

**LC Paper No. CB(2)466/14-15(01)**

**Panel on Health Services;**

**Subcommittee on Issues Relating to the Development of Chinese Medicine**

**8 December 2014**

Dear Sir/Madam,

**Comments on GMP**

First of all, thank you for seeking advises from us on the issues of GMP.

In this regard, we suggest that the introduction of GMP on Chinese Medicine should be based on “Two-legs” direction. “Two-legs” means development with two aspects so that the whole plan could be accomplished effectively through synergy effects.

First, it is to allow capable and qualified factories to develop GMP.

Second, it is to keep small-medium sized enterprises to develop based on the principles of market economy according to the practical situation in Hong Kong.

Lastly, we do hope that the HKSAR government could endeavor to support the development of Chinese Medicine like the way it does to the modern medicine in order to make GMP development successfully. Regulations should always come with responsibility. They are indispensable in achieving successful accomplishment of GMP.

Best regards,

HOU PING

Director of Hong Kong Sun Chung Medical Centre University
