From : Clerk to the Legislative Council

To : All Members of the Legislative Council

Council meeting of 12 March 2008

**Motion on
“Improving the public hospital services in Kowloon East”**

Hon Alan LEONG Kah-kit has given notice to move the attached motion on “Improving the public hospital services in Kowloon East” at the Council meeting of 12 March 2008. The President has directed that “it be printed in the terms in which it was handed in” on the Agenda of the Council.

(Mrs Justina LAM)
for Clerk to the Legislative Council

Encl.

(Translation)

Motion on
“Improving the public hospital services in Kowloon East”
to be moved by Hon Alan LEONG Kah-kit
at the Legislative Council meeting
of Wednesday, 12 March 2008

Wording of the Motion

“That, as the current funding provision for the Kowloon East Hospital Cluster is far more insufficient than other clusters and lags far behind the needs of the population and the communities of Kwun Tong and Tseung Kwan O, resulting in the Kowloon East Hospital Cluster failing to provide comprehensive health care services, which is not only contrary to the vision of ‘meeting community demands and expectations’ but also exerts tremendous pressure on the frontline health care personnel and impedes their provision of most suitable services for the residents within the districts, this Council strongly urges the Administration to:

- (a) taking the opportunity of the present huge surplus and not affecting the services of other hospital clusters, allocate more resources, according to the population and community structure of the Kowloon East Hospital Cluster, to expeditiously improve the public hospital services in Kwun Tong and Tseung Kwan O, and solve the problem of residents in the two districts having to seek medical treatments in other clusters, and in particular, the implementation of the United Christian Hospital’s reconstruction plan must be expedited; and
- (b) focusing on the long-term demand of health care services in various districts, study and review the mechanism of hospital cluster planning as well as the logic of operation of hospital services.”
