Immediately improving the health care services in Hong Kong

Dr Hon KWOK Ka-ki moved the following motion and addressed the Council:

That, the Consultation Document on Health Care Reform has given rise to extensive discussion in the community since its publication, and no consensus has so far been reached on supporting any "supplementary financing" option requiring mandatory contribution or mandatory insurance, yet there are currently many problems in Hong Kong's health care services, thus this Council urges the Government to implement a series of measures to immediately improve Hong Kong's health care services; such measures must include:

- (a) immediately using part of the \$50 billion health care funding to improve Hong Kong's health care services, and using the remaining provision to set up a health care service fund, allocating part of the fiscal surplus to the fund in future, and making reference to the profit-sharing arrangement of the Exchange Fund, to provide stable funding for Hong Kong's public health care services;
- (b) the Authorities substantially augmenting the provision of resources to improve existing services, increasing the use of new psychiatric drugs and thoroughly considering the views of stakeholders in formulating long-term psychiatric treatment and rehabilitation policy, in view of the persistent lack of resources and long-term service planning for psychiatric treatment, rehabilitation and support services;
- (c) increasing the funding for the Hospital Authority (HA) to address the plight of persistent shortage of resources suffered by some hospital clusters or district hospitals, reducing the working hours of HA doctors, improving the promotion prospects of doctors and the situation of unequal pay for the same work, in order to retain experienced and middle-ranking doctors and health care workers as well as boost staff morale;
- (d) proactively allocating land for the construction of new private hospitals and assisting existing private hospitals in their extension, so as to increase the provision of beds in private hospitals;
- (e) increasing training resources and opportunities for specialists to enable various medical specialties to have sufficient room for development, thereby providing patients with the most suitable services;

- (f) re-opening nursing schools and increasing the number of places for nursing degree programmes to boost nursing manpower;
- (g) through promoting various public-private partnership (PPP) projects on health care services to improve the imbalance between public and private health care services which has existed for a long time, and supporting PPP in dental services;
- (h) providing additional resources for HA or patients to purchase drugs, such as drugs for curing cancer, and immediately reviewing the Drug Formulary to avoid patients being denied effective drugs with little side effect due to financial difficulties and to reduce misunderstanding between doctors and patients;
- (i) through purchasing services from community doctors or increasing the manpower of general outpatient clinics to reduce the number of cases in each consultation session attended by outpatient doctors and shorten patients' waiting time, thereby enhancing service quality;
- (j) strengthening regulation of private medical insurance and encouraging the industry to provide medical insurance which is in line with public interest, such as insurance which does not discriminate against mental or chronic illness;
- (k) increasing the value of elderly health care vouchers to at least \$1,000 a year and providing low-income families with such vouchers;
