

Bills Committee on the Medical Registration (Amendment) Bill 2016

Government's response to the follow-up actions arising from the discussion at the meeting on 3 May 2016

Election arrangement for the three persons representing patients' interests at the Medical Council of Hong Kong

This note provides the Government's response to the follow-up action concerning the election arrangement for the three persons representing patients' interests to be appointed to the Medical Council of Hong Kong ("MCHK") as lay Council members.

2. As stated in our previous submission (LC Paper No. CB(2)1349/15-16(02)), to the best of our knowledge, there are more than 200 bodies which are established as patient groups or patient support groups. These bodies are of different scale (with membership ranges from 40 000 to less than 100) and different structure (some are societies established under the Societies Ordinance (Cap 151); some are companies incorporated under the Companies Ordinance (Cap 32); and some are neither societies nor companies but are organised on their own without formal registration under the above-mentioned two Ordinances to carry out activities to promote and / or present patients' interests).

3. The Government has consulted major patient-related groups (including Hong Kong Alliance of Patients' Organizations Limited¹, Hong Kong Society for Rehabilitation, Society for Community Organization - Hong Kong Patients' Rights Association, Rehabilitation Alliance Hong Kong, Alliance for Renal Patients Mutual Help Association, The Brightening Association (HK) Ltd, Christian Oi Hip Fellowship Ltd, Hong Kong Stoma Association, Hong Kong Adult Blood Cancer Group Limited, Care For Your Heart - Cardiac Patients Mutual Support Association, Hongkong Ankylosing Spondylitis Association, and Hong Kong Patients' Voices) on the detailed arrangement for nominating representatives to sit on MCHK. These organisations cover over 50 000 patient / patients' relatives members.

4. The unanimous view of all patient-related groups we have met over the past months is that the legislation should not aim to formulate a

¹ Hong Kong Alliance of Patients' Organizations Limited is the largest patient group which consists of over 40 organisation members with about 40 000 members. The membership of other patient groups ranges from 5 000 to less than 100.

precise definition of patient groups or patient support groups. They considered it more desirable and practical for the legislation to allow sufficient flexibility to include as many relevant patient-related groups as possible. They suggest that the more detailed and concrete consideration as to what constitute patient or patient-related groups should not be prescribed in law, and should instead be spelt out in the Government's papers and the speech of the Secretary for Food and Health during the resumption of Second Reading Debate of the Medical Registration (Amendment) Bill 2016. The advantage of such approach is that this would be a more objective way to set out the criteria in greater details upon which an organisation will be classified as patient or patient-related groups, thus limiting the room for discretion by the Government but at the same time reserves sufficient latitude for flexibility and adaptability to cater for changing circumstances in the future and experience gained from the first election held among patient and patient-related groups. They also propose that the legislation should not specify the detailed election arrangement so that the patient-related groups could work out the best arrangement among themselves.

Proposed arrangement

5. Based on the outcome and the views made clear to us by the patient and patient-related groups, we propose that the Secretary for Food and Health should consider the following factors in recognising organisations which are eligible for electing persons representing patients' interests. Each eligible organisation will be entitled to three votes for electing three representatives in accordance with the guidelines agreed among the patient-related groups, for appointment to MCHK. The Government undertakes to work with the patient-related groups to come up with an election arrangement agreed among themselves.

Factors to be considered for recognising the relevant organisations

6. Taking into account patient-related groups' views that the Government should include as many relevant patient-related groups as possible and the fact that it is difficult to formulate a precise definition of patient groups or patient support groups, the Secretary for Food and Health will take into account including but not limited to the following factors to recognise organisations which are eligible for electing persons representing patients' interests.

(a) The organisation should be a registered society or company

7. The organisation should be (i) a society established under the Societies Ordinance (Cap. 151) or (ii) a company incorporated under the Companies Ordinance (Cap. 32).

(b) The organisation should be recognised by credible patient-related platforms

8. The organisation should be recognised by credible patient-related platforms including but not limited to the Hospital Authority (HA)², Community Rehabilitation Network (CRN)³ and Social Welfare Department's "Financial Support Scheme for Self-help Organisations of Persons with Disabilities / Chronic Illnesses"⁴. The lists of organisations / bodies⁵ maintained by the above three platforms are at **Annexes A to C**.

(c) The organisation should represent patients' interests

9. The mission of the organisation should be promoting and / or representing patients' interests. The organisation shall show the instrument or rules governing its mission and activities e.g. the Memorandum and Articles of Association in the case of a corporation or the Constitution in the case of a society.

(d) The organisation should have an active operation

10. The organisation should be in operation for a specified period, say one year, and have been carrying out activities to promote and / or represent patients' interests and / or to advocate relevant policy proposals.

² HA has been engaging over 200 patient-related groups on service developments and patient support services.

³ CRN is a community-based rehabilitation service under the Hong Kong Society for Rehabilitation to assist persons with visceral disability or chronic illness and their families. CRN has engaged over 160 self-help organisations.

⁴ Since 2001, the Social Welfare Department has been providing financial support to self-help organisations of persons with disabilities / chronic illness aiming at promoting the spirit of self-help and mutual help among persons with disabilities and their families. There are 78 self-help organisations receiving funding support under the "Financial Support Scheme for Self-help Organisations of Persons with Disabilities / Chronic Illnesses" for 2014-2016.

⁵ A patient-related group may appear on the lists maintained by different platforms. However, every eligible organisation will be entitled to three votes only.

11. If there is any organisation considered itself a qualified patient-related group but fails to meet the four requirements as listed in paragraphs 7- 10 above, the Secretary for Food and Health may consider the case on an individual merit basis.

12. The term of office for the three lay Council members concerned is three years. The Government will update the list of recognised organisations at least six months before the election to be held.
