

把鄉村旱廁改建為沖水式廁所 第七期(最後一期)工程 Conversion of Aqua Privies into Flushing Toilets – Phase 7 (the Final Phase)

在策劃和建造上所遇到的困難(一)

Problems Encountered at Planning and Construction Stages (1)

- 地界太接近私人土地，在規劃及建造上受限制。

Site boundary too close to the adjacent private lot, thus posing limitations on planning and construction works

在策劃和建造上所遇到的困難(二)

Problems Encountered at Planning and Construction Stages (2)

- 位於偏遠地區，在運送物料及設備上需額外工期。
Located at remote areas, required extra time and resources to deliver the equipment and materials

在策劃和建造上所遇到的困難(三)

Problems Encountered at Planning and Construction Stages (3)

- 接近斜坡及樹木，令勘察及規劃時間增加。
Close to adjacent slope and trees, thus leading to extra investigation and planning time for the projects

改善重點(一)

Key Improvements (1)

- 美化外觀
Attractive appearance

改善前
Before Improvement

改善後
After Improvement

改善重點(二) Key Improvements (2)

- 寬濶空間符合現時標準
Spacious accommodation to meet current standard

改善前
Before Improvement

改善後
After Improvement

改善重點(三)

Key Improvements (3)

- 改善通風和照明(包括室內外照明)
Improved ventilation and lighting

改善前

Before Improvement

改善後

After Improvement

改善重點(四)

Key Improvements (4)

- 環保設備
Environmentally friendly features

感應式水龍頭
Sensor type tap

感應式燈光控制
Occupancy sensor
control for lighting

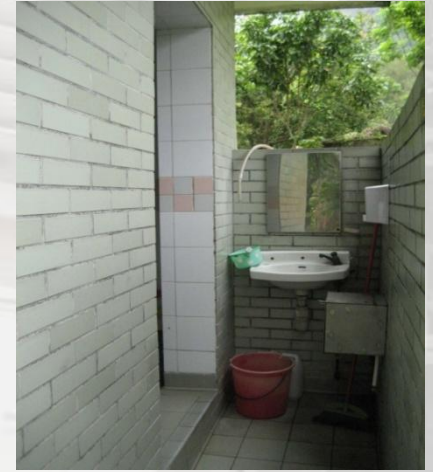

雙沖水量控制
Dual flush control

改善重點(五)

Key Improvements (5)

- 改善衛生環境設施(加設沖水及洗滌設備)
Better hygiene facilities
(with flushing system
and washing facilities)

改善前
Before Improvement

改善後
After Improvement

改善重點(六)

Key Improvements (6)

- 其他改善地方
Other improvements

呼救按鈕
Call button

乾手機
Hand dryer

為長者所設的扶手
Hand rail for aged

嬰兒換尿片枱
Baby changing counter

造價預算

Estimated Cost

- 工程費用估計約3.8億元
Total Cost : around \$380M
- 第一類及第三類廁所: 約一百萬元至二百多萬元
Type 1 and Type 3 Toilets: from \$1M to \$2M
- 第二類廁所: 約二百萬元至三百多萬元
Type 2 Toilets: from \$2M to \$3M
