

To the Secretariat,

I am the owner of Go On Global Company Limited which is a SME company based in HK for export and wholesales business. Regarding the current hot topic of Competition Law, I disagree HKTDC should be included in this system because it is the only organization showing quality and reliable service to SME including exhibitions and business development in HK and or overseas. If Competition Law applies to them, first of all we will not join the fair because of higher cost. After HKTDC, I did experience the other fairs by other organizations, however, they are not really dedicating big effort to do the right quality or more focusing on their own big profit. HK needs an organization having social responsibility to commit the development of SME on a safe and reliable platform.

Regards,
Paul Wong
