Subject: Comments to Development Panel of LegCo re Peng Chau & reclamation

Dear Sirs,

I am a resident in Peng Chau (PC) living for over 40 years and would like to comment my opinion to the “Artificial Islands in Central Waters” (“AIs Option”).

PC is a very small island, and I love and live in PC because the island is **very peaceful, quiet and harmony**.

My grandparents and parents are living in PC since 1950, we are not only living in PC but also work in PC. It is a harmony society.

**I strongly object** the Hong Kong Government to develop PC, it is not only destroy the environment but also create many problems, such as pollution, social problem and economic impact. The local community must be change. The ecological and environmental will also damage too. I think its not only my own opinion, all of my friends living here have the same concern.

I concern about the conservation between the Government and really hope the Government will do more to protect the environment and listen our opinion seriously!

Submitted for consideration.

Best regards,

Amanda NG  
Resident in Peng Chau
