Proposal Development Strategy for Lantau

Dear sirs / madams

For the future development of Lantau, it seems to be involved reclamation and moving government facilities to cavern. I have the following comments:-

- 1) As the construction cost is rapidly increase in the recent years, for cost control, the reclamation is better to be done in one go.
- 2) For environmental friendly & cost reduction, it is better to carry out the cavern excavation and reclamation at the same time so that the excavated materials could be used in the nearby reclamation.
