

Panel on Information Technology and Broadcasting

List of outstanding items for discussion
(position as at 8 July 2009)

Proposed timing
for discussion

1. Review of telephone directory enquiry service

In accordance with the current licence condition, fixed carrier licensees are required to provide directory information services (including printed directory and directory enquiry service) free of charge to the customers. No such licensing requirement is imposed on mobile carrier licensees. The OFTA has recently commissioned an independent consultant to conduct a market survey to find out the public's perception and expectation on the directory information services. Based on the results of the market survey, the OFTA is preparing to conduct a public consultation to solicit the views and comments from the general public and the industry on the proposed way forward.

Next legislative
session

2. Regulation of radio broadcasting

Following the incident on unlicensed broadcast by Citizens' Radio leading to the prosecution of a number of persons for breaching the provisions in the Telecommunications Ordinance (TO) (Cap. 106), some Panel members expressed concern that the Administration seemed to have enforced the concerned provisions selectively. As such, the Panel requested the Administration to brief members on the prevailing policies relating to the regulation of radio broadcasting and the use of radiocommunications apparatus for the purpose of radio broadcasting at the Panel meeting on 19 February 2008.

To be confirmed

At the Panel's request, the Research and Library Services Division (RLSD) of the LegCo Secretariat conducted a research on the regulation of radio broadcasting services in Canada, the United States, the United Kingdom and Australia to facilitate members' future deliberation on the situation in Hong Kong. RLSD presented its report to the Panel on 10 June 2008. Members were concerned about the Chief Executive in Council's unchecked powers to approve or reject a licence application, the absence of an appeal mechanism and the lack of transparency, accountability and public participation in Hong Kong's sound broadcasting licensing regime. Members called for an early review of the TO to enhance the fairness and transparency of the licence processing procedures. The Panel will continue to follow up the item in the next legislative session.
