**Subject:** Artificial island objection

History: → This message has been forwarded.

---

This photograph is of a shoal of fish in the seas off Chi Ma Wan peninsula taken in March 2013.

Each fish is 8 to 10 feet long.

This area of sea will be totally destroyed as a suitable marine habitat if the artificial island is built between Peng Chau and Hei Ling Chau as part of the Enhanced Land Supply Strategy.

In addition to my original objection, I therefore further object to this proposal on marine conservation grounds.
