LC Paper No. CB(2)1570/06-07(02)

Submission from The Hong Kong Paediatric Society on
Comprehensive Child Development Service (CCDS)
(12 April 2007)

1. The Hong Kong Paediatric Society supports the underpinning philosophy of the Comprehensive Child Development Service.
2. The HKPS applauds the Government's visionary step in promoting Early Intervention as a strategy to improve childhood developmental outcomes
3. The HKPS supports the use of Community Primary Health Centre (MCHC) as a platform in delivery of the CCDS
4. The HKPS recognizes the difficulties in managing these vulnerable children because of their complicated background.
5. Comprehensive training in managing childhood health and developmental problems is necessary in effectively engaging families at risk.
6. Many of these families are at risk of domestic violence or child abuse. Staff in CCDS should have practical experience in child protection.

Prepared by Dr Yu Chak Man
Vice President
The Hong Kong Paediatric Society
