Prepared by : Vogue Laundry Service Limited
Mr. David Saechiu – Director & General Manager

Re : Panel on Economic Development –
“Hong Kong International Airport Master Plan 2030”

Vogue Laundry is Hong Kong's biggest commercial laundry serving 18 airlines and 25 hotels providing employment to some 600 employees at our Tuen Mun plant.

We support building the third runway as this will bring additional airline services into Hong Kong and will simultaneously create more demands for hotel rooms as well as for other service industries which will eventually generate economic benefits to Hong Kong.

Vogue Laundry believes that these economic benefits will include generating employment for the laundry industry in which Vogue is a major employer and service provider. The additional jobs thus generated in the laundry industry will improve the employment opportunities for the unskilled as well as semi skilled workers.
