**Motion on
“Updating the Hong Kong Planning Standards and Guidelines and
increasing community facilities to enhance living environment”
to be moved by Hon CHAN Han-pan
at the Council meeting of 7 December 2016**

Wording of the Motion

That, in recent years, the Government has made it a prime task to increase the supply of public and private housing, but while substantially increasing public and private housing, the Administration has not correspondingly increased community facilities, especially parking spaces, public markets as well as cultural and leisure facilities, thus failing to enhance the living environment; in this connection, this Council urges the Administration to update the Hong Kong Planning Standards and Guidelines and relevant town planning guidelines, set up a dedicated fund for enhancement of community facilities and optimize the use of idle spaces or land lots, so as to expeditiously construct community facilities such as parking spaces, public markets, cultural and leisure facilities, etc. in various districts, thereby responding to the public aspiration for enhanced living environment in communities; the Administration should also earmark financial and administrative resources and draw up a specific timetable for the expeditious implementation of the construction of various facilities concerned.
