In answer to a question from a journalist, I have contradicted the Government's statement to the press that the points I proposed to put on record "did not deviate" from the accounts of the ILSP selection process already provided to the Legislative Council. In fact, my proposed corrections and clarifications raise serious public interest questions. If the Government were to allow greater transparency, the Panel and the community would be able to judge this for themselves.

As the Deputy Chairman of the Panel has indicated that he will raise this issue at tomorrow's meeting, I felt it necessary to draw this to members' attention.

I hope the Panel may be more successful than I have been in persuading the Government to permit greater transparency.
