Subject: Views on TSA

To: Clerk to Panel on Education,

I am an Engineer with 2 children who are 7 and 5 years old respectively. I have concern on the TSA System which is affecting all of the primary students in HKSAR. I understand that there is already independent exam report submit to the HKSAR Education Bureau from each of the primary 5 and primary 6 students from independent primary school. It means the HKSAR Education Bureau already has the educational data and the TSA System is just an extra data system which can be removed.

Moreover, there are banding for primary school and you can use the data of the submitted primary 5 and primary 6 students and use a curving system so that you can adjust the banding of each of the primary school. In this way, there will be no extra exams and home works so that children can study in normal, more time to join different kinds of extra curricular activities in the afternoon.

I believe you or your friends, cousins may also suffering from the TSA System and I don't need to explain too much on this issue.

In conclusion, keep on using the primary 5 and primary 6 exams result submission is more than enough to learn about the educational level in HKSAR and give banding for the primary schools.

Thanks you very much for your time and concern.

Anthony Tsang
