

HONG KONG MONETARY AUTHORITY

**Briefing to the Legislative Council
Panel on Financial Affairs**

4 February 2013

- 1. Financial and Economic Environment**
2. Banking Stability
3. Financial Infrastructure
4. Hong Kong as an International Financial Centre
5. Investment Performance of the Exchange Fund

ASSESSMENT OF EUROPE'S ECONOMY

- Market concerns for the collapse of the euro zone eased further:
 - Yields for government bonds in Spain, Italy and Greece dropped
 - European stock markets have rebounded since mid-November 2012
 - European Central Bank introduced measures to preserve the euro
- However, structural measures have to be introduced by European countries in regard to fiscal consolidation and labour market reforms, with a lengthy process expected to be involved
- Clouds of recession spreaded towards core countries; IMF estimates suggest a contraction of 0.4% in 2012 and 0.2% in 2013

3

ASSESSMENT OF THE US ECONOMY: SLOW PACE OF RECOVERY CONTINUED

- US recovery continued at a slow pace
(2012 Q4: -0.1%; full-year 2012: 2.2%)
- Market forecasts of growth in 2013: 2.0%;
Fed forecasts: 2.3% - 3.0%
- Signs of improvement in private sector:
 - Housing market continued to trend up from its trough
 - Car sales rose
 - Ratio of household debt to after-tax income dropped from its peak of 1.29 to the latest 1.08
 - Employment continued to grow as jobless rate fell

4

ASSESSMENT OF THE US ECONOMY: BUT PUBLIC SECTOR DELEVERAGING WILL BEGIN TO DRAG ON GROWTH

Deleveraging at household level has progressed substantially
while that at government just at its start

5

ASSESSMENT OF THE US ECONOMY: FISCAL POLICY RISKS

- Last-minute bipartisan agreement on a tax compromise deal has temporarily averted the fiscal cliff
- Deadlines for government spending cuts and raising debt ceiling delayed to end of February and mid-May respectively
- Deficit reduction, a daunting task itself, involves a dilemma to be resolved

6

ASSESSMENT OF THE US ECONOMY: MONETARY POLICY RISKS

- US Fed expanded quantitative easing with purchase of US\$85 billion in long-term Treasury bonds and mortgage-backed securities each month until substantial improvement in labour market
- Announced two thresholds for maintaining low interest rate policy: jobless rate to remain above 6.5%; projected inflation for one to two years ahead to stay below 2.5%
- Latest monetary policy involves some risks:
 - More intensive quantitative easing will further suppress historically low long-term interest rates and distort bond market operation
 - The use of economic thresholds increases the uncertainties over the timing for an exit from the easing policy

7

JAPAN'S MONETARY AND FISCAL POLICY RISKS

- Bank of Japan raised its inflation target from 1% to 2% and will implement an open-ended easing policy from 2014
- New Prime Minister Shinzo Abe announced to bolster his fiscal policies; Japanese cabinet approved a 20 trillion yen economic stimulus plan, which will substantially increase fiscal deficit and increase government debt burden
- Japanese yen fell by almost 16%, from below 80 yen against the dollar in mid-November 2012 to over 92 yen
- Japan's new policies have caused concern among other countries

8

ASSESSMENT OF MAINLAND CHINA'S ECONOMY

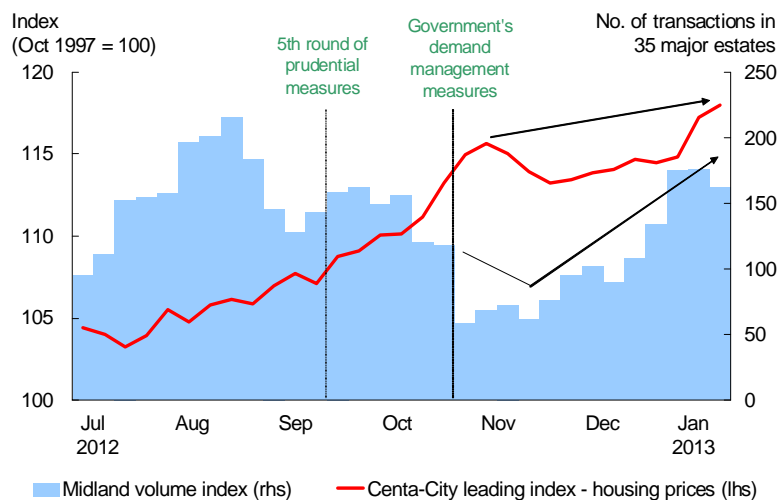

- Economic growth rebounded
 - 7.8% in 2012;
consensus forecast of 8.1% in 2013
- Inflationary pressure remained moderate
 - 2.6% in 2012;
consensus forecast of 3.2% in 2013
- Central Economic Work Conference: to continue pursuing an active fiscal policy and prudent monetary policy, with emphasis on quality of economic growth, and to ensure sustained and healthy development of the economy

9

ASSESSMENT OF RISK TO HONG KONG'S FINANCIAL STABILITY: PROPERTY MARKET

Residential property prices and transactions fell following relevant measures in October 2012, but have both trended up recently

10

ASSESSMENT OF RISK TO HONG KONG'S FINANCIAL STABILITY: PROPERTY MARKET

Household debt burden remained heavy

11

ASSESSMENT OF RISK TO HONG KONG'S FINANCIAL STABILITY: CAPITAL FLOWS

Aggregate Balance of banking sector has expanded by more than HK\$107 billion since 19 October 2012

12

ASSESSMENT OF RISK TO HONG KONG'S FINANCIAL STABILITY: BANK CREDIT GROWTH

Moderate bank credit growth in 2012

13

ASSESSMENT OF RISK TO HONG KONG'S FINANCIAL STABILITY: CONCLUSION

- Short-term sentiment in the financial markets improves but fiscal and economic imbalances in the US, Europe and Japan remain unresolved. Intensified quantitative easing will further distort the operation of interest rate markets and increase global capital flows. There are still material risks in global financial and macroeconomic environment
- Persistent capital flows into emerging economies with faster growth may bring inflationary and asset price pressures
- As property market developments have become disconnected from economic fundamentals and household incomes, overheating in the property market remains the biggest threat to our financial stability
- People should be cautious about a possible reversal of interest rate trends and manage their risks prudently. The HKMA will continue to monitor market developments closely and stand ready to introduce supervisory measures as appropriate to maintain financial stability

14

5. Investment Performance of the Exchange Fund

15

Basel III Implementation Progress

- Capital standards
 - Banking (Capital) Rules – further amendment/refinement
 - Revised guideline on Pillar 2 "Supervisory Review Process"
 - Consultation conducted on revised banking return
- Disclosure standards
 - Statutory consultation – Rules to be tabled before LegCo in April
- Liquidity standards
 - To proceed with policy consultation shortly (taking into account Basel revisions to the Liquidity Coverage Ratio)

16

CHIP-BASED ATM TECHNOLOGY TO BE ADOPTED BY BANKS IN HONG KONG

- The HKMA issued a circular on 1 June 2011 requesting banks to implement chip-based ATM technology. To be introduced in phases from 2013 to 2015, this measure aims to strengthen security controls for card users
- To allow customers to use ATM services in locations outside Hong Kong where chip-based technology is not yet available, the magnetic stripe will be retained on chip cards. Thus the industry will introduce the following measures to strengthen security for the use of chip-based ATM cards:
 - With effect from 1 March 2013, customers are required to activate an overseas ATM cash withdrawal capability via appropriate channels before such withdrawals can be made outside Hong Kong
 - Customers may also specify the expiry date for the overseas ATM cash withdrawal capability and set a lower limit for overseas ATM cash withdrawals

18

REFORMING OTC DERIVATIVES MARKET

G20 Commitments

- All standardised OTC derivative contracts should be traded on exchanges/electronic trading platforms and cleared through central counterparties
- OTC derivative contracts should be reported to trade repositories

Implementation

- **Regulation:**
 - Aim to introduce the Securities and Futures (Amendment) Bill into the Legislative Council in the first half of 2013 to implement the clearing and reporting requirements
- **Central Counterparty:**
 - HKEx is building a local central counterparty for OTC derivatives, which is expected to commence operation in Q2 2013
- **Trade Repository:**
 - The HKMA is building a trade repository (TR) under its Central Moneymarkets Unit. The matching and confirmation functions of the TR to support clearing at HKEx's central counterparty was launched in December 2012. The reporting function of the TR is targeted to be launched by mid-2013

19

RETAIL PAYMENT INITIATIVES

e-bill system

- The majority of retail banks offering internet banking services confirmed participation, including the three note-issuing banks
- major billers such as the Government, utilities companies and telecommunication companies indicated interest in the platform
- plan to launch the system in the second half of 2013

e-cheque

- completed industry consultation and aim to commence system development in the first quarter of 2013
- aim to deliver the service near the end 2014

Near Field Communication (NFC) mobile payment services

- consultancy study to be completed by the end of the first quarter of 2013
- continue to work with the industry to consider and implement the recommendations of the consultancy report

Legislative framework for stored value facilities and retail payment systems

- industry consultation commenced in the second half of December 2012
- commenced preparatory work for the drafting of the Bill

[#] The fixed rate of fee payment is 5.6% for 2012 and 6.0% for 2011

[^] Including dividends

26

INVESTMENT DIVERSIFICATION

- To enhance the return of the Exchange Fund in the medium and long term, the HKMA has, since 2008, been diversifying part of the Fund's investment into more asset classes, including emerging market bonds and equities, private equity, real estate, and Mainland renminbi bonds and equities
- These assets are housed under the Long-Term Growth Portfolio (LTGP). Positions at end-2012 and performance since inception are as follows:

As of end 2012

New Asset Classes	Market Value HK\$ billion	Annualised return since inception till end 2012
Emerging market bonds and equities	41.4	} 8%
RMB assets (including bonds and equities)	46.9	
Private equity	47.1	} 10% (IRR)
Real Estate	13.5	
Total	148.9	

Note: Outstanding investment commitments at the end of 2012 amounted to HK\$63.8 billion

27

REVIEW OF THE LTGP

- In 2012, the HKMA conducted a review of the overall strategy of investment diversification. Results support that investment diversification should further be pursued.
- In November 2012, the Financial Secretary, on the advice of the Exchange Fund Advisory Committee (EFAC), endorsed the following recommendations:
 - To maintain the investment cap on LTGP size at one-third of the accumulated surplus of the Exchange Fund
 - To transfer Emerging Market Bonds and Equities and Renminbi Assets into the Investment Portfolio of the Exchange Fund
 - Private Equity and Real Estate will remain in the LTGP

28
