Dear members of Legco,

I am writing this message to support the ban of Ivory in Hong Kong, the elephant is a species that many people would not like to be extinct poaching is firstly illegal as well as extremely immoral so I and many others would deeply appreciate the ban on ivory trading become a much more prioritized issue to banish.

Members of teams that are trying to eradicate illegal ivory poachers are being killed just to protect a beautiful species there have been at least 500 rangers killed in 5 years. If you could please acknowledge my complaint and possibly enforce the ban.
