

**Public Works Subcommittee Meeting on 30 November 2007
Issue Requiring Follow-up Actions by the Administration**

Item PWSC(2007-08)53

Issue At the request of Hon Emily LAU, the Administration agreed to consider, in consultation with the Planning Department, the inclusion of standard provision for heated pool facilities in the Hong Kong Planning Standards and Guidelines to cater for the increasing demand for such facilities in the community and report on the outcome in due course.

Response

It is our objective to promote year-round swimming. We are also aware of the increasing public demand for heated pool facilities. In fact, the Hong Kong Planning Standards and Guidelines (HKPSG) suggest that, where resources permit, heated pools should be provided in new swimming pool projects. In line with this guideline, heated pools have been included in all 11 swimming pool projects under construction or planned for works commencement from 2007 to 2009. Upon completion of these projects, there will be a total of 25 public swimming pools with heated pool facilities, representing a 56% increase in the provision of such facilities. A list of the existing and planned provision of heated pool facilities is enclosed.

In planning for new swimming pools, we will continue to follow the guideline mentioned above to provide heated pool facilities. We will also continue to closely monitor the public demand and utilisation rate of heated pool facilities with the objective of better serving the community.
