Submission of the Equal Opportunities Commission	
<i>Treatment of disabled and non-disabled athletes</i>	
<ul style="list-style-type: none">• The level of financial support for non-disabled elite athletes is much higher than those for the disabled, be it under the current scheme or the enhanced support scheme.	<ul style="list-style-type: none">• The schemes provided for disabled and non-disabled athletes are materially different for both historical and practical reasons. For non-disabled athletes, financial support is aimed at assisting athletes to achieve excellence in sports and compete in major games. For disabled athletes, other sources of financial support (such as the Hong Kong Paralympians Fund), and other rehabilitation and social welfare services are available according to their needs, so as to encourage their participation in sports training.
<ul style="list-style-type: none">• Whether the Hong Kong Sports Institute (HKSI) or the Government has given thoughts to the possibilities of equalising the grants under the Sports Aid Foundation Fund (SAFF) and the Sports Aid for the Disabled Fund (SADF).	<ul style="list-style-type: none">• The level of grants to non-disabled or disabled athletes depends on factors such as the difference among the sports games, training needs and support available outside HKSI. The circumstances in the case of non-disabled athletes are materially different from those in the case of disabled athletes and there have always been two separate support schemes for these classes of athletes.• Nonetheless, the Administration agrees that in justified circumstances, such as when disabled athletes are giving up their studies or career in pursuing sports excellence, enhanced financial support should be provided. HKSI has agreed in principle that, subject to the recommendations from the relevant national sports associations (NSAs)

The Hong Kong Paralympic Committee and Sports Association for the Physically Disabled (HKPC&SAPD) and the Hong Kong Sports Association for the Mentally Handicapped have been informed of this proposal and are content.</p> <ul style="list-style-type: none"> • The Administration has met the representative of the Equal Opportunities Commission (EOC) on the treatment of disabled and non-disabled athletes together with representatives of HKSI on 17 May 2007. EOC has been informed that the sports sector as a whole is aware of and accepts the difference with the level of financial support disbursed through HKSI. The Administration will continue to discuss with EOC on this issue as necessary to address EOC's concern.
Submission of Mr Kwok Ming-chi	
<i>Provision of community sports facilities</i>	
<ul style="list-style-type: none"> • There seems to be a general lack of sports facilities in the New Territories West (NTW) region. The Administration should redress this shortfall rather than invest heavily on the redevelopment of HKSI. 	<ul style="list-style-type: none"> • The Administration is conscious of the recreational needs of residents in NTW region. In this connection, a total of 34 projects with an estimated project cost of some \$4,400 million are under construction or active planning in the NTW region, including Islands, Kwai Tsing, Tsuen Wan, Tuen Mun and Yuen Long Districts. Details of these projects arranged by district are at <u>Enclosure I to V</u>.

<i>HKSI Elite Training Funds Allocation</i>	
<ul style="list-style-type: none"> The current funding policy for elite sports depends largely on the number of medals won by each sport or on the potential of the sport to win medals. A more equitable basis should be adopted. 	<ul style="list-style-type: none"> HKSI advises that as sports are different from one another in terms of equipment, facilities, squad size, format of play, international/professional development, participation in Asian and Olympic Games status, etc., it is impractical to allocate equal funding to each of the elite sports supported by HKSI. Besides, the outstanding achievements of Hong Kong athletes in the Doha Asian Games have proved that HKSI's current funding mechanism for elite sports is effective. That said, HKSI management will consider and review the established funding patterns of different sports, the training needs, global development of different elite sports and the interest of all parties in allocating funding for the training programmes of each elite sport.
<i>Sports facilities</i>	
<ul style="list-style-type: none"> Lack of sports facilities for holding major sports events. 	<ul style="list-style-type: none"> The Government understands the importance of equipping Hong Kong with up to standard facilities to support the staging of major sports events.
