Subject CHAN KAR TAI LETTER FOR 25 MAY MEETING SECTION  
THREE

To whom it may concern:

I have heard a lot about the Methods for selecting the chief executive and for forming the legislative council currently. I come to give you a different point of view about the issue.

I am an IT professional; I have got a Master degree of Information System and have more than 20 years working experience at system development. As a professional, we always want to develop a system at a step by step, phase by phase approach to reduce risk. There are only 2 exceptions; 1/. The system is very simple, 2/. The system is not important. In this case, I don't think we should give up the step by step approach.

For functional constituencies, I do believe they have their positive functional for the legislative council. My reason is, they can balance the benefit of boss and staff, balance the interest of company and worker, and balance the wealth of rich and poor. I feel that most of the Hong Kong peoples are not capable to make the balance themselves.

Functional constituencies are the hottest topic, because it seems to be not a fair system. Government should take more necessary steps to improve the arrangement.

Rgds,
