

Panel on Information Technology and Broadcasting :

Thanks for DBC off the air by the Founding until justice broadcast and replay, even to seven channels, such as Chinese opera and music programs, a tenth of a selection of all to bring the people of Hong Kong is a very high quality of the digital broadcasting radio.

Never imagined such a chilling because one day when I try to open digital radio, cannot hear the slightest sound, even if even the rustle hear, think about the moment the development of Hong Kong to the sound of criticism cannot accommodate in fact, these have been in the DBC.

Due to a group of shareholders stopped to inject the capital and the business is winding up and even the Liaison Office to intervene, and said shareholders disputes, commercial disputes, the SAR government cannot intervene the internal disputes, so the SAR government not doing anything until disqualified the license.

Shameful, the so called conscience media workers, said he is impartial and even flaunt the banner, some return to the side, to become the mouthpiece of the SAR government and also because of conflict of interest, (preferably less only censor less the only ghosts) at less reason. Even reported are untrue, how about the media, even the most basic work done and how to rely evident media artificially our voice, to get justice , how can we not chilling?

Today, I want to made it clear that when the government issued a digital broadcasting license, this license does not belong to any one person, the assets belong to the people of Hong Kong , which was live who would like to have it or destroy it has been impossible to. And not any of the people of Hong Kong to apply for a license, the government would approved, the background of each shareholders, the government was perfectly clear and cannot be sloppy. They have a rigorous application procedures, I hope the Legislative members will understand that things have not commercial disputes anymore, but involved of freedom of expression, the people of Hong Kong is no longer have the airwaves and space, so that the public have a platform to sound.

Moreover, the Basic Law is to protect each and every one of us in Hong Kong people has the freedom of speech is inviolable. But DBC has been silencers.

One of the citizen of HK – Gilda Szeto
