

I am a RSW and is now working in the university. I used to work in an IFSC but I quitted the job a year ago because I noticed the negative effects of LSG to both the colleagues and the agency. After launched the LSG, I observed that the agency always used a money minded orientation in service provision. Moreover, there were a lot of inequalities between the colleagues in old system and new system. Although I am now in contract based and without a stable income, I really want to do the services which are benefit the public. Thus, I strongly request to review the LSG as soon as possible.

Thank you.
