Hong Kong

(Attn: Ms Angel SHEK)

Dear Ms SHEK,

**Public Works Subcommittee
Follow-up to Meeting on 7 May 2008**

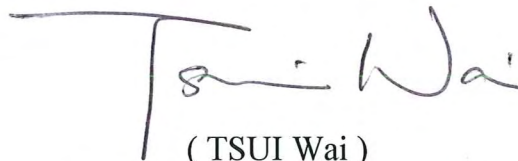

**Supplementary Information on
Design of Railings along the Proposed Drainage Channels
Pertaining to PWSC(2008-09)7**

We refer to your letter referenced CB1/F/2/6(II) of 8 May 2008 to the Secretary for Financial Services and the Treasury.

In considering the paper referenced PWSC(2008-09)7 on 118CD “Drainage improvement in Northern New Territories – package B”, a Member was of the view that the design of railings along the proposed drainage channels under the project should be commensurate with the natural environment. The Administration agreed to provide further information on the design of railings.

The design of the railings along the drainage channels will match with the surrounding environment. For the sections of drainage channels located in a natural setting, we will use railings mimicked with natural timber (sample shown in **Annex**). For other sections of drainage channels located near village communities where there are more pedestrians, we will further consult the local villagers before we would decide on the design of the railings.

Yours sincerely,

A handwritten signature in black ink, appearing to read 'Tsui Wai', written in a cursive style.

(TSUI Wai)
for Director of Drainage Services
