

**Replacement of Government Fleet
with Environment Friendly Vehicles**

Based on the latest list of environment friendly car models compiled by Environment Protection Department, the Government Logistics Department estimates that about 200 government cars will be replaced by environment friendly models in 2007-08, subject to detailed assessment nearer the time. Against the current establishment of 1,120 cars in the government fleet which have environment friendly models available, this will constitute about 18% of the car fleet.

2. An average of about 12% of the cars in the government fleet are due for replacement each year. The Government will continue to give priority to those environment friendly models complying with the specified qualifying standards when replacing vehicles that are due for replacement each year, subject to availability of suitable models in the market and operational and resources considerations.
