistance and advice, credit facilities and vocational training to local farmers. In 2007-08, we will assist farmers to capture high-value market niches by promoting the development of organic farming and intensive greenhouse production, implementing the Accredited Farm Scheme, as well as developing brand names and marketing network for local agricultural products emphasizing on good quality.

The department will also assist livestock farmers who have joined the voluntary surrender scheme to switch to other farming operations. Assistance provided includes the provision of training and demonstration on mushroom production, intensive greenhouse production and indoor fish fry rearing. We have also established a one-stop service assisting livestock farmers seeking the necessary approvals for converting their livestock sheds for these purposes.

Question:

Under Analysis of Financial Provision, it is mentioned that there will be increase in non-recurrent expenditure for the financial support schemes for live poultry farmers, wholesalers and related transporters. Does the Administration expect increase in licence surrender this year? In the year ending 31 March 2007, how many farmers and traders have surrendered their licences and what is the amount of expenditure involved?

Asked by: Hon. FANG Kang, Vincent

Reply:

In 2006-07, 57 poultry farmers (including 33 chicken, 23 pigeon and 1 duck farmers) have surrendered their livestock keeping licences, and 4 poultry wholesalers have surrendered their market stall tenancies, involving a total ex-gratia payment of \$75.8 million. We expect 56 more poultry farmers (including 52 chicken and 4 pigeon farmers) will surrender their livestock keeping licences in 2007-08.

Head: 22 Agriculture, Fisheries and Conservation Subhead (No. & title):
Department

Programme: (3) Animal, Plant and Fisheries Regulation and Technical Services

Controlling Officer: Director of Agriculture, Fisheries and Conservation

Director of Bureau: Secretary for Health, Welfare and Food

Question:

The number of staff as at 31 March 2008 for "Programme (3) Animal, Plant and Fisheries Regulation and Technical Services" is 475 while those for "Programme (1) Agriculture, Fisheries and Fresh Food Wholesale Markets" and "Programme (2) Nature Conservation and Country Parks" are 310 and 1 109 respectively. However, Programme (3) accounts for 46% in the allocation of provision for 2007-08. Please explain the reasons for this.

Asked by: Hon. WONG Ting-kwong

Reply:

The 2007-08 Estimate for Programme (3) is \$662.3 million which accounts for 46% of the total provision of \$1,439.4 million. Among the \$662.3 million, about \$446.8 million is provided for the estimated cash payment in the year for ex-gratia payment to pig farm licencees and one-off grant to pig farm and live pig transport workers under the Voluntary Surrender Scheme of livestock keeping licences for the live pig industry. These non-recurrent payments do not have any relation to the number of staff.

Head: 22 Agriculture, Fisheries and Conservation Department Subhead (No. & title):

Programme: (1) Agriculture, Fisheries and Fresh Food Wholesale Markets

Controlling Officer: Director of Agriculture, Fisheries and Conservation

Director of Bureau: Secretary for Health, Welfare and Food

Question:

How many farms are currently participating in organic cultivation and greenhouse production? Among the accredited farms, how many are participating in organic cultivation? Will the technical input offered by the Government also help reduce the cultivation expenditure, which in turn leads to lower product price to the benefit of the general public?

Asked by: Hon. WONG Ting-kwong

Reply:

At present, there are 80 organic farms, of which four also practise greenhouse production, and 13 are accredited farms. There are eight other greenhouse farms producing cut flowers. The technical support provided by Agriculture, Fisheries and Conservation Department can help farmers acquire the necessary knowledge and skills, and employ improved farm inputs for production. This in turn can bring about increased productivity, improved produce quality and effective control on production cost. Consumers at large are benefited with increased choices and better value for money.

Question:

The target for mariculture farms adopting environmentally-friendly practices is 14.2 hectares (total area) in 2007-08, which is exactly the same as that in 2005 and 2006. What is the reason for no upward adjustment for the figure? Does the Administration have any plans to offer measures to mariculturists so as to encourage them to build more environmentally-friendly fish culture farms?

Asked by: Hon. WONG Ting-kwong

Reply:

The low profit margin of mariculture operations due to increase in operating costs in recent years has rendered local mariculturists less willing to adopt environmentally-friendly culture practices. As a result, the small increase in the number of farms switching to environmentally-friendly practices has been offset by the number of farms dropping out. The target remains unchanged. In 2007-08, this department will continue to promote environmentally-friendly culture practices including the use of dry pellet feeds and proper waste and refuse disposal measures to reduce water pollution in fish culture zones. We provide technical advice and assistance in the selection and purchase of suitable feeds, and organize educational and publicity activities for fish farmers. We will also continue to implement the Accredited Fish Farm Scheme to help fish farmers raise production and quality control standards through the adoption of proper farm management and good aquaculture practices.

2493

Head: 48 Government Laboratory
Programme: (1) Statutory Testing

Subhead (No. & title):

Controlling Officer: Government Chemist

Director of Bureau: Secretary for Health, Welfare and Food

Question:

Regarding "food samples for regulatory compliance purposes", 112 421 tests were performed in 2006 and the estimate for 2007 is 130 000. The Laboratory also plans to establish a Food Safety Testing Laboratory for enhancement of food safety testing in Hong Kong:

1. What are the types and quantities of food to be added for testing?
2. Will the Government step up sample laboratory tests on vegetables and fruits imported from the Mainland? If so, what are the details of the tests as well as the sampling spots and levels (retailers, wholesalers and importers)?
3. Can the Government Laboratory make use of the additional provision to enhance its rapid test services to initially identify as early as possible any major food problem, so that the Administration can trace the source as soon as possible and provide to members of the public first hand and correct information on food safety? If so, please give the details. If not, how will the Administration guarantee that it can meet the aspiration of the community be resolving a food safety crisis more swiftly?
4. What are the estimated expenditure and establishment for setting up a food safety and quarantine office, the expected implementation date and timetable for public consultation?

Asked by: Hon. LEE Kok-long, Joseph

Reply:

1. The Food Safety Testing Laboratory (FSTL) will perform a wide range of chemical analysis of food products ranging from major components to additives, contaminants, agricultural and veterinary residues, and genetically modified ingredients for surveillance and verification of compliance with the statutory standards. It also provides analytical services related to food complaint cases. The estimated number of tests performed in 2007 is 142 000, including the testing of samples for regulatory compliance and food complaint.
2. Tests for fruits and vegetables have already been included in the surveillance programme of the Centre for Food Safety. Samples will be taken at the import, wholesale and retail levels for testing of pesticides residues and heavy metals under a risk based approach.
3. With the additional resources, GL will help to manage food safety problem by providing development and testing services to widen the scope of food monitoring as well as urgent testing services for topical food safety issues. New and fast testing methods will be developed to speed up the time for analysis whenever feasible. GL will also acquire additional instruments to strengthen the analytical capability for testing of food samples.
4. There is no plan to set up a food safety and quarantine office. The staffing establishment of the Laboratory consists of 23 professional and 60 technical staff. The estimated recurrent provision required in 2007-08 for food safety is \$49.9 million.

Welfare and Food Bureau (Food and
Environmental Hygiene Branch)

Programme: (2) Agriculture, Fisheries and Food Safety

Controlling Officer: Permanent Secretary for Health, Welfare and Food (Food and Environmental Hygiene)

Director of Bureau: Secretary for Health, Welfare and Food

Question:

Provision of 2007-08 has increased by nearly \$50 million when compared with the revised estimates for 2006-07. The targets to be achieved includes promoting sustainable development of local agriculture by promoting organic farming. Please provide and explain the following:

1. a comparison of the allocation for promoting organic farming, details of the plans and staff establishment for 2006-07 and 2007-08;
2. the efficacy of the plans in 2006-07 and the projected targets for 2007-08;
3. the number of existing farms engaged in organic farming and the projected increment in acreage and number of farms dedicated to organic farming;
4. projected increment in market share of organic farm products in 2007-08;
5. whether additional resources will be made available to increase technical support to the sector. If yes, please provide details and the expenditure involved; and
6. whether additional resources will be provided to assist more District Councils to collaborate with the agricultural sector to organize farmers' market or urban farms.

Asked by: Hon. LEE Kok-long, Joseph

Reply:

1. The Government promotes the sustainable development of agriculture through the provision of infrastructural support, technical assistance and advice, credit facilities and technical training to local farmers and most of these support are provided by the Agriculture, Fisheries and Conservation Department (AFCD). AFCD has allocated a total of \$11.8 million (under Head 22) to provide for 27 staff and other operational expenses for promoting organic farming in 2006-07. The same manpower and financial resources are earmarked in 2007-08 to continue the promotion of local organic produce emphasizing qualities, safety and environmental protection. New or improved vegetable varieties will be introduced to stimulate market demand and capture high end markets for better economic returns. In addition, AFCD will organize promotional activities and exhibitions to promote local organic produce.
- 2-4. During the year, there has been marked improvement in the quantity, variety and quality of local organic vegetables. The number of local organic farms also increased from 53 in 2006 to 80 in 2007, producing some 3-4 tonnes of organic vegetables a day. The technical support provided by AFCD helped farmers acquire the necessary knowledge and skills, and employ improved farm inputs for production. This in turn can bring about increased productivity, improved produce quality and effective control on production cost. Consumers at large are benefited with increased choices and better value for money. The development of local organic farming is totally market driven and the Government does not project the increase in the market share of organic farm products in 2007-08.
- 5-6. AFCD will continue to deploy the current level of resources to provide technical support to local farmers. In

addition, the department will assist farmers to market their produce to high end markets through the sales network of the Vegetable Marketing Organization, encourage direct sale through agro-tourism and weekend farmer markets, and organize regular promotional activities and exhibition to promote local produce to consumers.

Director of Bureau: Secretary for Health, Welfare and Food

Question:

On introduction of a nutrition labelling scheme for prepackaged food, the authorities concerned has said that an amended legislation would be tabled in 2006-07 but, to date, there has not been any progress. Please advise:

1. the current progress of the plan, the completion date for the amendments as well as details of the work, expenditure and staff involved in 2006-07?
2. Many international food chains have given up using trans fat in food preparation. There is also documentary evidence that indicates that transfat increases the risks of developing chronic diseases in humans. Some organizations have demanded strengthening public education and incorporation of transfat acids in Phase I of the labeling scheme. Please advise whether the work for 2007-08 includes studying the above proposals and actively promoting public discussion on the subject? If yes, please provide specific details of the plan, resources required and manpower involved? If not, please state the reasons.

Asked by: Hon. LEE Kok-long, Joseph

Reply:

1. We are now working out our proposal having regard to the latest developments of nutrition labelling schemes in different jurisdictions, including the Mainland. We are consulting the relevant stakeholders on the proposal to ensure that the labelling requirements would be able to balance the requests from different parties. We intend to submit the draft legislation within the legislative session in 2007-08. In 2006-07, the work concerned was undertaken by the existing staff at the Health, Welfare and Food Bureau and the Centre for Food Safety but the time devoted to related activities on nutrition labelling cannot be separately quantified.
2. In response to public health concerns over trans fat, the Administration will introduce a series of activities to raise the awareness of the community on the health effects of consuming trans fat. These activities include the dissemination of education leaflets, newsletters, organizing talks, as well as a study to examine the levels of trans fat in various indigenous foods. The feasibility of including trans fat as one of the core nutrients in the proposed labelling scheme on nutrition information will also be explored. The resources required to introduce the above activities in 2007-08 will continue to be absorbed by the Health, Welfare and Food Bureau and the Centre for Food Safety but the resources devoted to such activities cannot be separately quantified.

Controlling Officer: Permanent Secretary for Health, Welfare and Food (Food and Environmental Hygiene)

Director of Bureau: Secretary for Health, Welfare and Food

Question:

Please explain why the revised estimate for 2006-07 was 13% higher than the original estimate and which item under the programme has increased in expenditure.

Asked by: Hon. FUNG Kin-kee, Frederick

Reply:

The increase of \$1.5 million (13%) in 2006-07 revised estimate for Programme (3) : Environmental Hygiene, as compared with the 2006-07 original estimate, is mainly due to the increase in operating expenses to strengthen support to environmental hygiene-related activities and the salary for the post of Permanent Secretary for Health, Welfare and Food (Food and Environmental Hygiene) created since May 2006 for which no provision had been made in the original estimate.

Controlling Officer: Permanent Secretary for Health, Welfare and Food (Food and Environmental Hygiene)

Director of Bureau: Secretary for Health, Welfare and Food

Question:

The provision for agriculture, fisheries and food safety for 2007-08 has more than tripled, when compared with the previous year, and increased to 48.1 million. The Bureau indicated that the provision would be used to strengthen food safety, prevent zoonotic diseases and promote the sustainable development of local fisheries industry. Please provide details of the allocation as well as the net creation of the five posts in the coming year, including their ranks and salary expenditure.

Asked by: Hon. FANG Kang, Vincent

Reply:

The increase in funding provides for all the major initiatives as listed in the section "Matters Requiring Special Attention in 2007-08". In brief, the major initiatives are to provide for expenditure under the Voluntary Surrender Scheme for pig farmers (\$20 million), provision of posts to strengthen food safety functions (\$5.59 million); consultancy study to promote sustainable development of local agricultural and fisheries industries (\$3 million); and contingency funding to meet expenditure for controlling avian influenza (\$19.5 million).

A total provision of \$5.59 million has been made to pay for the post of the Permanent Secretary for Health, Welfare and Food (Food and Environmental Hygiene) as well as five new posts required to launch the initiatives in this Programme and Programme (3) Environmental Hygiene. The ranking and notional mid-point salary of the new posts are as follows -

Rank	<u>Annual Salary</u> (Notional annual mid-point salary)
Administrative Officer Staff Grade C	\$1,360,800
Senior Executive Officer	\$681,180
Senior Information Officer	\$622,440
Personal Assistant	\$481,020

Question:

The Bureau will make special provision to promote the sustainable development of local agriculture and fisheries industries in 2007-08. However, the Government has been gradually phasing out live poultry and poultry keeping in Hong Kong in recent years. Does the Government have any specific strategy and support provision for the long-term development of agriculture and fisheries industries? Does the Government have any specific target for the local market share of local agriculture and fisheries products?

Asked by: Hon. FANG Kang, Vincent

Reply:

The Government promotes the sustainable development of agriculture and fisheries through the provision of infrastructural support, technical assistance and advice, credit facilities and vocational training to local farmers and fishermen. In 2007-08, we have earmarked \$3 million under Head 139 for conducting studies on measures to promote the sustainable development of local fisheries industry. The support measures are chiefly provided by the Agriculture, Fisheries and Conservation Department (AFCD). In relation to agriculture, the AFCD assists farmers to capture high-value market niches by promoting the development of organic farming and intensive greenhouse production, implementing the Accredited Farm Scheme, as well as developing brand names and marketing network for local agricultural products emphasizing good quality and food safety. AFCD also devises programmes to assist livestock farmers who choose to exit their trade and take up other modes of farming. In relation to fisheries, the AFCD has set up a Committee on Sustainable Fisheries to study the overall direction and long term goals for the fisheries industry and on the viable strategies and options for the sustainable development of the industry. We do not set a target market share for locally produced agricultural and fisheries produce.

Question:

On considering ways to improve the occupancy and viability of public markets under Matters Requiring Special Attention, please inform this Committee: the latest progress of the above study; the ways of improvement being explored by the Government; and whether the Government has assessed the expenditure to be saved upon the implementation of these improvement measures. If yes, please provide the amount. If not, please state the reasons.

Asked by: Hon. FUNG Kin-kee, Frederick

Reply:

We will provide steer to the Food and Environmental Hygiene Department (FEHD) on improving the occupancy and viability of public markets. The measures already adopted include improving the facilities of markets and launching promotional programme to attract more trades and patronage. In 2007-08, a financial provision of \$3 million has been earmarked under Head 49 FEHD for the proposed market promotion measures. An amount of \$103 million has also been earmarked under the Capital Works Reserve Fund for general improvement works in 10 markets in 2007-08. The improvement measures do not generate savings for Government.
