Dear Miss Lo,

**Panel on Food Safety and Environmental Hygiene**

**List of Follow-Up Actions**

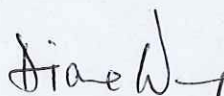

I refer to item 6 on the List of Follow-up Actions. I write to provide the Government's response below.

2. On (a) of item 6, following a critical review, the Government would undertake robust measures in managing and expediting the project workflow and programming to shorten the full market closure period from eight months to no more than seven months:

- (a) strengthening coordination with stall tenants;
- (b) allowing contractors to carry out pre-construction preparatory works in non-business hours prior to full market closure; and
- (c) accelerating air-conditioning testing and commissioning work.

2. On (b) of item 6, the Architectural Services Department, the Food and Environmental Hygiene Department and the works contractor would work closely in implementing this project. They would frequently hold regular and ad hoc project meetings, involving any other departments that would be necessary, to monitor works progress and address any issues that may arise from time to time.

Yours sincerely,
