Dear Mr. TSE,

Submission for Special meeting on 16 April 2016 to receive public views on “Proposed development strategy for Lantau”

The Construction Industry Council (CIC) would like to express its support to the development strategy for Lantau proposed by the Lantau Development Advisory Committee (LanDAC). The proposal to develop Lantau into a smart and low-carbon community aligns with the CIC's vision to build a better Hong Kong.

Together with the planned expansion of the HK International Airport into a three-runway system by the Airport Authority of Hong Kong, Lantau will become a thriving hub offering the citizens of Hong Kong, as well as the construction industry, much welcomed employment and business opportunities. Whilst the proposal called for extensive infrastructure and building development, it would also dedicate resources to heritage and nature conservation. On this note, we would urge the LanDAC and the Development Bureau to come up with a well-balanced and carefully planned development strategy so that the required works would be rolled out in a sustainable manner.

Yours sincerely,

Christopher TO
Executive Director
