Subject: MTR

Dear LegCo,

The east rail train service was suspended again this morning from 7:45am, I am not talking the specific fault here but citizens are indeed affected and being late for work. Obviously, the present punishment mechanism is not enough to help the MTR maintenance. The signal problem is their business, for mass transportation service providers, the basic reliability and qualifications should be met. Please review the current regulations against the faults of MTR.

Best regards,  
Jason
