Subject: Proposed Development Strategy for Lantau
(See attached file: Reply Slip.pdf)

Dear Sir / Madam,

I refer to the special meeting on 16 April 2016 in respect of "Proposed Development Strategy for Lantau" and please find attached my reply slip and my below written submission in respect of the development for your record:-

I support the development for Lantau. I would like to suggest charging stations for electric cars to be set up / provided in various development sites of Lantau. The use of electric car is becoming more and more common nowadays and it is no doubt that it is more environmental friendly than cars that use diesel / gasoline as fuel. Lantau is going to become a major transportation hub of HKSAR in the nearest future. Providing charging facilities in Lantau can encourage more people to drive electric cars to / in Lantau and at the same time protect the environment of Lantau in particular the air quality there.

Thank you for your attention and consideration.

Regards,
WONG Tsang Hung
