Ref: CB1/PL/DEV

**Panel on Development**

**Meeting on 22 June 2010**

**Updated background brief on Operation Building Bright**

**Purpose**

This paper provides updated background information on the Operation Building Bright (the Operation) and summarizes the concerns and views expressed by Members during past discussions on the subject.

**Background**

2. At the meeting of the Panel on Development (the Panel) on 31 March 2009, the Administration presented a proposal to implement the \$1-billion Operation at a non-recurrent government expenditure of \$700 million, together with a contribution of \$150 million each from the Hong Kong Housing Society (HKHS) and Urban Renewal Authority (URA), to assist owners of about 1 000 old buildings to carry out repair works. The funding proposal was approved at the Finance Committee meeting on 24 April 2009.

3. At the Panel meeting on 23 June 2009, members were briefed on the progress of the Operation and the Administration's proposal to inject an additional funding of \$1 billion into the Operation in view of the high demand. The funding proposal was subsequently approved at the Finance Committee meeting on 3 July 2009. The budget of the Operation thus totals \$2 billion.

4. According to the Administration, Legislative Council Members and various stakeholders in the community have suggested that expediting building maintenance is a pragmatic way of creating additional jobs in the construction industry. The experience of HKHS and URA in the implementation of various assistance schemes to promote building maintenance and repair reveals that voluntary maintenance of old buildings is often hampered by the absence of owners' organizations and/or the presence of absentee, elderly, low-income and non-cooperating owners. This situation is more serious for old buildings,

buildings with low rateable values, and those without owners' corporations (OCs).

5. The Operation aims to achieve the dual objective of creating more job opportunities in the decoration and maintenance sector of the construction industry as well as promoting building safety and improving the cityscape and living environment. Under the Operation, the Administration in collaboration with HKHS and URA will provide targeted financial support to owners of old and dilapidated buildings to carry out voluntary repair and maintenance works. Where owners are unable to organize repair works by themselves, the Buildings Department (BD) will take complementary actions to mandate such works.

6. The Operation is "building-based" and target buildings of the Operation have to meet the following criteria --

- (a) the buildings are residential or composite buildings aged 30 years or above;
- (b) the buildings comprise no more than 400 residential units;
- (c) the average rateable value of the residential units does not exceed \$100,000 per annum for buildings in urban areas, or \$76,000 per annum for buildings in other areas; and
- (d) the buildings lack maintenance or are in dilapidated conditions, requiring repair or maintenance works (examples include buildings subject to statutory orders issued by BD).

7. Target buildings are divided into two categories. Category 1 covers buildings with OCs and Category 2 covers buildings having difficulties in coordinating repair works, such as buildings without OCs.

8. There are no asset or income means tests for assistance under the scheme. All owners of target buildings (including residential and commercial units) can receive a grant amounting to 80% of the cost of repair, subject to a ceiling of \$16,000. Elderly owner-occupiers aged 60 or above can receive a grant to cover the full cost of repair, subject to a ceiling of \$40,000.

9. The grant must be used for repair works in common areas of target buildings. It should first be used for repair works in common areas relating to improvement of structural and fire safety of buildings and sanitary facilities. After covering the cost of these works, any remaining grant may be used for other repair and improvement works in the common areas. The details of the two types of works are given in **Appendix I**.

10. With a total budget of \$2 billion, the Administration estimated that the Operation should be able to assist about 2 000 target buildings and create 20 000 job opportunities for construction and maintenance workers as well as related professionals and technicians.

### **Discussion at the Panel on Development**

11. The subject was discussed at the Panel meetings on 31 March 2009, 23 June 2009 and 26 January 2010. Panel members in general supported early implementation of the Operation to create job opportunities and enhance building safety.

12. Some members considered that the Administration should work in collaboration with the relevant trade unions so that unemployed workers could be recruited to carry out works under the Operation; and that more construction companies should be allowed to participate in the Operation. The Administration responded that workers in the construction sector would benefit from the Operation, which would increase the number of job opportunities in the sector. The Administration had engaged two term contractors for building repair works, each with a contract sum limit of about \$20 million. The Administration would have to engage more contractors to carry out the repair works under the Operation.

13. Some members suggested that the Administration should review the list of priority items to include the clearance of unauthorized building works (UBWs) and repair of defective fire safety installations. The Administration advised that if UBWs in common areas were to be included as priority items, the progress of other repair works of a higher priority would be affected. UBWs would generally be handled according to the existing policy, and OCs could remove UBWs on their own initiative and the Administration would coordinate with them as far as possible. At the suggestion of members, the Administration subsequently included "repair of defective fire safety constructions, and fire service installations and equipment of buildings" as a priority item in the funding proposal to the Finance Committee.

14. Panel members suggested that the names of approved contractors should be made available to OCs for easy reference and measures should be in place to properly monitor the works and to prevent the hiring of illegal workers. The Administration should also effectively monitor the tendering procedures of OCs to prevent malpractices, and provide comprehensive advice to OCs in respect of various building maintenance subsidy schemes. The Administration advised that a list of authorized persons and approved general contractors had been prepared for OCs' reference. Eligible OCs had to choose at least four contractors from the list when inviting tenders to minimize the possibility of corruption. OCs also had to engage consultancy firms with authorized persons

to monitor the repair works to ensure that the works were in order. The authorized persons engaged by OCs had to certify relevant documents such as inspection reports, tender analyses, works contracts, certificates for disbursement of funds and certificates of completion to ensure the quality of the repair works. Consultants of HKHS and URA would monitor the repair works from their commencement to completion and vet those documents during the whole process before releasing the grants under the Operation.

15. For buildings which were less than 30 years old and those with more than 400 residential units but in highly dilapidated conditions, members suggested that there should also be included in the Operation. If there were still uncommitted funds available after the first call for applications, the Administration should make use of part of such remaining funds to accept new applications for Category 1 target buildings. The Administration advised that it would report to the Panel on the latest expenditure of the Operation to see whether funds were still available and whether there was room to adjust the eligibility criteria.

16. Noting from the Administration's report at the Panel meeting on 26 January 2010 that that 4 700 employment opportunities had so far been created, some members considered that more efforts should be made to increase the number of jobs which was still below the target of 20 000 jobs. Panel members requested the Administration to seek additional resources to continue and expand the scale of the Operation. The Administration advised that building maintenance and repair were primarily the owners' responsibilities. The objective of the Operation was to preserve jobs, and more jobs would come on stream as the Operation progressed. It would be inappropriate for the Government to subsidize private property owners on a long-term basis. Besides, schemes such as the Building Maintenance Grant Scheme for Elderly Owners and the loan and incentive schemes of HKHS and URA were available for property owners with financial difficulties to cover expenses arising from maintenance and repair works for their flats.

17. Panel members have expressed concern about the ongoing management and maintenance of the Category 2 target buildings after the Operation. In the absence of an OC, it would be difficult for owners to properly manage and maintain their buildings. Some members suggested that HKHS, social enterprises, professional institutes or accredited professionals could be engaged to undertake management and maintenance of these buildings. The Administration agreed to consider ways to facilitate property owners in carrying out building management and maintenance works.

## **Discussion at the Finance Committee**

18. When the relevant funding proposals were discussed at the Finance Committee meetings on 24 April 2009 and 3 July 2009, some members enquired about the criteria/mechanism for according priorities to eligible target buildings, the basis for determining the levels of subsidy, and whether it was permissible to carry out beautification works for target buildings. The Administration responded that its intention was to cover as many buildings as possible by fully utilizing the \$2 billion provision. The Administration had followed the priorities accorded by the computer ballot held in June 2009 to gradually process the eligible applications. The selection of Category 2 buildings had been jointly made by a steering committee comprising representatives of BD, HKHS and URA in consultation with the District Councils. As regards the levels of subsidy, the Administration advised that the ceiling of \$16,000 was worked out on the basis of an 80% subsidy for the estimated average repair cost of \$20,000 for each owner of an eligible building. The subsidy level of \$40,000 for elderly owners aged 60 or above was modelled on the rate approved for the Building Maintenance Grant Scheme for Elderly Owners. The Operation also allowed some beautification works arising from the repair works.

19. On members' concern about possible corrupt practices, the Administration advised that a three-pronged approach would be adopted to prevent corrupt practices under the Operation. The staff of HKHS and URA would inspect every selected building and provide advice on procedures and requirements, scope of maintenance works required, preparation of tender documents, tender assessment, and appointment of authorized persons and contractors. OCs concerned would be required to follow the tender procedures and invite a sufficient number of contractors to bid for the works in order to ensure open and fair competition.

20. Regarding some OCs' worries about the clearance of UBWs and barring all units from sale in the market if some owners failed to make the required contributions, the Administration pointed out that only those UBWs which were posing safety hazards or would cause serious obstruction to the maintenance works would be removed during the Operation. The Administration further advised that it had written to OCs of some 13 000 old buildings to publicize the Operation, and would continue its promotion efforts. HKHS and URA would also explain to the owners concerned the procedures and requirements of the Operation.

## **Council questions**

21. Hon LEE Wing-tat, Hon TAM Yiu-chung and Hon CHEUNG Hok-ming had raised questions on the Operation at the Council meeting on 6 January 2010, 24 February 2010 and 14 April 2010 respectively. The Administration had

responded that on completion of works in all eligible buildings, there might be a small amount of uncommitted funds which the Administration intended to use on more target buildings. The whole selection and scrutiny process was conducted by the Steering Committee on Operation Building Bright in an impartial manner under a set of clearly established selection procedures.

### **Latest development**

22. The Administration will brief the Panel on the latest progress of the Operation at its meeting on 22 June 2010.

### **Relevant papers**

23. A list of the relevant papers with their hyperlinks is in **Appendix II**.

## Appendix I

### Use of grants under the Building Operation Bright

The grant must first be used for repair and maintenance works in common areas of target buildings relating to the structural and fire safety of buildings as well as the sanitary facilities, including --

- (a) repair of building structure, e.g. repairing loose, cracked, spalled or defective concrete;
- (b) repair of external walls of buildings, e.g. repairing defective rendering and mosaic tiles;
- (c) repair or replacement of defective windows;
- (d) repair of building sanitary services, e.g. repairing, maintaining and replacing defective soil, waste, rainwater, vent pipes and underground drainage; and
- (e) repair of defective fire safety constructions, and fire service installations and equipment of buildings.

Maintenance works in association with the works in (a) to (e) above, including investigation works and professional services; and any incidental or consequential works, such as touch-up and finishing works arising from the repair or remedial works, will also be covered.

After covering the cost of works stated in the paragraph above, any remaining grant may be used for additional repair and improvement works in the common areas, including --

- (a) removal of unauthorized building works and illegal rooftop structures;
- (b) improvement of fire safety constructions, and fire service installations and equipment of buildings;
- (c) improvement of building services and facilities, e.g. repairing, maintaining and replacing lifts, electrical wiring, gas risers and fresh water pipes;
- (d) maintenance or improvement works for slopes and retaining walls; and

- (e) repair of water-proofing membranes at rooftops and flat roofs and works to alleviate water seepage problems.

Maintenance works in association with the works in (a) to (e) above, including investigation works and professional services; and any incidental or consequential works, such as touch-up and finishing works arising from the repair or remedial works, will also be covered.
