LC Paper No. CB(4)243/16-17(06)

Ref.: CB4/PS/1/16

Panel on Transport

Subcommittee on Matters Relating to Railways Meeting on 9 December 2016

Updated background brief on the construction of the Shatin to Central Link

Purpose

This paper provides updated background information on the construction of the Shatin to Central Link ("SCL"). It also summarizes the major views and concerns expressed by members of the Subcommittee on Matters Relating to Railways ("the Subcommittee") during previous discussions on this subject.

Background

- 2. SCL, with a total length of 17 kilometres, consists of two sections
 - (a) Tai Wai to Hung Hom Section:

This is the extension of Ma On Shan Line from Tai Wai via Southeast Kowloon to Hung Hom where it will join the West Rail Line; and

- (b) Hung Hom to Admiralty Section:
 - This is an extension of the existing East Rail Line from Hung Hom across the Victoria Harbour to Wan Chai North and Admiralty.
- 3. SCL will have ten stations. Apart from bringing improvements to the existing Tai Wai Station, SCL project will involve construction of new stations or extension of existing stations at Hin Keng, Diamond Hill, Kai Tak, To Kwa Wan, Ma Tau Wai, Ho Man Tin, Hung Hom, the Hong Kong

Convention and Exhibition Centre, and Admiralty. It is a territory-wide strategic railway project (alignment layout in **Appendix I**). Admiralty Station and Ho Man Tin Station will become integrated stations providing interchange service to passengers of SCL and the South Island Line (East) ("SIL(E)"), as well as passengers of SCL and Kwun Tong Line Extension ("KTE") respectively.

- 4. The approved project estimate for the entire SCL project is \$79,800 million¹ (in money-of-the-day prices) and the project is funded by the Administration under the concession approach². On 18 February 2011, the Finance Committee ("FC") approved the funding applications for 63TR³ and 64TR⁴ with a total of about \$7,700 million (in money-of-the-day prices). The estimated cost of 63TR was \$6,254.9 million (in money-of-the-day prices) and that of 64TR was \$1,448.2 million (in money-of-the-day prices), and their breakdowns are in **Appendices II** and **III** respectively.
- 5. The Administration and MTRCL entered into an agreement for entrusting to the latter the **advance works** of SCL at the expanded Admiralty Station and Ho Man Tin Station while implementing SIL(E) and KTE respectively. The **advance works** commenced in May 2011.
- 6. Subsequently, on 11 May 2012, FC approved the funding applications for "61TR Shatin to Central Link construction of railway works remaining works" and "62TR Shatin to Central

According to LC Paper No. CB(4)1317/15-16(03), the approved project estimate for the entire SCL project comprises (i) protection works ("58TR — Shatin to Central Link — construction of railway works — protection works" and "59TR — Shatin to Central Link — construction of railway works — protection works in Wan Chai Development Phase II") of about \$700 million (in money-of-the-day prices); (ii) advance works (63TR and 64TR) of about \$7,700 million (in money-of-the-day prices); and (iii) main works (61TR and 62TR) of about \$71,400 million (in money-of-the-day prices).

Under the concession approach, the Administration is responsible for the construction costs of SCL whilst the MTR Corporation Limited ("MTRCL") is entrusted with the planning and design of the project.

The scope of the works under "63TR — Shatin to Central Link — construction of railway works — advance works" comprises (a) expansion of Admiralty Station to accommodate SCL railway facilities including overrun tunnels of approximately 200 metres long and ventilation facilities for the station; and (b) construction of the portion of Ho Man Tin Station for SCL.

The scope of the works under "64TR — Shatin to Central Link — construction of non-railway works — advance works" comprises (a) reprovisioning of the International Mail Centre at Hung Hom; and (b) reprovisioning works at the Harcourt Garden and the Hong Kong Park, for the construction of SCL.

Link — construction of non-railway works — remaining works" with a total of about \$71,400 million (in money-of-the-day prices). Thereafter, the Administration and MTRCL entered into an agreement for entrusting construction, testing and commissioning of SCL to the latter. MTRCL has been entrusted to provide management and monitoring service to SCL project. The main works commenced in July 2012. According to the agreement for the main works of SCL, the original target commissioning date for the Tai Wai to Hung Hom Section was set to be December 2018 and that for the Hung Hom to Admiralty Section to be December 2020.

Delay of the Shatin to Central Link project

- 7. According to the information provided by the Administration in September 2016⁶, it was estimated that the Tai Wai to Hung Hom Section of SCL would have a delay of about 11 months arising from the archaeological discoveries and conservation works at To Kwa Wan Station. The Highways Department ("HyD") would coordinate and oversee the construction of SCL so that MTRCL could try to recover some of the delay to the Tai Wai to Hung Hom Section, with a view to commissioning the Tai Wai to Hung Hom Section in 2019 as far as possible.
- 8. As regards the Hung Hom to Admiralty Section, the commissioning date will be deferred to 2021 to allow flexibility for the topside development of the convention centre at Exhibition Station⁷, and to cater for the reclamation works under Wan Chai Development Phase II ("WDII") as well as the construction of Central-Wan Chai Bypass tunnel thereof. Regarding the large metal object found on the seabed within the reclamation area under WDII, the Civil Engineering and Development Department ("CEDD") removed it from the reclamation site in June 2015. The reclamation works at the location concerned were completed and associated works are underway. Originally, the reclaimed land would be handed over to the contractor of SCL at the end of December 2016. As the discovery of the metal object had affected the progress of reclamation works there, CEDD indicated that the handover date of part of the works area would still be deferred by seven months. HyD and MTRCL will

⁶ LC Paper No. CB(4)1317/15-16(03)

MTRCL advised that to allow flexibility for the construction of convention facilities above Exhibition Station, a certain part of the enabling works for the topside development would be incorporated into the underground structure of Exhibition Station. Based on the currently available information on the geological condition, it is initially estimated that this would result in a delay of at least five months to the construction of Exhibition Station and an increase in construction cost.

⁵ LC Paper No. FCR(2012-13)20

continue to liaise with CEDD on the handover arrangement of works areas.

- 9. According to the progress report updated up to 30 June 2016 by MTRCL⁸, taking into account the continuing difficulties and challenges faced by SCL, MTRCL considers that it is likely that the cost estimate for SCL will need to be revised upwards significantly to include the additional \$4,100 million that was previously reported as a result of the archaeological finds in the To Kwa Wan area, the late handover of construction site at Exhibition Station, the previously unbudgeted foundation works for topside development at Exhibition Station and other factors such as the lower availability of labour in Hong Kong's construction sector. MTRCL has thus advised the Administration that it will therefore conduct a detailed review of the project cost estimate for the project as a whole. complexity of the project works, the continuing uncertainties associated with some of the issues highlighted in paragraphs 7 and 8 and the fact that the Hung Hom to Admiralty Section is currently only 35% complete, the detailed review will only be completed in the second half of 2017 after which MTRCL will formally report the findings to the Administration. For details of the progress of construction at the various stations and tunnels, railway works, fitting out and modification works, please refer to Annex 2 to LC Paper No. CB(4)1317/15-16(03).
- 10. According to the information provided by the Administration in September 2016⁹, MTRCL is conducting a cost review of the entire SCL in phases, including the additional construction costs for the advance works of SCL at Admiralty Station and Ho Man Tin Station.

Major concerns expressed by the Subcommittee members

Delay of the Shatin to Central Link project

11. Members expressed grave concern about the delay of the Tai Wai to Hung Hom Section and the Hung Hom to Admiralty Section of SCL project. In particular, archaeological discoveries and works at To Kwa Wan Station and manpower shortage problem had caused further delay to the construction of SCL. The Administration advised that due to archaeological discoveries at To Kwa Wan Station, MTRCL estimated that the expected completion date of the Tai Wai to Hung Hom Section would need to be deferred from 2018 to 2019. Given the late handover of sites due to the need to cater for the reclamation works under WDII as well as the

⁸ Annex 2 to LC Paper No. CB(4)1317/15-16(03)

⁹ LC Paper No. CB(4)1317/15-16(03)

tunnel works of Central-Wan Chai Bypass, the commissioning of the Hung Hom to Admiralty Section would be deferred from 2020 to 2021. At the Subcommittee meeting on 14 December 2015, MTRCL informed members that less than 25% of awarded major civil contracts under SCL project did not catch up with the progress as originally planned, and no critical contracts that would affect the overall progress of the project were among these contracts.

12. In reply to members' enquiry on the monitoring role of the Administration over MTRCL's management of SCL project and the provision of contingency over unexpected project delay, the Administration advised that it had monitored the progress of SCL by various means, such as through regular meetings with MTRCL and monthly reports submitted by MTRCL. HyD also employed an external consultant to assist in the monitoring and verification work.

Cost overrun

- 13. Members have all along expressed concern about the increase in cost arising from the complicated ground conditions, archaeological discoveries and related works. Some members opined that the Administration should be responsible for the additional cost arising from archaeological works as heritage conservation should be borne by the community as a whole. However, cost arising from delays caused by MTRCL's project mismanagement should be borne by MTRCL.
- 14. The Administration advised that the additional cost in respect of archaeological works at To Kwa Wan Station would be at least \$4,100 million. MTRCL responded that there were often unforeseeable situations in construction works. It would try to implement recovery measures to catch up with the progress arising from such delay.
- 15. At the Subcommittee meeting on 27 June 2016, some members expressed their disappointment that MTRCL could not provide a realistic cost review of the main works of SCL by the second quarter of 2016 and the Administration had so far no idea about the scale of the total additional construction costs. The Administration advised that as for the main works of SCL, MTRCL had advised that it could only conduct a more realistic cost review in the second half of 2017 in order to come up with a better estimate of the construction cost. The Administration would seek additional funding from the Legislative Council in due course.

Archaeological features discovered at To Kwa Wan Station and metal object on the Wan Chai seabed

16. Members enquired about the conservation plans for the monuments and antiques unearthed from SCL construction sites, and the large metal object discovered on the seabed within the reclamation area under WDII. They opined that the conservation proposals should facilitate preservation of archaeological features for future display, such as setting up a museum to display monuments and antiques unearthed in the course of construction of SCL. They also proposed that the public and relevant organizations should be involved in the planning and implementation of the long term conservation plans.

Manpower situation

- 17. Members expressed concern that the labour shortage problem might further delay the construction progress. They suggested that relevant bureaux should jointly discuss and review the construction industry's capacity to implement a number of railway projects at the same time.
- 18. At the Subcommittee meeting on 14 December 2015, MTRCL advised that, to address the manpower shortage problem, it had imported about 20 technical staff for SCL project under the Supplementary Labour Scheme. It had also initiated a SCL Contractors Cooperative Training Scheme to provide training and internship programmes for different construction trades. The abovementioned Scheme had provided training to about 400 trainees, and 200 of them had completed the said Scheme. In answering a written question at the Council meeting of 3 February 2016, the Administration advised that there was a shortfall of 576 construction workers for SCL project in 2015¹⁰. At the Subcommittee meeting on 22 February 2016, MTRCL informed members that the contractor of MTRCL had applied to import around 70 electrical and mechanical workers for SCL project under the Supplementary Labour Scheme.

Other issues

- 19. Members have also expressed the following views and concerns at the previous Subcommittee meetings:
 - (a) the reduction in train capacity for East Rail Line after the replacement of 12-car trains with 9-car trains;

_

Hyperlink to the written question and Administration's reply: http://www.info.gov.hk/gia/general/201602/03/P201602030607.htm

- (b) the provision of station facilities, such as platform screen doors or automatic platform gates, toilet facilities, lifts and escalators, barrier-free access facilities and digital broadcasting systems at SCL stations;
- (c) the construction of a footbridge connecting Hin Keng Shopping Centre with the future Hin Keng Station; and
- (d) setting aside a proportion of public areas for art display with reference to overseas infrastructural projects. MTRCL should formulate a policy to replenish the art pieces on display regularly, and to reduce the number of advertising light boxes to give more space for art display.

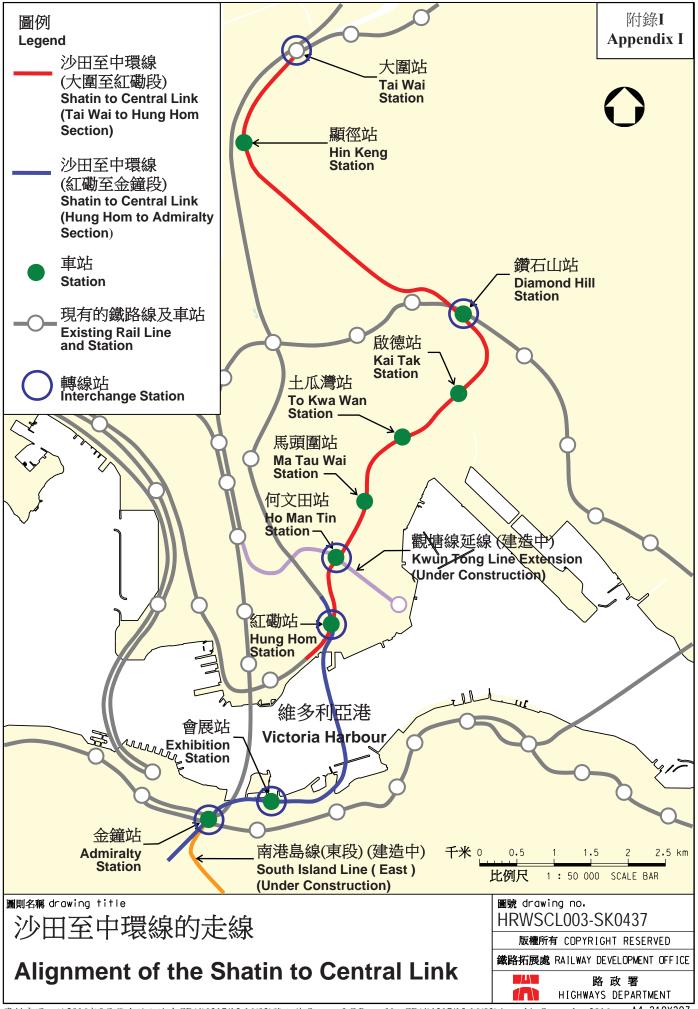

Latest development

20. The Administration plans to seek the Subcommittee members' support at the meeting to be held on 9 December 2016 in increasing the approved project estimate of 63TR entitled "Shatin to Central works" Link — construction of railway works — advance by \$847.7 million (in money-of-the-day prices), compared to the sum of \$6,254.9 million approved by FC in 2011. The advance works of SCL consist of the expansion of the existing Admiralty Station and the construction of a portion of Ho Man Tin Station for accommodating railway Besides, the Administration will also update the facilities of SCL. Subcommittee on the progress of the construction of SCL at the same meeting.

Relevant papers

21. A list of relevant papers is in **Appendix IV**.

Council Business Division 4
<u>Legislative Council Secretariat</u>
7 December 2016

Breakdown of the cost of the project "63TR — Shatin to Central Link — construction of railway works — advance works"

(a)	Shatin to Central Link ("SCL") portion at Admiralty Station ¹ (i) Station building works (ii) Building services works (iii) Electrical and mechanical ("E&M") works	1,351.4 172.8 349.6	\$ million 1,873.8
(b)	SCL portion of ventilation facility for Admiralty Station ² (i) Building works (ii) Building services works	206.9 24.8	231.7
(c)	Overrun tunnel at Admiralty Station ³		199.0
(d)	SCL portion at Ho Man Tin Station ⁴ (i) Station building works (ii) Building services works (iii) E&M works	1,496.3 399.5 105.5	2,001.3

As the 200 metres overrun tunnels will only serve SCL, the construction cost of the tunnels is therefore entirely budgeted under SCL project.

The expanded Admiralty Station will become an integrated station serving passengers for both SCL and South Island Line (East) ("SIL(E)"). The construction cost is therefore apportioned between the two projects. As the floor area of the expanded portion of the Admiralty Station, including the associated facilities for passengers, station concourse and platform etc., is proportional to the estimated passenger volume, for cost estimation purpose, a ratio of 7:3 is adopted for the apportionment between SCL and SIL(E) based on a ratio of peak hour line passenger volumes between the two lines. The Administration will be responsible for SCL portion of funding and the MTR Corporation Limited ("MTRCL") for SIL(E) of the funding. The independent engineering consultant has completed the review of the cost apportionment ratio and considers a cost apportionment ratio of 7:3 reasonable.

Same as the expansion of Admiralty Station, the cost of the ventilation facility is also apportioned between SCL and SIL(E) projects based on a 7:3 ratio.

Ho Man Tin Station is an integrated station serving both SCL and the Kwun Tong Line Extension ("KTE"). Similar to the arrangement of Admiralty Station, the construction cost is apportioned between SCL and KTE projects, according to a ratio of 3:1, to be funded by the Administration and MTRCL respectively. According to the information [LC Paper No. CB(4)1317/15-16(03)] provided by the Administration in September 2016, the construction cost of Ho Man Tin Station is apportioned between SCL and KTE projects at a ratio of about 74:26 in accordance with the estimated patronage at peak hours at the station.

		\$ million

(g)	Provision for price adjustment	Total 737.0 6,254.9	(in money-of-the-day prices)

(Source: LC Paper No. PWSC(2010-11)34 issued in January 2011)

_

The provisional sum of \$710.5 million represents an on-cost at 16.5% of the project base cost (i.e. items (a) to (d) above) that will be payable to MTRCL for undertaking the technical studies, design and construction supervision of the advance railway works. The actual on-cost rate is expected to be lower than the assumed 16.5% and will be subject to review by an independent engineering consultant as well as further discussion between the Administration and MTRCL.

• •	-	Sub-total	1,305.8	(in September
				2010 prices)

_

The reprovisioning works at Harcourt Garden and Hong Kong Park are required for expanding the Admiralty Station into an integrated station serving both the Shatin to Central Link ("SCL") and South Island Line (East) ("SIL(E)"). The cost of the reprovisioning works is therefore apportioned between the two projects. As the floor area of the expanded portion of the Admiralty Station, including the associated facilities for passengers, station concourse and platform etc., is proportional to the estimated passenger volume, for cost estimation purpose, a ratio of 7:3 is adopted for the apportionment between SCL and SIL(E) based on a ratio of peak hour line passenger volumes between the two lines. The Administration will be responsible for SCL portion of funding and the MTR Corporation Limited ("MTRCL") will be responsible for SIL(E) portion. The independent engineering consultant has completed the review of the cost apportionment ratio and considers a cost apportionment ratio of 7:3 reasonable.

The Administration plans to entrust the advance non-railway works to MTRCL for implementation, subject to further discussion with MTRCL and other relevant parties. The provisional sum of \$168.1 million represents an on-cost at 16.5% of the project base cost (i.e. items (a) and (b) above) will be payable to MTRCL for undertaking the technical studies, design and construction supervision of the relevant advance works. The actual on-cost rate is expected to be lower than the assumed 16.5% and will be subject to review by an independent engineering consultant as well as further discussion between the Administration and MTRCL.
