At the meeting on 17 November 2011, the Administration briefed the Panel on the major findings of a survey conducted by the Census and Statistics Department ("C&SD") on employees engaged under employment contracts with short duration or working hours instead of a continuous contract ("SDWH employees"), as revealed in C&SD's Special Topics Report No. 55 released in July 2011. insurance ("ECI") system in Hong Kong. The Administration presented its research findings on the operation of the ECI schemes in some overseas countries and the views received from the insurance industry. As replacing a private market by a central ECI scheme would have significant impact on insurers, LAB agreed to test run a "residual scheme" proposed by the Hong Kong Federation of Insurers. The scheme sought to act as a market of last resort to assist employers who had difficulties finding ECI cover. At the meeting, the Panel urged the Administration that, while introducing the residual scheme, it should also consider pursuing a central ECI scheme in the long run.

At the meeting on 15 March 2007, the Panel was briefed on the structure and mode of operation of the Employees' Compensation Insurance Residual Scheme scheduled to be launched by the insurance industry on 1 May 2007. The Panel was advised that a mid-term review of the progress of the Scheme would be conducted one year after implementation and an overall review after operating the Scheme for two years.
