Panel on Information Technology and Broadcasting

**Minutes of special meeting
held on Saturday, 3 May 2014, at 9:00 am
in Conference Room 1 of the Legislative Council Complex**

Members present : Hon WONG Yuk-man (Chairman)
Dr Hon Elizabeth QUAT, JP (Deputy Chairman)
Hon James TO Kun-sun
Hon Emily LAU Wai-hing, JP
Hon WONG Ting-kwong, SBS, JP
Hon Cyd HO Sau-lan
Hon Mrs Regina IP LAU Suk-yee, GBS, JP
Hon Paul TSE Wai-chun, JP
Hon LEUNG Kwok-hung
Hon Claudia MO
Hon NG Leung-sing, SBS, JP
Hon Steven HO Chun-yin
Hon YIU Si-wing
Hon MA Fung-kwok, SBS, JP
Hon Charles Peter MOK
Hon CHAN Chi-chuen
Hon Christopher CHEUNG Wah-fung, JP
Hon SIN Chung-kai, SBS, JP
Dr Hon CHIANG Lai-wan, JP
Ir Dr Hon LO Wai-kwok, BBS, MH, JP

Members absent : Hon Ronny TONG Ka-wah, SC
Hon Christopher CHUNG Shu-kun, BBS, MH, JP

Public officers attending : Agenda item I (Session One to Three)

Mr Gregory SO, GBS, JP
Secretary for Commerce and Economic Development

Miss Susie HO, JP
Permanent Secretary for Commerce and Economic Development (Communications and Technology)

Mr Joe WONG, JP
Deputy Secretary for Commerce and Economic Development (Communications and Technology)

Miss Janet WONG, JP
Commissioner for Innovation and Technology

Mr Johann WONG, JP
Deputy Commissioner for Innovation and Technology

Mr Daniel LAI, BBS, JP
Government Chief Information Officer

Mr Victor LAM, JP
Deputy Government Chief Information Officer (Consulting and Operations)

Attendance by invitation : Session One (9:00 am - 10:15 am)

Internet Professional Association

Dr Witman HUNG
President

Action

I. Proposal to establish the Innovation and Technology Bureau
[LC Paper No. CB(4)532/13-14(04)]

The Panel received views on the proposal to establish the Innovation and Technology Bureau ("ITB") from a total of 72 deputations/individuals. There was overwhelming support from all the deputations/individuals attending for the establishment of the ITB. A summary of views expressed by the 72 deputations/individuals attending and the submissions received is in **Appendix**.

Discussion

Proposed structure of the Innovation and Technology Bureau

2. Mr WONG Ting-kwong said that he was pleased to note that the majority of the deputations attending the meeting were in support of the proposal to establish the ITB. He asked the deputations about their views on the proposed structure of the ITB.

3. Mr Paul T C FUNG of the International Federation of Creativity and Technology (IFOCAT) said that the proposed structure of the new ITB should incorporate departments/authorities responsible for regulatory matters (e.g. the Communications Authority ("CA")) and developmental matters (e.g. Office of the Government Chief Information Officer ("OGCIO")) under the same umbrella to improve coordination and communication amongst the various departments.

4. Ir Dr LO Wai-kwok opined that apart from the Innovation and Technology Commission ("ITC") and OGCI, Create Hong Kong ("CreateHK") should also be transferred to the new ITB as creativity was an integral part of innovation and technology.

5. Secretary for Commerce and Economic Development ("SCED") advised that creativity and innovation and technology were both important in many business activities. For instance, creativity was crucial for sustaining the development of various industries, including the design industry which might not necessarily be related to technology. On the other hand, innovation and technology was also applied in many different areas, e.g. the financial industry. He said it would not be advisable to put every industry which involved an element of creativity or innovation and technology under the portfolio of the new ITB. Under the current proposal, the creative industries, telecommunications and broadcasting portfolios would remain under the Commerce and Economic Development Bureau. Such a design was in line with the objective of the Administration to allow the future ITB to focus on fostering the development of innovation and technology in Hong Kong.

6. In response to Mr Charles Peter MOK's enquiry about the exclusion of the communications portfolio in the proposed ITB, Mr Stephen HO of the Communications Association of Hong Kong said that the establishment of the proposed ITB was long overdue. The issue of whether the communications portfolio should be included should not pose a barrier to the establishment of the ITB, and might be brought up for review at a later stage after the establishment of the ITB.

7. Noting that according to the existing proposal, the broadcasting and communications portfolio, CreateHK and Intellectual Property Department ("IPD") were not included in the new ITB, Dr Elizabeth QUAT invited the deputations' view on the proposed structure. Mr SIN Chung-kai shared a similar view. He also expressed concern that the new ITB might not be able to take on an overall coordinator's role if it had a small scale.

8. Dr Witman HUNG of the Internet Professional Association said that as information technology was a fast-evolving industry, the ITB should be established as soon as possible and its structure should be further refined according to developmental needs. In general, he opined that government departments/authorities responsible for performing the role of a facilitator should be included whereas those responsible for regulation, such as the CA might be excluded.

9. Ms Claudia MO opined that as the policy areas to be covered under the proposed portfolio of Secretary for Innovation and Technology ("S for IT") had already been covered by SCED, the proposed ITB would create a cumbersome structure and pose obstacles to the coordination work in policy implementation. She also expressed concern that the purpose of the proposal to establish the ITB was to strengthen the Government's control of freedom of expression on the Internet.

Aspirations for the new Innovation and Technology Bureau

10. Ms Emily LAU enquired about the opportunities lost due to the disbandment of the former Information Technology and Broadcasting Bureau in 2002 and the replacement of the former Commerce, Industry and Technology Bureau by the Commerce and Economic Development Bureau ("CEDB") in the Government reorganization in 2007, and how Hong Kong could catch up with neighboring cities in the development of innovation and technology.

11. Mr Erwin HUANG of the Hong Kong Information Technology Federation said that due to the government reorganizations described by Ms LAU, Hong Kong had been deprived of a dedicated Government bureau to steer the development of innovation and technology. As a result, not much progress had been made at the policy level for the past decade in respect of the Electronic Transaction Ordinance (Cap. 553), the Cyberport project, the Science Park project and the Innovation and Technology Fund ("ITF"). Mr LI Tak-ho of Hong Kong Innovative Technology Preferred said the Government should take the lead in the adoption of research and development ("R&D") results of the private sector. Mr CHAN Wai-man of Hong Kong Young Industrialists Council said that the ITB should serve as a platform for the matching of overseas R&D institutions with the innovation and technology industry of Hong Kong.

12. Dr CHIANG Lai-wan opined that the new ITB should treasure the views of the industry and engage them in policy formulation. Sharing a similar view, Mr YIU Si-wing and Mr Paul TSE enquired about the aspiration of the deputations for the new ITB.

13. Mr Paul T C FUNG of INFOCAT said that the new ITB should be lead by a Policy Secretary and manned by personnel with extensive knowledge and background in information technology. Mr Edmon CHUNG of DotAsia Organisation said that apart from the development of innovation and technology, the new ITB should actively participate in global Internet policy and standards development, cyber security and privacy protection by engaging in global Internet governance discussions.

14. In response to Mr YIU Si-wing's enquiry whether priority would be given to candidates with extensive knowledge and experience in innovation and technology when selecting a candidate for the post of Secretary for Information and Technology, SCED advised that the Chief Executive would take into the views expressed by members and the deputations in this regard when selecting a suitable candidate for the post.

15. Mrs Regina IP said that the New People's Party had all along advocated the establishment of a dedicated Government bureau to steer the development of innovation and technology of Hong Kong. She asked the deputations to give views on the strengths of Hong Kong in the development of innovation and technology. Sharing a similar view, Ms Emily LAU asked the deputations how the Administration could help in this respect with the establishment of the ITB.

16. Mr Peter YAN of the Hong Kong Computer Society said that Hong Kong's telecommunications and data infrastructure was well developed and ranked the best among its regional neighbours. The new ITB should formulate policies to facilitate the further development of such aspects in which Hong Kong excelled.

17. Mr LAM Nam-sang of Right Station Ltd hoped that the Administration could set out the vision for the future development of innovation and technology of Hong Kong with the establishment of the ITB, and commit to implement policies to realize the vision.

Commercialization of research and development results

18. Ir Dr LO Wai-kiwok asked the deputations how the new ITB could help in the commercialization of R&D results. Mr CHAN Chi-chuen opined that the crux of the problem was the lack of a policy in this regard. The Administration should first review the policy on commercialization of R&D results before considering the establishment of the ITB. Sharing a similar view, Mr LEUNG Kwok-hung opined that the establishment of the ITB was not necessarily the way forward as the CEDB had been performing the role of a facilitator in the development of innovation and technology.

19. Mr K B CHAN of Surface Mount Technology (Holdings) Limited said that the new ITB should invite the active participation of the industry representatives in policy formulation. Without their input and investment, commercialization of R&D results would not be possible and the private sector's R&D investment would be wasted.

20. Mr WONG Ting-kwong enquired about the Administration's measures to enhance the commercialization of R&D results.

21. Commissioner for Innovation and Technology said that while Hong Kong needed to comply with the World Trade Organization Agreement on Government Procurement, the ITC had introduced the Public Sector Trial Scheme ("PSTS") under which funding support would be provided to eligible ITF projects for producing prototypes/samples, and conducting trials in the public sector (including government departments, public bodies and trade associations, etc.), so as to facilitate and promote the realization and commercialization of R&D outcomes.

Grooming of talents

22. Noting the importance of grooming talents in the development of innovation and technology, Ir Dr LO Wai-kwok asked representatives from the education sector about their views on the availability of talents in innovation and technology in Hong Kong.

23. Mr TSUI Chi-ying of the Hong Kong University of Science and Technology said that in fact, many students in Hong Kong were interested in innovation and technology. However, due to the lack of a policy to foster the development of innovation and technology in Hong Kong, many such students who were talented and interested in innovation and technology but were doubtful about the career prospect did not choose to pursue study in this field. With the establishment of the ITB, a clear message would be sent to such students that the Administration attached great importance to innovation and technology.

Motion moved by Mr Charles Peter MOK

24. Mr Charles Peter MOK proposed the following motion:

"鑒於業界及社會公眾的支持，本委員會促請政府盡快成立"創新及科技局"。"

(Translation)

"That, in view of the support of the industry and the public, this Panel urges the Government to expeditiously establish the Innovation and Technology Bureau."

25. The Chairman considered that the proposed motion was directly related to the agenda item under discussion. As no members disagreed to deal with the motion, the Chairman informed the meeting that the motion would be proceeded with. The Chairman put the motion to vote. The Chairman announced that 10 members voted for the motion, two members voted against the motion and two members abstained from voting. The Chairman declared that the motion was passed.

Motion moved by Dr Elizabeth QUAT

26. Dr Elizabeth QUAT proposed the following motion:

"鑒於創新科技能為社會帶來優質生活及發展優勢，為配合全球趨勢，本委員會促請政府盡快成立創新及科技局，提升香港競爭力，推動香港經濟持續增長。"

(Translation)

"That, in view of the quality life and development advantages that can be brought about by innovation and technology to the community and for the purpose of keeping abreast of global trends, this Panel urges the Government to expeditiously establish the Innovation and Technology Bureau in order to enhance the competitiveness and promote the sustainable economic growth of Hong Kong."

27. The Chairman considered that the proposed motion was directly related to the agenda item under discussion. As no members disagreed to deal with the motion, the Chairman informed the meeting that the motion would be proceeded with. The Chairman put the motion to vote. The Chairman announced that nine members voted for the motion, two members voted against the motion and two members abstained from voting. The Chairman declared that the motion was passed.

(Post-meeting note: The wordings of the motions raised by Mr Charles Peter MOK and Dr Elizabeth QUAT were circulated to members vide LC Paper No. CB(4)643/13-14 on 9 May 2014.)

II. Any other business

28. There being no other business, the meeting ended at 1:00 pm.
