Ms Connie SZETO
Subcommittee on Census and Statistics (2016 Population Census) Order
Legislative Council Complex
1 Legislative Council Road
Central
Hong Kong

Dear Ms SZETO,

**Subcommittee on
Census and Statistics (2016 Population Census) Order
Follow-up to meeting on 9 November 2015**

Thank you for your email dated 10 November 2015 on the subject. Information requested by Members of the Subcommittee at the meeting on 9 November 2015 is provided as follows.

Statistical information on sexual minorities

The Census and Statistics Department (C&SD) has studied the practice of population censuses in selected economies with similar culture as Hong Kong including Mainland China, Japan, Korea and Singapore, and those with relatively close socio-economic ties with Hong Kong including Australia, Canada, United Kingdom and United States. In the population censuses in all these economies, there was no question about sexual orientation, nor a third option regarding sex. As regards same-sex marriage or partnership, related answer options for questions on marital status and/or relationship to household head were available in the censuses of Canada and United Kingdom (see [Appendix 1](#)) where there are legal registrations for same-sex marriages or partnership. However, there were no such options in the censuses of Asian economies including Mainland China, Japan, Korea and Singapore.

Data to be collected and questions to be asked in the 16BC

For the data topic of “marital status”, respondents are required to report their status as regarded by themselves among the answer options “never married”, “now married”, “widowed”, “divorced” and “separated”. Respondents are not required to produce any legal documents for verification of their answers. C&SD considers that the currently available answer options are adequate. Our assessment is that even if a separate answer option for “same-sex partnership” or “same-sex co-habitation” is provided and respondents have registered same sex marriages or partnerships outside Hong Kong, a considerable number of them would be unwilling to disclose such status in the presence of other members of their households during the survey enumeration, particularly for those who have not made known their registrations to families and friends in Hong Kong. Thus, the number of persons who are in same-sex partnership or same-sex cohabitation will very likely be grossly under-estimated and the margin of error is unknown. To ensure accuracy and reliability of statistics collected under the 2016 Population By-census (“16BC”), C&SD does not find it feasible to provide a further classification on “same-sex partnership” or “same-sex co-habitation” under the data topic of “marital status” in 16BC especially when respondents are legally obliged to provide response to the best of his knowledge and belief, in the census.

Based on the results of the 2011 Population Census, there were 7 395 domestic households comprising members of the same sex who were unrelated to the household head. Further analysis on these household members by sex, household size and age group is given in Appendix 2.

A specimen of the draft 16BC questionnaire is enclosed in Appendix 3. You may wish to note that extensive consultation on the data topics, classification and questioning approach for the 16BC had been conducted, including the Legislative Council, District Councils, academics and Government Bureaux and Departments since mid-2013. In particular, all Legislative Council Members had been invited to participate in the meeting of Panel on Financial Affairs on 2 December 2013 during which the plan on 16BC and the data topics were discussed.

Respondents’ legal liability and data security

Information regarding respondents’ legal liability in responding to the 16BC is enclosed in Appendix 4. Information

— regarding data security for the 16BC is enclosed in Appendix 5.

Statistical reports published by C&SD

Findings on persons with disabilities and chronic diseases based on a survey conducted throughout the whole year of 2013 are available in the publication "Social data Collected via the General Household Survey: Special Topics Report - Report No. 62". The report is available at C&SD website (<http://www.censtatd.gov.hk/hkstat/sub/sp380.jsp?productCode=C0000055>).

As regards new arrivals, a thematic report of the 2011 Population Census regarding "Persons from the Mainland having resided in Hong Kong for less than 7 Years" is relevant. The report is available at C&SD website (<http://www.census2011.gov.hk/pdf/PMR.pdf>).

The "Thematic Household Survey Report No. 56" contains, inter alia, findings of a survey related to women employment conducted during September to December 2013. Regarding statistics on female home-makers who would very unlikely / definitely not take up a job by reason, please refer to Chapter 8 of the report. Table 8.5 therein is relevant. The report is available at C&SD website (<http://www.statistics.gov.hk/pub/B11302562015XXXXB0100.pdf>).

— More breakdowns by type of family members whom the female home-makers needed to take care of are provided in Appendix 6.

Enquiries

Should you have further questions, please contact the undersigned.

Yours sincerely,

¹ A domestic household consists of a group of persons who live together and make common provision for essentials for living.

² Household head is defined as a person acknowledged as such by other members of the household to be responsible for making major decisions affecting the household. Household members who are unrelated to household head are classified as “Others / unrelated persons” in the relationship to the household head.

**Information regarding respondents' legal liability
in the 2016 Population By-census**

The 2016 Population By-census (16BC) is a mandatory survey conducted under the Census and Statistics Ordinance (Cap. 316). Under this Ordinance, specified persons are legally obliged to provide the information required by the 16BC to the best of his knowledge and belief.

2. Under Section 14 of Cap. 316, every person, whether or not he is a specified person, in possession of the required information shall, to the best of his knowledge and belief, answer any question put to him by a census officer which is necessary for the completion of the survey. Any person who fails to do so commits an offence and is liable to a fine of \$2,000¹.

3. Under Section 16 of Cap. 316, any person who provides any particulars which he knows to be false or he does not believe to be true commits an offence and is liable to a fine of \$5,000² and 6-month imprisonment.

¹ The fine specified in section 23(1) of the Census and Statistics Ordinance for any person who commits an offence under section 13, 14, 15 and 19(a) is classified as a fine at level 1 in accordance with section 113C of the Criminal Procedure Ordinance (Chapter 221) and subject to a fine of \$2,000.

² The fine specified in section 23(2) of the Census and Statistics Ordinance is classified as a fine at level 2 and the fine is \$5,000 in accordance with section 113C of the Criminal Procedure Ordinance.

**Information regarding data security
for the 2016 Population By-census (16BC)**

Background

Around one-tenth of all quarters in Hong Kong will be randomly selected for the 2016 Population By-census (16BC).

2. Starting from 30 June 2016, households in the sampled quarters can use the online e-questionnaire (e-Q) System to fill in the 16BC questionnaire. During 16 July to 2 August 2016, enumerators will visit households that have not yet completed their e-Q. The enumerators will use mobile tablets to conduct computer-aided interviews with the households. Questionnaires completed using the tablets will be sent to the central computer system of the Census and Statistics Department (C&SD) through mobile network.

3. The data protection arrangements at various data collection and processing stages are highlighted in the ensuing paragraphs.

E-Q System

4. The e-Q system is an online browser-based application system. All data transmitted over the Internet between the central application system and the client browser will be protected by HTTP Secure encryption.

5. The central application system will be hosted inside government-approved data centres. It will be installed with firewalls, intrusion protection system and antivirus software to guard against malicious attacks.

Account Activation Process

6. Sampled households will receive a notification letter through ordinary mail. The letter will contain a household reference number and the corresponding e-Q account activation key.

7. Sampled households can access the e-Q system to activate their e-Q account, set up a login name and a login password. The households will also need to provide a phone number with SMS function or an email address for recovery of login password when needed (see “Recovery of Login Password”). After the e-Q account has been activated, the

activation key will be invalidated.

Filling in e-Q

8. After the account is activated, households can continue to fill in their questionnaires immediately, or they can login later to do so. In the process of completing the e-Q, the households can logout from the system anytime and the system will store the answered data. They can login the system later to modify the previous answers and continue with the remaining questions.

9. To facilitate completion of the e-Q, a procedural guide on using the e-Q system will be mailed to the sampled households along with the notification letter. An online video demonstrating the necessary steps will also be available in the e-Q system. As for system design, the e-Q system interfaces will be incorporated with automatic question skipping logics to guide the households to answer only questions relevant to their specific situations. The system will also validate the answers and alert the households of any potential input errors. In case of questions, the households can call the By-census Service Centre for enquiry.

10. After the questionnaire is completed, the system will list out all questions and answers for review by the household. Changes can be made if necessary. Afterwards, the household can submit the questionnaire through the e-Q system. Upon successful submission, the e-Q account will be frozen to protect the data of the household.

Recovery of Login Password

11. An e-Q account will be locked after 5 login failures. Households can recover their lost password online if they have provided a phone number with SMS function during the account activation process.

12. Upon receiving a password recovery request, the e-Q system will send a one-time passcode to the registered phone number. The household needs to enter this one-time passcode to the system, and then answer a preset security question defined earlier in the account activation process. After passing these two checks, the household will be able to reset a new login password online.

13. If the household fails to pass the password recovery step for 5 times, the online recovery function will be stopped. The household will need to visit C&SD in person to re-access the account.

14. If the household has only provided an email address during the account activation process, he/she will not be able to retrieve the lost password online. The household can only request to receive through email the text reminder preset by the household during the account activation process.

Mobile Questionnaire Application (m-Q App)

15. All enumerators have to login the central system each day using the m-Q App in their tablets. Relevant survey data, including any partially completed questionnaire data entered into the system earlier, will then be downloaded to the tablets of the responsible enumerators. The transmission of data will be protected by HTTP Secure encryption.

16. The survey data will be encrypted for storage in the tablets. Full Disk Encryption technology of Android system will be adopted, using a user-supplied password to generate the relevant encryption key.

17. After a questionnaire is completed, the system will automatically upload the data to the central system when wireless connection is available, and the data will be removed from the tablets after completion of this process.

18. At the end of each day when an enumerator logout the system, the system will upload all transient data remaining in the tablet, and then remove the data from the tablet.

19. All tablets will be remotely managed through a mobile device management system. No data can be copied out of the tablets through unauthorised means, and unauthorised apps cannot be installed in the tablets. The system also debars enumerators from altering the security settings like password policy.

20. All data in the tablets are protected by encryption. In case of loss of a tablet, the data therein can be remotely wiped out once the tablet is connected to wireless network. Since the data are only accessible through the m-Q App, and invoking the m-Q App will require logging into the central system through wireless connection, this ensures that the data will be wiped out through remote control in the process.

IT Security Requirements and Independent Security Risk Assessment and Audit

21. The computer systems for 16BC, including the e-Q system and the m-Q App, will fully meet the government information technology security requirements specified by the Office of the Government Chief Information Officer. The systems will also be subject to security risk assessment and audit conducted by an independent security auditor.

Destruction of Questionnaire Data

22. All electronic data collected through e-Q and m-Q systems will be deleted from central storage by 29 June 2017, i.e. within one year after data collection. Data in the mobile tablets will also be entirely erased by secure deletion software in compliance with the government IT security requirements.

23. The raw data supporting statistical analysis will be codified and all identifiers such as name, address, telephone number, email address, through which an individual can be distinguished, will be removed.

Notes : [#] Multiple answers were allowed.

Figures in brackets represent the percentages in respect of persons who cited "taking care of family members" as reason for not taking up a job.

Owing to rounding, there may be a slight discrepancy between the sum of individual items and the total as shown in the table. It should also be noted that actual figures without rounding are used in compiling the percentage shares in the table.
